*Pakistan Occupied Kashmir* Surinder Kumar

Sharma, Yaqboob ul Hassan, Ashok K. Behuria, 2019 This book is a result of research undertaken on the subject by the scholars associated with the IDSA project on Pakistan Occupied Kashmir (PoK) - also known as Pakistan Occupied Jammu and Kashmir (PoJK) - which includes both the so-called Azad Jammu and Kashmir (AJK) and Gilgit-Baltistan (GB). This was legally a part of the erstwhile princely state of Jammu and Kashmir, which acceded to India in October 1947. The authors of this book seek to provide a critical analysis of the politics of the above mentioned two regions within PoK; throw light on the genesis and evolution of various political parties and interest groups, and acquaint the readers with different personalities playing important role in politics therein. The main aim of the publication is to help the scholars, analysts, and policy-makers to understand the dynamics of the political systems in PoK, the complex interaction of these systems with the government in Islamabad and the responses of the local leadership to Pakistan's strategy of keeping them under strict control in the name of representative governance over the last 70 years.

**Racism After Apartheid** Vishwas Satgar, 2019-03-01

Racism after Apartheid, volume four of the Democratic Marxism series, brings together leading scholars and activists from around the world studying and challenging racism. In eleven thematically rich and conceptually informed chapters, the contributors interrogate the complex nexus of questions surrounding race and relations

of oppression as they are played out in the global South and global North. Their work challenges Marxism and anti-racism to take these lived realities seriously and consistently struggle to build human solidarities.

European Intermediary Liability in Copyright: A Tort-Based Analysis Christina

Angelopoulos, 2016-09-15 In step with its rapid progress to the centre of modern social, political, and economic life, the internet has proven a convenient vehicle for the commission of unprecedented levels of copyright infringement. Given the virtually insurmountable obstacles to successful pursuit of actual perpetrators, it has become common for intermediaries –providers of internet-related infrastructure and services – to face liability as accessories. Despite advances in policy at the European level, the law in this area remains far from consistently applicable. This is the first book to locate and clarify the substantive rules of European intermediary accessory liability in copyright and to formulate harmonised European norms to govern this complicated topic. With a detailed comparative analysis of relevant regimes in three major Member State jurisdictions – England, France, and Germany – the author elucidates the relationship between these rules and the demands of EU law on fundamental rights and the principles of European tort law. She clearly presents the interrelations between such areas as the following: - accessory liability in tort; - joint tortfeasance; - European fault-based liability: fault, causation, defences; - negligence; - negligence balancing:

rights-based or utility-based?; - Germany's "disturbance liability" (Störerhaftung); - fair balance in human rights; - end-users' fundamental rights; - The European Commission's 2015 Communication on a Digital Single Market Strategy for Europe; - The E-Commerce Directive and other relevant provisions; - Safe harbours: mere conduit, caching, hosting; - Intermediary actions: monitoring, filtering, blocking, removal of infringing content; and - application of remedies: damages and injunctions. The strong points of each national system are highlighted, as are the commonalities between them, and the author uses these to build a proposed harmonised European framework for intermediary liability for copyright infringement. She concludes with suggestions for the future possible integration of the proposed framework into EU law. The issue of the liability of internet intermediaries for third party copyright infringement has entered into the political agenda across the globe, giving rise to one of the most complex, contentious, and fascinating debates in modern copyright law. This book offers an opportunity for a re-conceptualisation and rationalisation of the applicable law, in a way which additionally better accounts for the cross-border nature of the internet. It will be of inestimable value to many interested parties – lawyers, internet intermediaries, NGOs, policymakers, universities, libraries, researchers, lobbyists – in matters regarding the information society.

Jaccard,2020-02-06 Shows readers how we can all help solve the climate crisis by focusing on a few key, achievable actions.

**International Energy Outlook** Government Publications Office,2016-08-15 International Outlook 2016, an updated statistical reference with energy projections, is provided as a service to energy managers and analysts, both in government and in the private sector. The projections are used by international agencies, federal and state governments, trade associations, and other planners and decision makers. They are published pursuant to the Department of Energy Organization Act of 1977 (Public Law 95-91), Section 205(c). The report begins with a review of world trends in energy demand and the major macroeconomic assumptions used in deriving the International Energy Outlook 2016 (IEO2016) projections, along with the major sources of uncertainty in the projections, which extend through 2040. In addition to the Reference case projections, High Economic Growth and Low Economic Growth cases were developed to consider the effects of higher and lower growth paths for economic activity than are assumed in the Reference case. IEO2016 also includes a High Oil Price case and, alternatively, a Low Oil Price case. The resulting projections--and the uncertainty associated with international energy projections in general--are discussed in Chapter 1, World energy demand and economic outlook. Projections for energy consumption and production by fuel--petroleum and other liquid fuels, natural gas, and coal--are presented in Chapters 2, 3, and

4, along with reviews of the current status of each fuel on a worldwide basis. Chapter 5 discusses the projections for world electricity markets--including nuclear power, hydropower, and other marketed renewable energy resources--and presents projections of world installed generating capacity. Chapter 6 presents a discussion of energy used in the buildings sector (residential and commercial). Chapter 7 provides a discussion of industrial sector energy use. Chapter 8 includes a detailed look at the world's transportation energy use. Finally, Chapter 9 discusses the outlook for global energy-related carbon dioxide emissions. IE0 2016 focuses exclusively on marketed energy. Non-marketed energy sources, which continue to play an important role in some developing countries, are not included in the estimates. *International Business* Alan M. Rugman, Simon Collinson, Rajneesh Narula, 2016-11 This textbook connects tried-and-tested theory, analytical frameworks, data and case examples to deliver a comprehensive guide to the subject from authors who keep pace with the ongoing developments in both theory and practice.

E-commerce Law Henk Snijders, 2003-01-01 This book elaborates and updates a staff exchange that took place in 2001 among legal scholars from the

Universities of Oxford and Leiden. Its insights represent some of the best-informed thinking on the legal aspects of this all-pervasive feature of contemporary society.

Accessory Liability Paul S Davies, 2015-02-26  
Accessory liability in the private law is of great importance. Claimants often bring claims against third parties who participate in wrongs. For example, the 'direct wrongdoer' may be insolvent, so a claimant might prefer a remedy against an accessory in order to obtain satisfactory redress. However, the law in this area has not received the attention it deserves. The criminal law recognises that any person who 'aids, abets, counsels or procures' any offence can be punished as an accessory, but the private law is more fragmented. One reason for this is a tendency to compartmentalise the law of obligations into discrete subjects, such as contract, trusts, tort and intellectual property. This book suggests that by looking across such boundaries in the private law, the nature and principles of accessory liability can be better understood and doctrinal confusion regarding the elements of liability, defences and remedies resolved. Winner of the Joint Second SLS Peter Birks Prize for Outstanding Legal Scholarship 2015.

**The Climate Crisis** Vishwas Satgar, 2018-02-01  
Essays that address the question: how can people and class agency change this destructive course of history? Capitalism's addiction to fossil fuels is heating our planet at a pace and scale never before experienced. Extreme weather patterns, rising sea levels and accelerating feedback loops

are a commonplace feature of our lives. The number of environmental refugees is increasing and several island states and low-lying countries are becoming vulnerable. Corporate-induced climate change has set us on an ecocidal path of species extinction. Governments and their international platforms such as the Paris Climate Agreement deliver too little, too late. Most states, including South Africa, continue on their carbon-intensive energy paths, with devastating results. Political leaders across the world are failing to provide systemic solutions to the climate crisis. This is the context in which we must ask ourselves: how can people and class agency change this destructive course of history? Volume three in the Democratic Marxism series, *The Climate Crisis* investigates eco-socialist alternatives that are emerging. It presents the thinking of leading climate justice activists, campaigners and social movements advancing systemic alternatives and developing bottom-up, just transitions to sustain life. Through a combination of theoretical and empirical work, the authors collectively examine the challenges and opportunities inherent in the current moment. This volume builds on the class-struggle focus of Volume 2 by placing ecological issues at the centre of democratic Marxism. Most importantly, it explores ways to renew historical socialism with democratic, eco-socialist alternatives to meet current challenges in South Africa and the world.

Development, Democracy, and Welfare States

Stephan Haggard, Robert R. Kaufman, 2008-09-14  
Comparing the welfare states of Latin America,

East Asia and Eastern Europe, the authors trace the origins of social policy in these regions to political changes in the mid-20th century, and show how the legacies of these early choices are influencing welfare reform following democratization and globalization.

**The Liability of Internet Intermediaries** Jaani Riordan, 2016-06-30 Internet intermediaries play a central role in modern commerce and society. Although their economic and social importance is well-recognised, their legal liability remains poorly understood, and, until now, no work has specifically addressed their legal responsibility for wrongdoing carried out by third parties using their facilities or platforms. This work fills that gap by providing comprehensive coverage of the legal duties owed by intermediaries and the increasingly complex schemes that regulate their activities. The first part of the work introduces the concept of an internet intermediary, general doctrines of primary and secondary liability, and the European enforcement regime. The second part examines the liability of intermediaries in specific areas of law, with a detailed analysis of the applicable liability rules, and the major English case law, and decisions of the Court of Justice that interpret and apply them. The final part of the work provides guidance on remedies and limitations. Written by an expert author from the intellectual property chambers at 8 New Square, Lincoln's Inn, this is an essential guide for lawyers advising on liability, privacy, and online regulation.

*Suzanne Treister* Suzanne Treister, 2012 HEXEN2.0

is the sequel to HEXEN 2039 which imagined new technologies for psychological warfare through investigating links between the occult and the military in relation to histories of witchcraft, the US film industry, British Intelligence agencies, Soviet brainwashing, behavior control experiments of the US Army's MKULTRA program and more recent practices of its Civil Affairs and Psychological Operations Command (PSYOP), in light of contemporary neuro-scientific research. HEXEN2.0 delves deeper into the histories of scientific research behind government programs of mass control, in tandem with counter-cultural and grass roots movements, and creates a space for the imagining of alternative future scenarios. HEXEN2.0 charts, within a framework of post-WWII US governmental and military imperatives, the coming together of diverse scientific and social sciences through the development of cybernetics, the history of the internet, the rise of Web 2.0 and mass intelligence gathering, and the implications for the future of new systems of societal manipulation towards a control society. Furthermore, HEXEN2.0 investigates the participants of the seminal Macy Conferences<sup>1</sup> (1943-1956) - whose primary goal was to set the foundations for a general science of the workings of the human mind - alongside specific critics of technological society such as Theodore Kaczynski/Unabomber, current profiles of Anarcho-Primitivists and Post Leftists, and traces the precursory ideas of Thoreau, Heidegger, Adorno and others in relation to fantasies of utopic/dystopic futures from science-fiction literature and film.

Through representing and re-examining these subjects and histories through the lens of occult belief systems and ideas of the supernatural HEXEN2.0 takes us to a hypnotic, mesmerizing space of early technological fantasy and theory to hallucinate feedback from the past from where one may imagine and construct possible alternative futures. The information in HEXEN2.0 is based on actual events, people and histories.

**Intellectual Property Liability of Consumers, Facilitators and Intermediaries** Christopher Heath, Anselm Kamperman Sanders, 2012-10-01 With reports from all major jurisdictions where the responsibility of facilitators and intermediaries for copyright and trade mark infringement have been litigated, this very useful book is the first comprehensive global survey of the liability regime that intermediaries may face when assisting others to directly infringe copyright and trade mark rights, or when providing others with the means to do so. It addresses such issues as the following: ISP liability; contributory and secondary liability for trade mark, copyright, and patent infringement; time- and geo-shifting devices and services; consumer identification through dynamic IP addresses; infringements committed on a “commercial scale”; liability of hosting providers; requirements for a breach of duty of care; notice to users to refrain from infringements; filters and other due diligence measures; “actual knowledge”; privacy and infringers’ personal data; file sharing services; online storage services; and liability of transporters and freighters. After a general

introduction analysing relevant aspects of trade mark and copyright law, local experts provide detailed reports on positions in the EU (at the Community level), Germany, France, Italy, The United States, Japan, Korea, Australia, and New Zealand. As well as dealing with the issues, each report pays close attention to case law, legislative developments, and procedural issues of injunctive relief and damages. A final chapter covers comparative contributory patent infringement. Along with the very practical value the book offers corporate counsel charged with IP rights litigation, the authors shed light on the fundamental issue of whether attempts to broaden liability in this area are compatible with established IP principles such as territoriality, freedom to operate, and freedom of competition. As a result, the book will be welcomed by a wide spectrum of lawyers and others working in this rapidly growing field, including practitioners, policymakers, academics, and jurists.

*The Big Archive* Sven Spieker, 2017-03-03 The archive as a crucible of twentieth-century modernism and key for understanding contemporary art. The typewriter, the card index, and the filing cabinet: these are technologies and modalities of the archive. To the bureaucrat, archives contain little more than garbage, paperwork no longer needed; to the historian, on the other hand, the archive's content stands as a quasi-objective correlative of the "living" past. Twentieth-century art made use of the archive in a variety of ways—from what Spieker calls Marcel Duchamp's "anemic archive" of readymades and El

Lissitzky's Demonstration Rooms to the compilations of photographs made by such postwar artists as Susan Hiller and Gerhard Richter. In *The Big Archive*, Sven Spieker investigates the archive—as both bureaucratic institution and index of evolving attitudes toward contingent time in science and art—and finds it to be a crucible of twentieth-century modernism. Dadaists, constructivists, and Surrealists favored discontinuous, nonlinear archives that resisted hermeneutic reading and ordered presentation. Spieker argues that the use of archives by such contemporary artists as Hiller, Richter, Hans-Peter Feldmann, Walid Raad, and Boris Mikhailov responds to and continues this attack on the nineteenth-century archive and its objectification of the historical process. Spieker considers archivally driven art in relation to changing media technologies—the typewriter, the telephone, the telegraph, film. And he connects the archive to a particularly modern visuality, showing that the avant-garde used the archive as something of a laboratory for experimental inquiries into the nature of vision and its relation to time. *The Big Archive* offers us the first critical monograph on an overarching motif in twentieth-century art.

**Concise European Copyright Law** Thomas Dreier, P. Bernt Hugenholtz, 2016-01-27 *Concise European Copyright Law* aims to offer the reader a rapid understanding of all the provisions of copyright law in force in Europe that have been enacted at the European and international levels. This volume takes the form of an article-by-article commentary on the relevant European directives and

international treaties in the field of copyright and neighbouring rights. It is intended to provide the reader with a short and straightforward explanation of the principles of law to be drawn from each provision. Editors and authors are prominent specialists (academics and practitioners) in the field of international and European copyright law. Concise European Copyright Law is part of 'Concise IP', a series of five volumes of commentary on European intellectual property legislation. The five volumes cover: Patents and related matters, Trademarks and designs, Copyrights and neighbouring rights, IT and a general volume including jurisdictional issues.

*EU Compendium - Fundamental Rights and Private Law* Christoph Busch, Hans Schulte-Nölke, 2010-12-23 This compendium provides an introduction to the intricate interplay of fundamental rights and private law. It identifies areas of commercial and civil law where fundamental rights from different sources play a key role in the interpretation and application of private law rules. In addition, it offers a collection of case law examples from across the EU which illustrate differences and commonalities regarding the influence of fundamental rights on civil and commercial litigation. It is thus well suited for the training of judges and as a source of inspiration for national legislators. Contributors to the study co-ordinated by the European Legal Studies Institute at University of Osnabrück with the support of the European Commission's Fundamental Rights and Citizenship Programme include high

ranking judges as well as young researchers from across the EU. As the Commissioner for Justice, Fundamental Rights and Citizenship, I can only praise the pertinent purpose and the methodology of the compendium which underlines the concrete approach the authors adopted. Viviane Reding, Vice-President of the European Commission

*The Economics of the Noosphere* Lyndon H.

LaRouche, Jr., 2015-09-03 American Economist Lyndon H. LaRouche, Jr., has been right in his long-range economic and related forecasts--in contrast to virtually all other economists and political leaders, who have been simply wrong. This fact has not gone unnoticed. Brazil, Russia, India, China, South Africa and a growing chorus of nations are putting more and more of the ideas in this book into action. The time has come when all economists and political thinkers who want to remain relevant to unfolding world realities, will now wish to go much more deeply into the work of LaRouche, than simply his now-vindicated forecasts as such. They will wish to acquaint themselves with, for example, the scientific concepts of biogeochemist Vladimir Vernadsky--the initiator of the idea of the biosphere--whose concept of the noosphere has been used and enhanced by LaRouche.

Comparative Social Policy Kennett,

Patricia, 2001-08-01 This text explores the new context of social policy and considers how cross-national theory and research can respond to the challenges facing welfare. It is suitable for undergraduate and masters level students of social policy.
