Linda Underwood

Storm Damage Linda Underwood,2012-08 When Joann Avery's best friend of thirty years, Amy, calls her in a panic to meet for dinner, Joann agrees immediately. Amy is in the middle of a business acquisition near Chesapeake Bay. She must acquire an historic estate known as The Cedars, but with negotiations at a standstill, Amy needs an ally. She asks Joann for assistance and, knowing the area and the people, Joann agrees. Soon, however, a hurricane strikes the historic Northern Neck of Virginia near the Chesapeake Bay. A dead body is found in the area, but authorities can't tell whether the man died from natural causes or murder. It appears the hurricane and a hungry flock of vultures have contributed to the scene, but there's more to this death than meets the eye. It's got something to do with Amy's business dealings, and Joann is right in the middle of the scandal. Due to a case of mistaken identity, Joann is in danger of being jailed or possibly killed. The police consider her a material witness, since she recently inquired about the grounds where the dead body was found. Now, the murderer is on her case, too. With the help of her husband, her friends, and an unusual plan, Joann might make it out of this alive ... and catch a violent killer in the process.

Racing the Storm Hillary Potter, University of Colorado Boulder,2007-08-02 *Racing the Storm* addresses how racial stratification continues to be a factor in U.S. society and was exposed by Hurricane Katrina. The continuing significance of race is examined by considering public opinion, media representations, and government and volunteer response before, during, and after the storm.

Chemtrails, HAARP, and the Full Spectrum Dominance of Planet Earth Elana Freeland,2014-05-26 We are entering a Space Age, but not the kind President Kennedy originally envisioned. This Space Age is replacing resource wars and redefines planet earth as a battlespace in accordance with the military doctrine of Full-Spectrum Dominance. This book examines how chemtrails and ionospheric heaters like the High-frequency Active Auroral Research Project (HAARP) in Alaska services a full-spectrum dominance. This Revolution in Military Affairs needs an atmospheric medium to assure wireless access to the bodies and brains of anyone on Earth—from heat-seeking missiles to a form of mind control. How sinister are these technologies? Are we being prepared for a global village lockdown? The recent release of NSA records have reminded Americans that eyes in the sky are tracking us as supercomputers record the phone calls, e-mails, internet posts, and even the brain frequencies of millions. Elana M. Freeland's startling book sifts through the confusion surrounding chemtrails-versus-contrails and how extreme weather is being geo-engineered to enrich disaster capitalists and intimidate nations. A deconstruction of Bernard J. Eastlund's HAARP patent points to other covert agendas, such as a global Smart Grid infrastructure that enables access to every body and brain on Earth, a Transhumanist future that erases lines between human and machine, and Nanobiological hybrids armed with microprocessors that infest and harm human bodies.

Then Came the Fire Stephen J. Lofgren,2011-09 Full color illustrations throughout. Two days after the September 11, 2001 attack, the U.S. Army Center of Military History began an extensive project to document the historic event through oral history interviews. Published on the incident's tenth anniversary, *Then Came the Fire* is an anthology of excerpts from those interviews. This collection highlights the personal accounts of participants who witnessed some aspect of the events in the Pentagon that day: the survivors, some of whom were injured; policemen; firefighters; medical personnel; observers; others involved in the rescue and recovery efforts; and building occupants.

Fireburst Don Pendleton,2012-07-01 RAINING HELLFIRE A deadly series of lightning strikes confounds experts and pits Mack Bolan against a new kind of terror that comes out of the sky. The death toll spreads as a plane loaded with innocent victims is blown apart, an office building ignites, killing hundreds, and refinery and munitions factories burst into fireballs. Whoever's responsible leaves no fingerprint. And the strikes continue—unpredictable, undetectable and unstoppable. Posing as the front man of a rival terrorist organization claiming responsibility for the attacks, Bolan lures the enemy—Iraq's Republican Guard—out of the shadows. And by coaxing them to put this latest lethal incendiary weapon on the black-market auction block, traitorous old friends and reformed enemies converge...right into the center of Bolan's crosshairs.

Let the Hurricane Roar Rose Wilder Lane,1933 After getting married and settling at Wild Plum Creek, Charles's and Molly's lives are turned upside down when disaster strikes and David must go east to find work for the winter.

Storms of Tyranny C. J. Clark,2019-02-12 U.S. Marine Horace Meyers faces a world in which the U.S. Constitution no longer exists. The SCOTUS serves at the will of the Supreme Commander, and members of Congress accept lavish gifts to keep the status quo. Without constitutional rights, the United States is a faded memory... The nation is now divided into four quadrants, but the Sapro's dynasty thirsts for complete control. Political intrigue, moral decay, and growing persecution of anyone opposing Sapro's edicts push the population even further away from fundamental rights. Horace is forced to walk a tightrope between the growing evil and protecting the integrity of his Marines and U.S. citizens as he tries to find a way to bring the tyrant down without endangering millions. The stakes are high in this futuristic thriller!

The Bridesmaid and the Hurricane Kelly Maher,2017-07-04 A one-weekend stand over a year ago, and now they're coworkers... Being a woman in TV is hard enough, but when the boss is trying to derail Radhika O'Leary's career from behind the scenes, she has to make sure every aspect of her work—and her life—stands up to scrutiny. Of course, the double standard is alive and well and Malcolm Jones, the broadcast meteorologist known as "Colm" to his friends and "The Hurricane Hottie" to his fangirls, knows that fame can hurt just as much as it helps. When Colm moves to DC, he's excited to work with Radhika—her professional reputation is sparkling, and so are the kisses they shared that one weekend over a year ago when he was in town covering a blizzard. But when Radhika is paired up with Colm for a project, all she sees is a looming storm over her carefully constructed career. Sparks still fly between the two journalists, and if they're not careful, lightning might strike and alter the course of their lives forever.

Artifice Simon Chesterman,2023-03-01 A novel about the uncertainty and anxiety faced by humanity regarding Artificial Intelligence ARTIFICE is set in a near-future Singapore and takes on the challenge of what truly

sentient AI might mean for humanity. It's speculative fiction in the mould of Ishiguro's Klara and the Sun or Le Tellier's The Anomaly. This novel would strike a chord given ongoing uncertainty and anxiety about the role of AI. Humanity's greatest invention could be our last. Archie's involvement in the artificial intelligence project known as Janus was limited to routine diagnostics. But when she discovers that she and everyone else has been deceived by their creation, it launches her on a journey that will change her life – and humanity's future.

The Tangierman's Lament Earl Swift,2014-12-19 Go where the story is--that's one tenet of journalism Earl Swift has had little trouble living up to. In two decades of covering the commonwealth, Swift has hiked, canoed--even spelunked--a singular path through Virginia. He has also stopped and listened. This collection brings together some twenty Virginia tales wherein hardship is revealed as tragedy, and humor appears as uncanny, illuminating strangeness. The Pulitzer-nominated title story takes us to the Chesapeake island of Tangier, home to a Methodist enclave over two hundred years old, with an economy almost wholly dependent on the blue crab. The gradual exodus of the island's young people and the dwindling crab hauls point to an inevitable extinction that finds a dramatic metaphor in the erosion of the island itself, which is literally disappearing beneath its inhabitants' feet. An epic piece of reporting, When the Rain Came revisits the August night in 1969 when Hurricane Camille descended on Nelson and Rockbridge counties, bringing with it a deluge of nearly Biblical proportions that killed 151 people. It was later characterized by the Department of the Interior as one of the all-time meteorological anomalies in the United States. Swift looks beyond the extraordinary numbers to find the individual stories, told to him by the people who still remember the trembling floorboards and rain too heavy to see, or even breathe, through. Other stories include a nerve-wracking inside look at the Pentagon on the morning of 9/11, the travails of a failed novelist turned folk-art demigod, an account of a 1929 Scott County tornado (deemed the deadliest in Virginia history), and a profile of Nelson County swami Master Charles, who boasts a corps of meditative followers, a mountain retreat in Nellysford, and an incomplete resume. Each piece reconfirms Virginia as a land uncommonly rich in stories--and Earl Swift as one of its most perceptive and tireless chroniclers.

Rising Above the Gathering Storm Institute of Medicine,National Academy of Engineering,National Academy of Sciences,Committee on Science, Engineering, and Public Policy,Committee on Prospering in the Global Economy of the 21st Century: An Agenda for American Science and Technology,2007-03-08 In a world where advanced knowledge is widespread and low-cost labor is readily available, U.S. advantages in the marketplace and in science and technology have begun to erode. A comprehensive and coordinated federal effort is urgently needed to bolster U.S. competitiveness and pre-eminence in these areas. This congressionally requested report by a pre-eminent committee makes four recommendations along with 20 implementation actions that federal policy-makers should take to create high-quality jobs and focus new science and technology efforts on meeting the nation's needs, especially in the area of clean, affordable energy: 1) Increase America's talent pool by vastly improving K-12 mathematics and science education; 2) Sustain and strengthen the nation's commitment to long-term basic research; 3) Develop, recruit, and retain top students, scientists, and engineers from both the U.S. and abroad; and 4) Ensure that the United States is the premier place in the world for innovation. Some actions will involve changing existing laws, while others will require financial support that would come from reallocating existing budgets or increasing them. Rising Above the Gathering Storm will be of great interest to federal and state government agencies, educators and schools, public decision makers, research sponsors, regulatory analysts, and scholars.

The Pentagon's New Map Thomas P.M. Barnett,2005-05-03 Since the end of the Cold War, America's national security establishment has been searching for a new operating theory to explain how this seemingly chaotic world actually works. Gone is the clash of blocs, but replaced by what? Thomas Barnett has the answers. A senior military analyst with the U.S. Naval War College, he has given a constant stream of briefings over the past few years, and particularly since 9/11, to the highest of high-level civilian and military policymakers-and now he gives it to you. The Pentagon's New Map is a cutting-edge approach to globalization that combines security, economic, political, and cultural factors to do no less than predict and explain the nature of war and peace in the twenty-first century. Building on the works of Friedman, Huntington, and Fukuyama, and then taking a leap beyond, Barnett crystallizes recent American military history and strategy, sets the parameters for where our forces will likely be headed in the future, outlines the unique role that America can and will play in establishing international stability-and provides much-needed hope at a crucial yet uncertain time in world history. For anyone seeking to understand the Iraqs, Afghanistans, and Liberias of the present and future, the intimate new links between foreign policy and national security, and the operational realities of the world as it exists today, The Pentagon's New Map is a template, a Rosetta stone. Agree with it, disagree with it, argue with it-there is no book more essential for 2004 and beyond.
