CATastrophe! Ann Marie Stephens,2021-08-10 Nine kittens go on an exciting boating adventure that's a (funny) CATastrophe in this playful picture book that demonstrates the key math concept of patterns. A crew of hungry kittens and their captain head to the lake to catch some dinner, but the fish have surprises in store for them. Physics is at work too. What happens when confused kitties paddle every which way? Or when they all lean in the same direction? A pattern is needed to avoid a catastrophe! Patterns are the foundation on which math is built. Using strong rhythm, clever wordplay, and countable characters, CATastrophe! is a fun read-aloud that also shows what patterns can do. Helpful backmatter will deepen readers' understanding and challenge them to find more patterns in this book and in our world.

My First Book of Patterns Bobby George,June George,2017-09-18 Have you learned your colors and shapes? Now it's time to learn patterns! Stripes, polka dots, plaid, chevron, and more are featured in this first-ever patterns concept book that provides readers with the vocabulary to name what they see in the world around them. The ten most prevalent patterns are presented first as a single element (This is a circle ...), then as a pattern (... a lot of circles make polka dots!). Conceived by educators and illustrated in vivid candy-colored hues, this pitch-perfect introduction to patterns will engage the artistic, mathematical, and linguistic parts of every young child's mind.

Pattern Bugs Trudy Harris,2011-08-01 Patterns are found in math, reading, science, music, art, dance, and poetry-and in the world all around us. They are also found in this delightful book written by educator Trudy Harris. Children will love the humor and predictability of this story, and teachers and parents alike will appreciate the pattern hunt that will send kids back into the book looking for more patterns again and again.

The Seven Basic Plots Christopher Booker,2005-11-11 This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

The Willow Pattern Story Alan Drummond,2022-08-23 A picture is worth a thousand words! Allan Drummond's classic picture book reveals the intriguing story that hides deep within one of the most distinctive and

iconic china patterns ever created—the willow pattern. Fascinated by the images in the famous beautiful blue-and-white china, Drummond creates his own variation on an old story about the china taking us on a journey through the world depicted in the design—a memorable tale of passion, betrayal and transcendent love. Beautiful young Koong Shee wishes only to be with her true love Chang. But her father has other plans and locks his daughter in the garden. Clever Koong Shee and Chang use birds to communicate until they manage to escape. But her bitter father is determined to stop them. An IRA-CBC Children's Choice. NCSS-CBC Notable Children's Trade Book in the Field of Social Studies. American Bookseller Pick of the Lists. “Sumptuous.”—Junior Education “Beautifully produced and printed in wonderful shades of azure blue, this would make a perfect gift for any lover of blue and white china.”—Infusion This ingenious [tale] . . . may inspire readers to watch for hidden stories in everyday objects.—Publishers Weekly
