Conference proceedings - XLVI International Symposium on Operational Research SYMOPIS 2019 Milan Martić, Dragana Makajić-Nikolić, Gordana Savić, 2019-11-18 The Faculty of Organizational Sciences, University of Belgrade traditionally, in cooperation with other higher education and scientific institutions and associations, organizes a SYM-OP-IS symposium to advance the theory and practice of operational research, business analytics and related disciplines. This year, the 46th Symposium on Operations Research - SYM-OP-IS is being organized as an international scientific conference. The symposium brings together domestic and international academic and scientific public, OR practitioners, public and non-governmental sector, as well as students who participate in discussing and analyzing relevant issues in the field of contemporary operational research. The aim of the Symposium is to provide a unique forum for discussion of current issues and exchange of the latest information, ideas and innovative solutions in the field of operational research in the context of improving business achievements and results. Authors have the opportunity to publish scientific and professional results as research papers or case studies. This year's conference program is organized through thematic sessions and consists of 132 papers by authors from 10 countries. In addition to thematic sections, plenary lectures of eminent scientists in the field of business intelligence data science, efficiency measurement and behavioral operational research will be held as well as a forum on International Projects in Science and Education.
Scientific Committee Chair Milan Martić

Fakultet organizacionih nauka
Univerziteta u Beogradu tradicionalno u saradnji sa drugim visokoškolskim i naučnoistraživačkim organizacijama, kao i naučnim udruženjima, organizuje simpozijum SYM-OP-IS sa ciljem unapređenja teorije i prakse operacionih istraživanja, poslovne analitike i srodnih disciplina. Ove godine se organizuje 46. simpozijum operacionih istraživanja – SYM-OP-IS kao međunarodni naučni skup. Simpozijum okuplja domaću i međunarodnu akademsku i naučnu javnost, predstavnike korporativnog, javnog i nevladinog sektora, kao i studente osnovnih, masterskih i doktorskih studija koji kroz predstavljanje svojih dosadašnjih rezultata, saznanja i iskustava učestvuju u razmatranju i analizi relevantnih pitanja iz oblasti savremenih operacionih istraživanja.

Cilj Simpozijuma je da obezbedi jedinstven forum za diskusiju o aktuelnim pitanjima i razmenu najnovijih informacija, ideja i inovativnih rešenja u oblasti operacionih istraživanja menadžmenta u kontekstu unapređenja poslovnih dostignuća i rezultata. Autori imaju mogućnost da naučne i stručne rezultate publikuju kao istraživačke radove ili studije slučaja. Ovogodišnji program konferencije je organizovan kroz tematske sesije i sastoji se iz 132 rada autora iz 10 zemalja. Uz tematske sekcije, biće održana i plenarna predavanja eminentnih naučnika iz oblasti nauke o podacima poslovne analitike, merenja efikasnosti i bihevijoralnih operacionih istraživanja kao i forum na temu Međunarodni projekti u nauci i prosveti. Living Alliances, Leaving Alliances Franck Orban, 2022-01-20 Throughout history, alliances have taken many different forms and they have been difficult to understand in their totality. As we now experience an unprecedented pandemic, which highlights the need for both external alliances between states and internal alliances between governments and populations, understanding alliances is more than ever critical to apprehend an open and interactive world that knows no borders and in which challenges imposed on humans are global. The book "Living Alliances, Leaving Alliances" is an interdisciplinary approach to investigating past, present and future alliances on an interpersonal, subnational, international and transnational level. It is the result of a two-year project by AreaS, a research group in area studies located at the Østfold University College in Norway.

The Making of Modern Colombia David Bushnell, 1993-02-09 Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.

Computer-Mediated Communication Systems Elaine B. Kerr, Starr Roxanne Hiltz, 2013-09-03 Computer-Mediated Communication Systems: Status and Evaluation synthesizes current knowledge about computerized conferencing systems, electronic mail, and office information-communication systems. It should be of interest both to students and researchers studying this new form of electronic communication and to organizations that are planning the installation of electronic mail or other computer-mediated communication systems and that need to be aware of the information gleaned from the studies presented here. The book is organized into four main sections, focusing on the following issues: (1) What are the important considerations in designing

software or choosing a system from the many available options and capabilities? (2) What factors determine whether such systems are likely to be accepted or rejected? (3) What are the likely impacts of such systems upon the individuals, groups, and organizations which use them? It is not the economic costs and benefits, but the social problems and payoffs in the form of enhanced performance and organizational efficiency that should be the main considerations in deciding whether or not to use a computer-mediated communication system. (4) Given the conditional nature of many of the possible impacts, no system should be implemented without formal evaluation and feedback from users to guide the implementation. The major kinds of evaluational strategies that have been successfully employed are described in this book.

The Road to the World's End Sigurd Hoel, 1995 A group of boys drowns a goat in this tale of innocence and childhood cruelty. The setting is Norway during the first half of this century and the protagonist is the son of a landowner. By the author of *The Troll Circle*.

Discussing Borders, Escaping Traps Franck Orban, Elin Strand Larsen, 2019-11-18 We live in strange times. Old borders are vanishing just before our astonished eyes, while new ones are rapidly emerging. Nearly three decades after the publication of Francis Fukuyama's *The End of History and the Last Man*, the zeitgeist that predicted a bright future for mankind to a large extent turned out to be rather more of a dystopia. Crises in and outside Europe multiplied the number of border controls, triggered the construction of walls and fences and widened ideological gaps. The book *Discussing Borders, Escaping Traps* is a transdisciplinary and transspatial approach to investigating these vanishing, emerging and changing material and immaterial borders. It is the result of a two-year project by AreaS, a research group in area studies located at Østfold University College in Norway, and by AreaS' partners.

Requiem Geir Tangen, 2018-07-31 The first in a superb new series from phenomenal author Geir Tangen, *Requiem* strikes a deliciously chilling chord. "A magnificent crime debut from Norway's biggest crime blogger. Well-composed, well-written, funny, and brutal. In short: a great crime novel, with a few bold, unexpected twists at the end." –Bok, Five Stars (Norway) A great and thrilling crime novel. –Kristeligt Dagblad (Denmark) "There are crime novels you simply have to read. Geir Tangen is a master in his own right." –Fyens Stiftstidene (Denmark) Journalist Viljar Gudmundsson is no stranger to chilling stories. So when he receives an anonymous e-mail in which the writer proclaims their intention to execute a woman for her unpunished crimes, he thinks the whole thing is a bad joke. Such things happen only in bad crime novels, after all. But the next day, the body of a woman is found, and Viljar receives a second e-mail with another verdict from this self-proclaimed judge, jury, and executioner. Viljar joins forces with Investigator Lotte Skeisvoll, who quickly realizes that the murderer is playing a deadly game with them. The clues are all pointing in the same direction, and the murders are strangely familiar...

The Robots' Rebellion – The Story of Spiritual Renaissance David Icke, 1999-08-26 David Icke's strongest book to date, *The Robots' Rebellion* reveals the alarming extent to which people of all nations are programmed by the ideas fed to them by those in power. We live in a world which is increasingly dominated by technology but, according to Icke, it is we who are

the robots. Fearlessly, he tears down the veils of hypocrisy, built up for generations by the corrupt forces of Church, State, science and commerce – and reveals the true pathos of the human condition beneath. He points, too, to the frightening influence wielded throughout the planet by a merciless and manipulative network of secret societies. The existence of long-established links between Earth-bound humanity and beings from other dimensions and planets in the Universe has been suppressed for years, says Icke, by the world's power-broking hierarchy. When ordinary people learn the real role they have to play within a rich and varied cosmic society, rebellion against those who have kept this extraordinary truth from them will, he predicts, be inevitable. The author is no stranger to controversy. Formerly best-known as a TV sports commentator and leading spokesman for the British Green Party, he is gaining increasing authority as a tireless campaigner for truth. His widely-publicised spiritual transformation has given him the courage to speak out fearlessly against lies and deceit. Hidebound politicians, bankers, economists, educationalists, scientists and the leaders of the world's established religions are not going to welcome Icke's challenging book. But it is not intended for those who wield and abuse power. This book is for the world's unwilling robots who, says Icke, in an upbeat conclusion, have it within themselves to rise up – and take control of their own exciting destiny.

Game Theory for the Social Sciences Herve Moulin, 1986-10-01 The second edition of Herve Moulin's highly successful book outlines the fundamental concepts of game theory—one of the most provocative and fruitful applications of mathematics to the human sciences—and demonstrates its uses in economic and political discourse. Thoroughly revised, and now published with an accompanying workbook of 89 exercises, this rigorous yet accessible text explains the uses of game theory in largely nontechnical terms. Moulin carefully discusses the behavioral scenarios underlying the various equilibrium concepts. He provides a self-contained exposition of basic equilibrium concepts for strategic games: perfect (sophisticated) equilibrium, Nash's noncooperative example, Aumann's strong and correlated example, and several versions of the core. The author is concerned less with mathematical refinements than with helping the reader understand the strategic stories backing these concepts. His examples therefore give a fair account of the current game models used in economics, politics, and sociology. Addressed here are oligopoly theory, the provision of public goods, auctions, voting procedures, and cost allocation problems, as well as the classic prisoner's dilemma, tic-tac-toe, and Marienbad games. Extremely popular in its original French edition and in its first English version, Moulin's excellent introductory text is now, more than ever, the book to

answer the essential questions about the application of game theory to the social sciences.

Behavioral Operational Research Martin Kunc,Jonathan Malpass,Leroy White,2016-06-29 Behavioral research is making a significant impact on many academic disciplines. Its status as the source of some of the most profound research in the social sciences is unparalleled. Therefore, it is not surprising that interest in Behavior and Operational Research (OR) is burgeoning, even though understanding the relationship between knowledge, behavior and action has been an academic preoccupation in OR since the beginning of the discipline. This book introduces the idea of Behavioral OR, where the theoretical and empirical developments in the behavioral field are making an impression on OR academics and practitioners alike. The book provides a much needed overview that connects together theory, methodology and practice and offers the "state of the art" on Behavioral Operational Research theory and practice. The book not only includes chapters by leading academics, but also includes rich and insightful real-life case studies by practitioners.

Conduction of Heat in Solids Horatio Scott Carslaw,J. C. Jaeger,1971

From Bulletin Boards to Electronic Universities Morten Flate Paulsen,1992 This monograph presents a collection of separate papers that focuses on pioneering projects in computer-mediated communication (CMC) and distance education. The first section of the monograph contains two papers describing the author's experiences with CMC projects that formed the foundation for his further CMC work: NKI Electronic College, a distance education program using computer conferencing at NKI College in Oslo (Norway); and Teaching Across the Atlantic, a computer-conference-based course conducted by experts from both sides of the Atlantic. In the second section, two papers--Innovative Computer-Conferencing Courses and Computer-Mediated Communication and Distance Education around the World, An Annotated Bibliography--provide 16 examples of the CMC projects in 12 countries the author has encountered through literature reviews and personal communications. Three articles that compile experiences, conclusions, and predictions for the future based on the author's perceptions and theories are presented in the final section: GO MEEC, which describes a goal-oriented method for establishment of an electronic college; The Electronic University, which predicts the development of future electronic universities; and The Hexagon of Cooperative Freedom, which proposes a distance education theory attuned to CMC. Most of the papers include references; a total of 79 references are contained overall. (KRN)

When It Grows Dark Jorn Lier Horst,2018-02-27 A letter from the dead could solve Wisting's coldest case. Stavern 1983: Christmas is approaching and an ambitious young policeman named William Wisting has just become the father of twins. Edged off a robbery investigation by more experienced officers, he is soon on a less prestigious case. In a dilapidated barn stands a forgotten, bullet-riddled car. How long has it been there and what happened to the driver? This is the case that shaped William Wisting as a policeman, with a resolution thirty-three years in the future ...

Color Mikiyo Tsuda,2009-07-07 When art student Takashiro Tsuda chose to

show his painting Color in a gallery exhibition, he never dreamed that an uncannily similar painting would hang next to his--with the same title, even. Works of art come from the deepest depths of an artist's soul, so how can anyone else be expressing themselves so much like Takashiro? Filled with a yearning to find his artistic soulmate, Takashiro goes off to art school in Tokyo and meets classmate Sakae Fujiwara. Soon, Takashiro learns that this is the artist he's been searching for--the one who created a Color so much like his won--but Sakae is a guy! Can such a profound connection between two people transcend gender and become something more?
