Baking With Kafka Tom Gauld, 2021-05-04 In his inimitable style, British cartoonist Tom Gauld has opened comics to a crossover audience and challenged perceptions of what the medium can be. Noted as a "book-lover's cartoonist," Gauld's weekly strips in The Guardian, Britain's most well-regarded newspaper, stitch together the worlds of literary criticism and pop culture to create brilliantly executed, concise comics. Simultaneously silly and serious, Gauld adds an undeniable lightness to traditionally highbrow themes. From sarcastic panels about the health hazards of being a best-selling writer to a list of magical items for fantasy writers (such as the Amulet of Attraction, which summons mainstream acceptance, Hollywood money, and fresh coffee), Gauld's cartoons are timely and droll—his trademark British humour, impeccable timing, and distinctive visual style sets him apart from the rest. Lauded both for his frequent contributions to New Scientist, The Guardian and The New York Times, and his Eisner-nominated graphic novels, Tom

Gauld is one of the most celebrated cartoonists working today. In *Baking with Kafka*, he proves this with one witty, sly, ridiculous comic after another.

How to Recognise and Support Mathematical Mastery in Young Children's Play Di Chilvers, 2021-07-12 This book explains how young children develop mathematically in their earliest years and shows the support and teaching needed by adults to accelerate their progress and attainment, helping them master mathematical concepts and skills. The practical guidance has been carefully developed over a number of years and is based on research undertaken with primary schools in Sheffield as part of the 'Talk for Maths Mastery' initiative. It recognises that children's mathematical development is embedded within child-led play and connected to deeper levels of thinking and wider dispositions for learning. Maths is happening everywhere at any moment; we just need to keep an open mind, open eyes, and listen. Including case studies, links to practice and reflective questions, the chapters reveal what mastery orientation looks like from the children's perspective in their learning and covers: children's serve and return conversational talk mathematical babies and their developmental momentum schematic patterns of thinking mathematical mark-making child-led play problem solving creative and critical thinking how adults can support children's mathematical talk, thinking and mastery This book will help all early years practitioners and teachers working with children throughout the EYFS and KS1 build their understanding, knowledge, experience and confidence of engaging in early mathematics.

Creator Culture Stuart Cunningham,David

Craig,2021-06-22 Explores new perspectives on social media entertainment There is a new class of cultural producers—YouTube vloggers, Twitch gameplayers, Instagram influencers, TikTokers, Chinese wanghong, and others—who are part of a rapidly emerging and highly disruptive industry of monetized “user-generated” content. As this new wave of native social media entrepreneurs emerge, so do new formations of culture and the ways they are studied. In this volume, contributors draw on scholarship in media and communication studies, science and technology studies, and social media, Internet, and

platform studies, in order to define this new field of study and the emergence of creator culture. Creator Culture introduces readers to new paradigms of social media entertainment from critical perspectives, demonstrating both relations to and differentiations from the well-established media forms and institutions traditionally within the scope of media studies. This volume does not seek to impose a uniform perspective; rather, the goal is to stimulate in-depth, globally-focused engagement with this burgeoning industry and establish a dynamic research agenda for scholars, teachers, and students, as well as creators and professionals across the media, communication, creative, and social media industries. Contributors include: Jean Burgess, Zoë Glatt, Sarah Banet-Weiser, Brent Luvaas, Carlos A. Scolari, Damián Fraticelli, José M. Tomasena, Junyi Lv, Hector Postigo, Brooke Erin Duffy, Megan Sawey, Jarrod Walzcer, Sangeet Kumar, Sriram Mohan, Aswin Punathambekar, Mohamed El Marzouki, Elaine Jing Zhao, Arturo Arriagada, Jeremy Shtern, Stephanie Hill
