The Scientism Delusion Gregory Lessing Garrett,2018-03-20 This enthralling page-turner breaks all the molds, and fearlessly exposes the deepest darkest intrigue in history...The Luciferian Agenda for a New World Order. In it, we learn of the Luciferian roots of Modern Science, as the reader is transported back in time to the insidious origins of modern-day Scientism, the current religion of most scientists today. Through an excursion into the roots of Scientism, Mr. Garrett deftly retraces the historical antecedents of Scientism, echoing back to The Secret Mystery Schools of Kabbalistic, Egyptian Hermeticism, onwards into the true nature of Freemason and Alchemical Occultist, Sir Isaac Newton, and then further into the nefarious Vatican Jesuit Priesthood, whose hidden hand can be linked to the creation of The Illuminati, as well as the current Luciferian New Age Religion. Finally, the serpentine path leads up into modern Freemasonic Luciferian, NASA, and then to The Jesuit Controlled Alien Deception about to take hold of the world. --Christian Chesterfield Ph.D.

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
