Eaglewall's Table Top Navy Donald D. Hood,2011-04-01 The first in depth study of the Eagle 1:1200 scale plastic model warships produced by Eaglewall Plastics, LTD, Eaglewall's Table Top Navy explores the birth, growth, and death of the legendary model company. The book covers the history of the company, the tie-in with the Eagle magazine, related producers such as the American company Pyro, and probes the mysterious fate of the Eagle molds. The detailed lists of models produced and variations are essential to any Eaglewall collector. This hard cover book is illustrated with over 100 full color images with example of Eagle artwork, advertisements, completed kits, and kit parts.

Waterline Ship Models John Bowen,1972-01

Bassett-Lowke Derek Head,2006-07-25 The nostalgia for the great passenger ships of the first half of the 20th century is vividly recalled in this book on the world famous model-making firm of Bassett-Lowke, with their production of small scale waterline ship models manufactured between 1908

American Amphibious Gunboats in World War II Robin L. Rielly,2013-05-17 As the United States began its campaign against numerous Japanese-held islands in the Pacific, Japanese tactics required them to develop new weapons and strategies. One of the most crucial to the island assaults was a new group of amphibious gunboats that could deliver heavy fire close in to shore as American forces landed. These gunboats were also to prove important in the interdiction of inter-island barge traffic and, late in the war, the kamikaze threat. Several variations of these gunboats were developed, based on the troop carrying LCI(L). They included three conversions of the LCI(L), with various combinations of guns, rockets and mortars, and a fourth gunboat, the LCS(L), based on the same hull but designed as a weapons platform from the beginning. By the end of the war the amphibious gunboats had proven their worth.

Tree Shaker Bill Keller,2008 Without deifying its subject, this biography looks at the life of Nelson Mandela, placing his awe-inspiring political accomplishments into historical context for young readers.

Miniature Ship Models Paul Jacobs,2008-05-30 This book is the first comprehensive history of how the 1:1200 scale and its 1:1250 continental equivalent became accepted as the modern standard for miniature ship models. The origins can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War, but when peace came the manufacturers aimed their increasingly sophisticated products at collectors, and acquiring, modifying or scratch-building miniature ship models has been an avidly pursued hobby ever since. This book charts the commercial rise and fall of the manufacturers, and the advancing technology that

produces ever more detailed and accurate replicas. The author - himself a lifetime collector and builder of models - looks at the products of each manufacturer, past and present, rating their quality and suggesting why some are regarded as more collectible than others. But the book deals with more than off-the-shelf models, covering subsidiary issues like painting, modifying and diorama settings, and is illustrated throughout with many of the finest examples of the genre. The combination of fascinating background information with stunning visual presentation will make this book irresistible to any collector or enthusiast.

Miniature Merchant Ships John Bowen, 1997 This practical guide to waterline ship modelling in 1/1200 scale contains 30 sets of plans for the reader to construct their own models.

Naval Camouflage 1914-1945 David L. Williams, 2001 Although it is a subject of immense importance to warship enthusiasts, modelmakers, photograph collectors, and indeed academic naval historians, there has never been an authoritative history of camouflage. Apart from the huge scale of the subject, the reason for this lies largely in the fragmented nature of the surviving evidence, and the ad hoc nature of much wartime development. This book does not claim to be such a narrative history, but it does set out to provide a comprehensive study. Visual and illustrative in its approach, it is Anglo-American in emphasis, but the camouflage patterns of enemy navies (and selected neutrals) are covered as well.

More Miniature Merchant Ships John Bowen, 2003 John Bowen brings his knowledge and expertise of waterline ship modelling to a second volume of miniature merchant ships, including examples such as Haverford (1901), Carpathia (1903), Oronsay (1925) and Braemar Castle (1952). The book opens with a section giving advice on initial preparations - finding and using plans, suitable materials and tools. This section also presents an alphabetical list of the principal fittings on a ship (those that would be included on this type of model) - hatches, winches, capstans, anchors, etc - with details and diagrams on how to make them. Section II comprises 30 sets of plans of ships built between 1900 and 1969. These are accompanied with at least one photograph of the ship, a full specification, brief history, and notes on essential constructional details, including colour scheme. Readers will recognise the authoritative yet approachable style John has brought to several ship modelling titles, which will appeal to both beginners and more experienced modellers. A companion volume to the highly successful *Miniature Merchant Ships*, *More Miniature Merchant Ships* includes 30 1/1200 scale plans of liners, cargo ships and passenger cargo ships, each supplied with comprehensive modelling notes. More than 60 photographs of the prototype ships underway supply

detailed pictorial references. This book, like *Miniature Merchant Ships*, is an essential addition to the library of any ship modeller. John Bowen is the author of several acclaimed titles for Conway Maritime Press, including *Miniature Merchant Ships*, published in 1997. Building waterline models has always been his favourite form of modelling and this book is a culmination of his continuing achievements in this area of ship modelling. John was deputy editor of Conway's quarterly journal *Model Shipwright* when it was launched in 1972 and has been its editor since 1974. He contributes a plan and instructions for a miniature merchant ship to each issue. John is a member of the Royal Institution of Naval Architects.

Spoils of War Aidan Dodson, Serena Cant, 2020-03-30 While a large number of books have dealt with the navies and war at sea during the World Wars, the immediate aftermaths have generally received only minimal coverage. However, the fates of defeated navies are of enormous interest from a number of perspectives. These include the relative priorities of the victorious powers, acquisition and testing of ex-enemy materiel and the intended future capabilities of those ex-enemy navies that were to be allowed to continue to exist. This new book traces the histories of navies and ships of the defeated powers from the months leading up to the relevant armistices or surrenders through to the final execution of the appropriate post-war settlements. In doing so, it discusses the way in which the victorious powers reached their final demands, how these were implemented, and to what effect. The later histories of ships that saw subsequent service, either in their original navies or in those navies which acquired them, are also described. In doing this, much use is made of material drawn from archival, and in some cases archaeological, sources, some of which has never previously been used. Through these, a wide range of long-standing myths are busted, and some badly distorted modern views and assessments of events in the wake of the conflicts put right. The fascinating narrative will be accompanied by tabulated lists of all major navy-built (and certain significant ex-mercantile) enemy ships in commission at the relevant date of the armistice or surrender, or whose hulks were specifically listed for attention in post-Second World War allied agreements. These will include key dates in their careers and their ultimate fates. This highly original book, drawing on archaeological evidence as well as archival sources, and including numerous photographs will become an essential reference tool for all those interested in the naval history of the two World Wars.

Naval Battles of the First World War Geoffrey Bennett, 2014-06-30 From a British Royal Navy officer, a detailed history of World War I's principal battles at sea. With the call to action stations in August 1914, the Royal Navy faced its greatest test since the time of Nelson . . . This classic history of the Great War at sea combines graphic and stirring accounts of all the principal naval engagements—battles overseas, in home waters and, for the first time, under the sea—with analysis of the strategy and tactics of both sides. Geoffrey Bennett brings these sea battles dramatically to life, and confirms the Allied navies' vital contribution to victory. Praise for *Naval Battles of the First World War* “Strongly recommended.” —RUSI Journal “Excellent balanced accounts and judgements.” —Richard Hough, historian and author “Extensive photographs, include key aspects such as the German battle cruiser *Blucher* at the Dogger Bank battle, the destruction of the British battle cruiser *Queen Mary*, as well as the German dreadnaught *Bayern* sinking after being scuttled at Scapa Flow. A fascinating diagram shows Battleship Turrets, which provides insight into the process of action, such as the shell room, cordage charge, magazine, to the cordite hoist and gun.” —Jon Sandison, historian

Landing Craft, Infantry and Fire Support Gordon L. Rottman, 2011-12-20 Described by one soldier as “a metal box designed by a sadist to move soldiers across the water,” the Landing Craft, Infantry was a large beaching craft intended to deliver an infantry company to a hostile shore, once the beachhead was secured. The LCI and its vehicle-delivery counterpart, the Landing Ship, Medium were widely used by the allies during World War II. Later, the hulls of these ships were used as the basis for a fire support ship. While the landing ships were phased out after the Korean War, some fire support craft remained in use throughout the Vietnam War. This book tells the developmental and operational history of this important tool of American amphibious military strategy that spanned three wars.

Landing Ship, Tank (LST) 1942–2002 Gordon L. Rottman, 2012-09-20 The Landing Ship Tank (LST) is one of the most famous of the many World War II amphibious warfare ships. Capable of discharging its cargo directly on to shore and extracting itself, the LST provided the backbone of all Allied landings between 1943 and 1945, notably during the D-Day invasion. Through its history, the LST saw service from late 1942 until late 2002, when the US Navy decommissioned the USS *Frederick* (LST-1184), the last ship of its type. This book reveals the development and use of the LST, including its excellence beyond its initial design expectations.

The Great Ships Peter C. Smith, 2008-08-04 Authoritative study of the battleship in World War II. Stirring episodes of naval combat. Covers the famous chase after the Bismarck, the sinking of the Scharnhorst, the coastal bombardments on D-Day, and other actions.

British Battleships of World War One R. A. Burt, 2012-11-15 This new edition of a classic work on British battleships is the most sought after book on the subject. Containing many new photographs from the author's exhaustive collection this superb reference book presents the complete technical history of British capital ship design and construction during the dreadnought era. Beginning with Dreadnought, all of the fifty dreadnoughts, 'super-dreadnoughts' and battlecruisers that served the Royal Navy during this era are described and superbly illustrated with photographs and line drawings.
