Building Interactive Dashboards in Microsoft 365 Excel Michael Olafusi,2024-02-29 Unleash the full potential of Microsoft Excel's latest version and elevate your data-driven prowess with this comprehensive resource

Key Features Create robust and automated dashboards in Excel for M365 Apply data visualization principles and employ dynamic charts and tables to create constantly updated and informative dashboards for your organization Uncover the best practices for effective dashboard creation Purchase of the print or Kindle book includes a free PDF eBook

Book DescriptionM365 Excel is a modern Excel version that is constantly updated with features that make creating and automating analyses, reports, and dashboards very easy compared with older Excel versions. This book will help you leverage its full capabilities, beginning with a quick overview of what dashboards are and how they are different from other types of reports. Then, you'll familiarize yourself with the different standard dashboards currently available and what they are meant to accomplish for organizations. As you

progress, you'll get to grips with the use of new powerful tools such as Power Query and dynamic array formulae in the automation of analysis, gaining insights into the right approach to take in building effective dashboards. You'll equip yourself with not only all the essential formulae, charts, and non-chart visuals but also learn how to set up your dashboard perfectly. Along the way, you'll build a couple of awesome dashboards from scratch to utilize your newfound knowledge. By the end of this book, you will be able to carry out an impressive and robust level of analysis on business data that may come from multiple sources or files, using better processes, formulae, and best practices in M365 to create insightful dashboards faster.

What you will learn

- Understand the importance of dashboards in today's business analytics environment
- Delve into the various essential formulae in Excel
- Utilize Power Query to shape and transform data to extract insights easily
- Explore the power of the new dynamic array functions in M365
- Employ PivotTable and Power Pivot to automate your dashboards
- Master the setup and optimization of your dashboard canvas
- Discover best practices for visualization, charts, and effective dashboard creation
- Consolidate your knowledge through a hands-on concluding project

Who

this book is for This book is for Microsoft Excel users, especially those tasked with creating dynamic reports and dashboards that require data and help support to decision-makers within an organization with visually engaging and actionable insights. Financial analysts, data analysts, business analysts, and BI professionals will also greatly benefit from this book. Some familiarity with the Microsoft Excel interface is a prerequisite.

Studies on the Teaching of Asian Languages in the 21st Century Hüseyin Öçen, Seniye

Vural, 2014-03-26 In recent years, there has been an increasing demand for, and rapid development in, the learning and teaching of Asian languages as a foreign language throughout the world. Many governments recognize that Asian languages are of strategic economic importance, and thus they are now offered as a foreign language by a great number of schools and higher education institutions. This book contains chapters written by different authors from several countries on key issues and problems in the teaching of the Chinese, Russian, Farsi, Japanese and Malaysian languages, and some comparative studies. The contributors here explore future directions in the teaching of Asian languages

in the 21st century. The ten chapters of the book have been prepared by the authors using the scholarly papers they presented at the Second International Symposium on Asian Languages and Literatures (ADES), which was held on 3–4 May 2012 at Erciyes University, Kayseri, Turkey, under the title of “Teaching of Asian Languages in the 21st Century”.

A. Cook's Perspective Clarissa F. Dillon, Deborah J. Peterson, 2023-09-28 A fascinating insight into 18th-century cook Ann Cook's vitriolic lambasting of a bestselling cookbook "The Art of Cookery" by Hannah Glasse. Ann Cook was an 18th-century cook and cookbook author. Her cookbook was printed in three editions and contained more than just receipts. For some reason, she had a real problem with Hannah Glasse's cookbook, The Art of Cookery: Made Plain and Easy, which had been republished many times during the 18th century and would have been the first port of call for a puzzled cook or housekeeper. Cook's book included vitriolic comments about a number of Glasse's recipes. Historic cooks Clarissa F. Dillon and Deborah J. Peterson use their skills to investigate whether Cook's

remarks were valid. They prepared a number of recipes, both from Glasse and from Cook, and commented on the results. Although a number of people have written about these two women, their emphasis was on the comments, not on the validity of the criticisms. This approach makes this book unique.

Regression Modeling Strategies Frank E. Harrell , Jr., 2015-08-14 This highly anticipated second edition features new chapters and sections, 225 new references, and comprehensive R software. In keeping with the previous edition, this book is about the art and science of data analysis and predictive modelling, which entails choosing and using multiple tools. Instead of presenting isolated techniques, this text emphasises problem solving strategies that address the many issues arising when developing multi-variable models using real data and not standard textbook examples. **Regression Modelling Strategies** presents full-scale case studies of non-trivial data-sets instead of over-simplified illustrations

of each method. These case studies use freely available R functions that make the multiple imputation, model building, validation and interpretation tasks described in the book relatively easy to do. Most of the methods in this text apply to all regression models, but special emphasis is given to multiple regression using generalised least squares for longitudinal data, the binary logistic model, models for ordinal responses, parametric survival regression models and the Cox semi parametric survival model. A new emphasis is given to the robust analysis of continuous dependent variables using ordinal regression. As in the first edition, this text is intended for Masters' or PhD. level graduate students who have had a general introductory probability and statistics course and who are well versed in ordinary multiple regression and intermediate algebra. The book will also serve as a reference for data analysts and statistical methodologists, as it contains an up-to-date survey and bibliography of modern statistical modelling techniques.

Exploring Microsoft Access for Windows 95, Version 7.0 Robert T. Grauer, Maryann M.

Windows 95 operating system. Problem sets have been expanded to review and extend the information, with four levels of end-of-chapter exercises. This work explores Access 7.0

Don't Fear the Spreadsheet Tyler Nash,Bill Jelen,Kevin Jones,Tom Urtis,2012 Written in a question-and-answer format, this lowest-level beginner book covers the extreme basics of using spreadsheets in Excel. Instead of delving into advanced topics that scare most Excel novices away, the guide starts at a much more basic level, quickly providing a passable knowledge of the program and allowing users to overcome their fears and frustrations. It answers hundreds of common questions, including Can I delete data from a spreadsheet without changing the formatting? How can I merge two cells, columns, or rows? How do I use text-wrapping? How do I create custom functions? and What is a Macro and how do I go about creating it? Intended for the roughly 40 percent of Excel users who have never even entered a formula, this book will demystify the problems and confusion that prevent them from using the program to its potential.
