The Prop Builder's Molding & Casting Handbook Thurston James,1989-11-15 The Prop Builder's Molding & Casting Handbook

&break;&break;This is the first book to contain, in one comprehensive volume, every molding and casting procedure of use to the theater props builder (no matter what his or her level or proficiency). The author demonstrates the techniques involved in using more than thirty different materials ranging from papier-mache to breakaway glass. &break;&break;While the use of some materials—plaster and polyester resins, for example—is covered to some extent in other publications, information on the selection and use of rubber materials (latex, neoprene, silicone, and the urethanes) and the procedure for making breakaway windows and bottles is available only in The Prop Builder's Molding & Casting Handbook. &break;&break;Written in an easy, conversational style, the book will be useful to anyone involved with theater properties, puppetry, and costuming (as professionals or amateurs). It will also serve admirably the needs of students taking classes in those subjects. &break;&break;Completing the book is a special section on designing and building a vacuum forming machine suitable for use in constructing theater props. More than 450 photographs illustrate the step-by-step procedures explained throughout the entire text.

Papertoy Monsters Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

A Tale for the Time Being Ruth Ozeki,2013-03-12 A brilliant, unforgettable novel from bestselling author Ruth Ozeki, author of The Book of Form and Emptiness Finalist for the Booker Prize and the National Book Critics Circle Award “A time being is someone who lives in time, and that means you, and me, and every one of us who is, or was, or ever will be.” In Tokyo, sixteen-year-old Nao has decided there's only one escape from her aching loneliness and her classmates' bullying. But before she ends it all, Nao first plans to document the life of her great grandmother, a Buddhist nun who's lived more than a century. A diary is Nao's only solace—and will touch lives in ways she can scarcely imagine. Across the Pacific, we meet Ruth, a novelist living on a remote island who discovers a collection of artifacts washed ashore in a Hello Kitty lunchbox—possibly debris from the devastating 2011 tsunami. As the mystery of its contents unfolds, Ruth is pulled into the past, into Nao's drama and her unknown fate, and forward into her own future. Full of Ozeki's signature humor and deeply engaged with the relationship between writer and reader, past and present, fact and fiction, quantum physics, history, and myth, A Tale for the Time Being is a brilliantly inventive, beguiling story of our shared humanity and the search for home.

Textiles for Advanced Applications Bipin Kumar, Suman Thakur, 2017-09-20 This book presents a global view of the development and applications of technical textiles with the description of materials, structures, properties, characterizations, functions and relevant production technologies, case studies, challenges, and opportunities. Technical textile is a transformative research area, dealing with the creation and studies of new generations of textiles that hoist many new scientific and technological challenges that have never

been encountered before. The book emphasizes more on the principles of textile science and technology to provide solutions to several engineering problems. All chapter topics are exclusive and selectively chosen and designed, and they are extensively explored by different authors having specific knowledge in each area.

Frank Lloyd Wright Paper Models ,2017-08-01 Frank Lloyd Wright Paper Models features step-by-step instructions and templates so you can create beautiful kirigami versions of Frank Lloyd Wright's iconic modernist architecture. Frank Lloyd Wright (1867–1959) is the most renowned and popular architect and designer in America. His buildings, including Fallingwater and New York's Guggenheim Museum, are iconic landmarks. Now you can create 14 of his best-loved buildings using the art of kirigami. Frank Lloyd Wright building kirigami templates included are: • Unity Temple • Frederick C. Robie House • Imperial Hotel • Aline Barnsdall Hollyhock House • Millard House (La Miniatura) • John Storer House • Freeman House • Charles Ennis House • National Life Insurance Building • Taliesin West • Herbert And Katherine Jacobs I House • Edgar J. Kaufmann House Fallingwater • Johnson Wax Administration Building • Solomon R. Guggenheim Museum Perfect for those that enjoy origami, each project features a short history of each house, step-by-step instructions and a template that you remove from the book. You follow the lines on the template, cutting and folding to make your own model. All you need is a scalpel, a cutting mat and a ruler. Clear cutting tips help you with the tricky stages, while photos of the finished model show you the final design. To make things easier, the most intricate parts of the templates have been pre-cut. Simply display your finished model and admire your handiwork. Frank Lloyd Wright Paper Models is a must for Wright fans and architectural model enthusiasts. Kirigami is the elegant Japanese art of folding and cutting paper to create intricate models. It's also the perfect medium for recreating the harmonious architecture of Frank Lloyd Wright. Digital Fabrications Lisa Iwamoto,2013-07-02 Digital Fabrications, the second volume in our new Architecture Briefs series, celebrates the design ingenuity made possible by digital fabrication techniques. Author Lisa Iwamoto explores the methods architects use to calibrate digital designs with physical forms. The book is organized according to five types of digital fabrication techniques: tessellating, sectioning, folding, contouring, and forming. Projects are shown both in their finished forms and in working drawings, templates, and prototypes, allowing the reader to watch the process of each fantastic construction unfold. Digital Fabrications presents projects designed and built by emerging practices that pioneer techniques and experiment with fabrication processes on a small scale with a do-it-yourself attitude. Featured architects include AEDS/Ammar Eloueini, Atelier Manferdini, Brennan Buck, MOS, Office dA, Florencia Pita/MOD, Mafoomby, URBAN A+O, SYSTEMarchitects, Andrew Kudless/Matsys, IwamotoScott, Atelier Hitoshi Abe, Chris Bosse, Tom Wiscombe/EMERGENT, Thom Faulders Architecture, Jeremy Ficca, SPAN, GNUFORM, Heather Roberge, PATTERNS, Ruy Klein, and servo.

Winners Danielle Steel, 2013-10-29 NEW YORK TIMES BESTSELLER Even the most perfect lives can be shattered in an instant. In this moving, emotionally charged novel, Danielle Steel introduces readers to an unforgettable cast of characters striving to overcome tragedy and discover the inner resources and resilience to win at life—once again. WINNERS Lily Thomas is an aspiring ski champion training for the Olympics, a young woman with her heart set on winning the gold. But in one moment, Lily's future is changed forever, her hopes for the Olympics swept away in a tragic accident. Dr. Jessie Matthews, the neurosurgeon who operates on her that night, endures a tragedy of her own, and instantly becomes the sole support of her four young children, while her own future hangs in the balance. Bill, Lily's father, has pinned all his hopes on his only daughter, his dreams now shattered. Other lives will entwine themselves with theirs: Joe, a financial manager, faces a ruined career at the hand of a dishonest partner. Carole, a psychologist at Mass General, is a breast cancer survivor, her body and heart scarred by what she's been through. Teddy, with a spinal cord injury worse than Lily's, dreams of college and becoming an artist. From the ashes of their lives, six people fight to alter the course of destiny and refuse to be defeated. When Bill builds a remarkable rehab facility for his daughter, countless lives are forever altered, and each becomes a winner. Winners is about refusing to be beaten, no matter how insurmountable the challenge. And when Lily gets on skis again and enters the Paralympics, the battle to brave life again is won. Winners is about more than surviving, it is about courage, victory, and triumph. When all appears to be lost, the battle has just begun. BONUS: This edition includes an excerpt from Danielle Steel's Pegasus. Praise for Winners "Steel skillfully weaves the strands of the Matthews and Thomas families together in a layered story. . . . Together, they discover friendship, loyalty, and new dreams."—Publishers Weekly "[Winners] will leave readers crying and cheering."—Booklist

Kinetic Garment Construction Rickard Lindqvist, 2015-03-27 Fashion designers are presented with a range of methods and concepts for pattern cutting are presented, the main body of these methods, both traditional and contemporary, is predominately based on a theoretical approximation of the body that is derived from horizontal and vertical measurements of the body in an upright position: the tailoring matrix. As a consequence, there is a lack of interactive and dynamic qualities in methods connected to this paradigm of garment construction, from both expressional and functional perspectives. This work proposes and explores an alternative paradigm for pattern cutting that includes a new theoretical approximation of the body as well as a more kinetic method for garment construction that, unlike the prevalent theory and its related methods, takes as its point of origin the interaction between the anisotropic fabric and the biomechanical structure of the body. As such, the research conducted here is basic research, aiming to identify fundamental principles for garment construction. Based on some key principles found in the works of Geneviève Sevin-Doering and in pre-tailoring methods for constructing garments, the proposed theory for – and method of – garment construction was developed through concrete experiments by cutting and draping fabrics on live models. Instead of a static matrix of a non-moving body, the result is a kinetic construction theory of the body that is comprised of balance directions and key biomechanical points, along with an alternative draping method for dressmaking. This methodology challenges the fundamental relationship between dress, garment construction, and the

body, working from the body outward, as opposed to the methods that are based on the prevalent paradigm of the tailoring matrix, which work from the outside toward the body. This alternative theory for understanding the body and the proposed method of working allows for diverse expressions and enhanced functional possibilities in dress.

Humanoid Robotics: A Reference Prahlad Vadakkepat, AMBARISH GOSWAMI, 2017-02-14 Humanoid Robotics provides a comprehensive compilation of developments in the conceptualization, design and development of humanoid robots and related technologies. Human beings have built the environment they occupy (living spaces, instruments and vehicles) to suit two-legged systems. Building systems, especially in robotics, that are compatible with the well-established, human-based surroundings and which could naturally interact with humans is an ultimate goal for all researches and engineers. Humanoid Robots are systems (i.e. robots) which mimic human behavior. Humanoids provide a platform to study the construction of systems that behave and interact like humans. A broad range of applications ranging from daily housework to complex medical surgery, deep ocean exploration, and other potentially dangerous tasks are possible using humanoids. In addition, the study of humanoid robotics provides a platform to understand the mechanisms and offers a physical visual of how humans interact, think, and react with the surroundings and how such behaviors could be reassembled and reconstructed. Currently, the most challenging issue with bipedal humanoids is to make them balance on two legs, The purportedly simple act of finding the best balance that enables easy walking, jumping and running requires some of the most sophisticated development of robotic systems- those that will ultimately mimic fully the diversity and dexterity of human beings. Other typical human-like interactions such as complex thought and conversations on the other hand, also pose barriers for the development of humanoids because we are yet to understand fully the way in which we humans interact with our environment and consequently to replicate this in humanoids.

Fashion Communication in the Digital Age Nadzeya Kalbaska, Teresa Sádaba, Francesca Cominelli, Lorenzo Cantoni, 2019-06-03 This book represents a major milestone in the endeavour to understand how communication is impacting on the fashion industry and on

societal fashion-related practices and values in the digital age. It presents the proceedings of FACTUM 19, the first in a series of fashion communication conferences that highlights important theoretical and empirical work in the field. Beyond documenting the latest scientific insights, the book is intended to foster the sharing of methodological approaches, expand the dialogue between communications' studies and fashion-related disciplines, help establish an international and interdisciplinary network of scholars, and offer encouragement and fresh ideas to junior researchers. It is of high value to academics and students in the fields of fashion communication, fashion marketing, visual studies in fashion, digital transformation of the fashion industry, and the cultural heritage dimension of fashion. In addition, it is a key resource for professionals seeking sound research on fashion communication and marketing.
