Symptom Sorter Keith Hopcroft,2007 Life would be much simpler for GPs if patients presented with diagnoses. Unfortunately, they do not: they present with symptoms which are frequently vague, sometimes multiple and often obscure. Most clinical texts adopt a diagnosis rather than a symptom based approach. Symptom Sorter redressed the balance and quickly became a key book in primary care. This new edition is fully updated and expanded, and still offers the same concise and practical guidance. New topics include - anal itching, anal swelling, crying babies, eyelid problems, facial rashes and leg ulcers. It presents differentials, distinguishing features, possible investigations and key points, with tips and warnings, for over 100 symptoms commonly seen in primary care. All general practitioners, especially GP trainers, GP registrars, young principals, nurse practitioners and A&E nurses will find this book an invaluable ready reference.

The LEGO Architect Tom Alphin,2015-09-01 Travel through the history of architecture in The LEGO Architect. You'll learn about styles like Art Deco, Modernism, and High-Tech, and find inspiration in galleries of LEGO models. Then take your turn building 12 models in a variety of styles. Snap together some bricks and learn architecture the fun way!

Introduction to Parallel Processing Behrooz Parhami,1999-01-31 This original text provides comprehensive coverage of parallel algorithms and architectures, beginning with fundamental concepts and continuing through architectural variations and aspects of implementation. Unlike the authors of similar texts, Professor Parhami reviews the circuit model and problemdriven parallel machines, variants of mesh architectures, and composite and hierarchical systems, among other subjects. With its balanced treatment of theory and practical designs, classtested lecture material and problems, and helpful case studies, the book is suited to graduate and upperlevel undergraduate students of advanced architecture or parallel processing.

Manufacturing Simulation with Plant Simulation and Simtalk Steffen Bangsow,2010-03-29 Based on the competition of international production networks, the pressure to - crease the efficiency of production systems has increased significantly. In ad- tion, the number of technical components in many products and as a consequence also the requirements for corresponding assembly processes and logistics pr- esses increases. International logistics networks require corresponding logistics concepts. These requirements can be managed only by using appropriate Digital Factory tools in the context of a product lifecycle management environment, which allows reusing data, supports an effective cooperation between different departments, and provides up-to-date and relevant data to every user who needs it. Simulating the complete material flow including all relevant production, st- age, and transport activities is recognized as a key component of the Digital F- tory in the industry and as of today widely used and accepted. Cutting inventory and throughput time by 20–60% and enhancing the productivity of existing p- duction facilities by 15–20% can be achieved in real-life projects.

Foundations of Data Organization and Algorithms David B. Lomet,1993-09-29 This volume presents the proceedings of the Fourth International Conference on Data Organization and Algorithms, FODO '93, held in Evanston, Illinois. FODO '93 reflects the maturing

of the database field which hasbeen driven by the enormous growth in the range of applications for databasesystems. The non-standard applications of the not-so-distant past, such ashypertext, multimedia, and scientific and engineering databases, now provide some of the central motivation for the advances in hardware technology and data organizations and algorithms. The volume contains 3 invited talks, 22 contributed papers, and 2 panel papers. The contributed papers are grouped into parts on multimedia, access methods, text processing, query processing, industrial applications, physical storage, andnew directions.

Memorial Articles for 20th Century American Accounting Leaders Stephen A. Zeff,2016-03-31 This collection of memorial articles and selected obituaries highlights the careers and contributions to accounting practice, the accounting profession, and the accounting literature of leading American figures in the 20th century. The memorial articles do much more than recite their subject's career. More importantly, they discuss and assess their subject's role in influencing the course of accounting practice and the profession as well as the evolution of their influential writings, revealing the names of the accounting leaders and leading thinkers of the past century. Memorial Articles for 20th Century American Accounting Leaders is useful in providing students and young researchers with a rich source of intelligence on the leaders who have established norms of practice, advanced the profession, and set the terms of

debate in the literature – leaders who are cited and even quoted but who are known mostly as names without a full-bodied treatment of their backgrounds and broader roles in shaping the accounting literature.

Applications of Fuzzy Sets Theory Francesco Masulli,Sushmita Mitra,Gabriella Pasi,2007-08-24 The 7th International Workshop on Fuzzy Logic and Applications, held in Camogli, Italy in July 2007, presented the latest findings in the field. This volume features the refereed proceedings from that meeting. It includes 84 full papers as well as three keynote speeches. The papers are organized into topical sections covering fuzzy set theory, fuzzy information access and retrieval, fuzzy machine learning, and fuzzy architectures and systems.
