Solidarity in Biomedicine and Beyond Barbara Prainsack, Alena Buyx, 2017-01-19 In times of global economic and political crises, the notion of solidarity is gaining new currency. This book argues that a solidarity-based perspective can help us to find new ways to address pressing problems. Exemplified by three case studies from the field of biomedicine: databases for health and disease research, personalised healthcare, and organ donation, it explores how solidarity can make a difference in how we frame problems, and in the policy solutions that we can offer.

Johnny Got His Gun Dalton Trumbo, 2013-11-15 The Searing Portrayal Of War That Has Stunned And Galvanized Generations Of Readers An immediate bestseller upon its original publication in 1939, Dalton Trumbo's stark, profoundly troubling masterpiece about the horrors of World War I brilliantly crystallized the uncompromising brutality of war and became the most influential protest novel of the Vietnam era. Johnny Got His Gun is an undisputed classic of antiwar literature that's as timely as ever. "A terrifying book, of an extraordinary emotional intensity."--The Washington Post Powerful. . . an eye-opener. --Michael Moore Mr. Trumbo sets this story down almost without pause or punctuation and with a fury amounting to eloquence.--The New York Times A book that can never be forgotten by anyone who reads it.--Saturday Review

Handbook of Natural Language Processing and Machine Translation Joseph Olive, Caitlin Christianson, John McCary, 2011-03-02 This comprehensive handbook, written by leading experts in the field, details the groundbreaking research conducted under the breakthrough GALE program--The Global Autonomous Language Exploitation within the Defense Advanced Research Projects Agency (DARPA), while placing it in the context of previous research in the fields of natural language and signal processing, artificial intelligence and machine translation. The most fundamental contrast between GALE and its predecessor programs was its holistic integration of previously separate or sequential processes. In earlier language research programs, each of the individual processes was performed separately and sequentially: speech recognition, language recognition, transcription, translation, and content summarization. The GALE program employed a distinctly new approach by executing these processes simultaneously. Speech and language recognition algorithms now aid translation and transcription processes and vice versa. This combination of previously distinct processes has produced significant research and performance breakthroughs and has fundamentally changed the natural language processing and machine translation fields. This comprehensive handbook provides an exhaustive exploration into these latest technologies in natural language, speech and signal processing, and machine translation, providing researchers, practitioners and students with an authoritative reference on the topic.

Pit Bull Flower Power Sophie Gamand,2018 For decades, pit bulls have been demonized by society and portrayed as hellhounds. They've become the most feared, hated, and abused of all companion animals. Some cities and even entire countries ban them, while the media persist in associating them with viciousness. This unjust reputation has sealed the fate of millions of dogs, who face prejudice around the world and languish in shelters, where they are the most euthanized. In America alone, hundreds of thousands of pit bulls are put to sleep every year. Since 2014, French photographer Sophie Gamand has been composing portraits of adoptable pit bulls from more than thirty

shelters and rescues throughout the United States. Many had been waiting for years for a home. Adorning her models with handmade flower-crowns, Gamand tells each dog's story and celebrates their inherent personality, vulnerability, and individuality. Posted and shared widely on social media, the portraits--at once charming, candid, and deeply affecting--have not only led to hundreds of dogs finding loving, forever homes, but have also spurred efforts to destigmatize an animal whose reputation for violence says more about us than it does the character of the dogs themselves. Full of moving, honest, and inspiring stories of individual dogs and their lives (and deaths), Pit Bull Flower Power presents a vivid, beautifully composed cross-section of Gamand's extraordinary work. The book also serves as a testament to the caring people who work in animal rescue, the passion and dedication of those who provide homes for these animals, and the dignity, forbearance, and love of these dogs, who are at the mercy of humans.

Blue Moo Sandra Boynton,2007-11-08 Sandra Boynton and Michael Ford—the team behind Rhinoceros Tap, the Grammy-nominated #1 New York Times bestseller Philadelphia Chickens, and other toe-tapping book-and-CD sets—bring great words, great music, great performers to children and vintage children alike. Put a nickel in the jukebox, assuming you can locate a jukebox, and that you remember what a nickel is. Here's legendary Beach Boy Brian Wilson singing lead and 10-part harmonies on Speed Turtle. The incomparable Neil Sedaka crooning Your Nose. B. B. King brings you a wistful One Shoe Blues, Gerry and the Pacemakers offer Mersey Lullaby, and Broadway great Patti LuPone sings—what else—the Rabbit Tango. And then there's the hit single from Boynton's Your Personal Penguin sung by the impossibly cute Davy Jones of The Monkees. I mean jeepers, even Sha Na Na is here. And OH! The book! Boynton has filled it with all things 50s and 60s. And, well, golly, it's so happy and colorful and just terrific, Mister! Grab your saddle shoes, plunk two straws into that swell chocolate malt, and let's twist again like we did last century. 119,000 copies in print.
