Waste Composting for Urban and Peri-urban Agriculture Pay Drechsel, Dagmar Kunze, 2001 Rapid urbanization has created a major challenge with regard to waste management and environmental protection. However, the problem can be ameliorated by turning organic waste into compost for use as an agricultural fertilizer in peri-urban areas. This is especially significant in less developed countries, where food security is also a key issue. This book addresses these subjects and is based on papers presented at a workshop held in Ghana by the International Board for Soil Research and Management (IBSRAM, now part of the International Water Management Institute) and FAO. Special reference is given to Sub-Saharan Africa, with acknowledgement to experiences from other parts of the world. Contributing authors are from several European, as well as African, countries.

**Legal and Institutional Aspects of Urban and Peri-urban Forestry and Greening** Lidija Knuth, 2005 Overall, urban and peri-urban forestry and greening (UPFG) receives little interest on political agendas despite its importance to society in terms of the social, economic, aesthetic and environmental benefits. This is even more problematic in developing countries and countries with economies in transition. This publication explores the legal and institutional issues related to UPFG on a global level, using case studies to illustrate the varied nature of its application and concluding that further efforts are required to improve existing legal frameworks

**Peri-Implant Complications** Anastasia Kelekis-Cholakis, Reem Atout, Nader Hamdan, Ioannis Tsourounakis, 2018-07-30 This book is an up-to-date reference that provides detailed guidance on how to diagnose and manage the soft and hard tissue complications that may be associated with a functioning dental implant placement, such as peri-implant mucositis, soft tissue loss, and peri-implantitis. Treatment options for each complication are described and illustrated step by step and carefully selected cases are presented to further explain the individual stages in management and to highlight key learning points. Practical advice is offered on all aspects of diagnosis, and information is also presented on the definition and etiology of the various complications. The book is in an easy-to-read format and includes a review of the latest literature on the topic.

The Red Peri Stanley G. Weinbaum, 2018-03-16 This is a classic science fiction novella by Stanley G. Weinbaum that was originally published in *Astounding Stories* in 1935. This is the only of Weinbaum's stories to be set on the planet Pluto, written only five years after the planet's discovery. The tale starts with a spaceship called Aardkin that gets boarded by the notorious pirate ship the Red Peri. One year on Frank Keene and astrophysicist Solomon Nestor crash land on Pluto and find themselves captives of the Red Peri herself, the nineteen year-old daughter of the man who built the Red Peri. During their ordeal the secret of the reason behind her forays into piracy are revealed. This work is part of our Vintage Sci-Fi Classics Series, a series in which we are republishing some of the best stories in the genre by some of its most acclaimed authors, such as Isaac Asimov, Marion Zimmer Bradley, and Robert Sheckley. Each publication is complete with a short introduction to the history of science fiction.

**Peri-Urban China** Li Tian, Yan Guo, 2019-04-02 The urban-rural relationship in China is key to a sustainable global future. This book is particularly interested in peri-urbanization in China, the process by which fringe areas of cities develop. Recent institutional change has helped clarify property rights over collective land, facilitating peri-urban area development. Chapters in this book explore how rural industrialization has changed the landscape and rules about land use in peri-urban areas. It looks at the role of rural industrialization and provides a detailed exploration of peri-urbanization theory, policy, and its evolution in China. Leading discussions find out how fragmented bottom-up industrialization, urbanization, and lax governance have led to a series of social and environmental problems. The progress in redevelopment of peri-urban areas was initially slow due to the spatial lock-in effect. This book offers practical solutions to environmental issues and explains how policymakers have the potential to redevelop a future collaborative, inclusive, and sustainable approach to peri-urban areas. This in-depth approach to urbanization will be useful to academics in urban planning and governmental organizations. It will also be advantageous to NGOs and professionals involved in urban planning, public administration, as well as land-use work in China and other developing countries.

**Peri-Urban Dynamics** Ankit Sikarwar, Aparajita Chattopadhyay, 2023-04-14 Urban expansion beyond the city's administrative boundaries has altered villages to a great extent. These peri-urban villages are experiencing unforeseen changes in demographic, economic, land-use, and environmental characteristics. The concept of peri-urbanization is grabbing the attention of urban planners and policymakers globally. To understand the dynamics of the peri-urban region it is crucial to examine multiple rural and urban characteristics. This book studies major changes in population, land and development with the integration of remotely sensed data and census data for 615 peri-urban villages surrounding Ahmedabad city of India. The chapters of the book are designed to cover key aspects of peri-urban change with geospatial methods. This book offers a comprehensive understanding and importance of analyzing peri-urban dynamics at the smallest spatial unit. It provides a detailed conceptual and methodological framework for the students and researchers to study peri-urbanization as well as for the policymakers to redefine the urban policies.

**Peri-Implant Therapy for the Dental Hygienist** Susan S. Wingrove, 2022-03-31 Practical guidance for dental hygienists on how to maintain dental implants in daily practice The newly revised Second Edition of *Peri-Implant Therapy for the Dental Hygienist* provides a comprehensive guide to biofilm-focused assessment, maintenance, and home care for the prevention of long-term implant complications. The book offers clinical protocols ranging from single titanium and ceramic implant-borne restorations to the fixed full arch final prosthesis. The text also discusses pre-surgical regenerative procedures, implant placement, and patient communication to support hygienists and other dental professionals in talking to patients about implant dentistry. The book is a valuable clinically oriented resource guide for dental professionals seeing patients with titanium and ceramic dental implants. This new edition introduces readers to new information on ceramic implant instrumentation and 'Mastering the Arch', as well as detailed information on how to remove, assess, and provide maintenance for full arch prostheses patients. A new companion website provides dental instructor materials, review questions and answers, lesson plans, videos, PowerPoint slides, skills evaluations, and learning objectives. The book includes: Useful clinical photographs, illustrations, and patient cases to demonstrate the concepts discussed throughout the book Researched protocols for assessment, professional in-office maintenance, and biofilm-focused patient home care to meet all the peri-implant therapy challenges Updated classification, guidelines, and treatments for peri-implant disease Technology and resources for prevention of peri-implantitis and complications that can be prevented with early detection and patient awareness Ideal for dental hygienists and dental hygiene and dental students, *Peri-Implant Therapy for the*

Dental Hygienist is also an essential reference for any dental professional seeking a one-stop resource for maintaining dental implants and managing their complications.

**Peri-urban Land Transactions** Ignasio Malizani Jimu, 2012 This book explores the changing land relations in the peri-urban villages of Blantyre in Malawi. It questions and debates how and why the peri-urban villages have become the locus of the selling and buying of customary land, the practices and also the relations involved. The book provides rich ethnographic insights on the commodification of land relations, custom, practices, disputes and social relations between land sellers, land buyers, traditional leaders, and intermediaries. The transactions draw strength from the growing peri-urbanization and monetization of social relations, both of which push towards land decisions at family and individual levels. Bigger groups like the village, clan or extended family have minimal, if not symbolic role only. Village headmen benefit materially by taking gifts (signing fee) rationalized by custom on reciprocity, while estate agents claim commission. Numerous constraints are negotiated about the ownership, rights to sale, multiple selling and the use and sharing of land money. Peri-urban land transactions offer scope for examining a wider range of social and economic relations, and the subtle ways in which the state infiltrates the everyday lives of actors. Overtime, the practices reproduce but also transform land relations in significant but less appreciated ways.

**Peri Implantitis and Its Management** Dr. Sudhanshu Agrawal , 2021-11-25 The use of dental implants has revolutionized the treatment of partially and fully edentulous patients today. Implants have become a treatment approach for managing a broad range of clinical dilemmas due to their high level of predictability and success. However, certain risk factors might predispose individuals to lower success rates and to a greater hazard for implant failure with an increasing number of implants being placed, peri-implantitis is becoming a prevalent and notable disease, affecting 2.7% to 47.1% of implants.

**Water Security, Conflict and Cooperation in Peri-Urban South Asia** Vishal Narain, Dik Roth, 2021-12-09 This open access book explores the implications of urbanization in South Asia for water (in-) security in the peri-urban spaces of Dhaka and Khulna in Bangladesh, Bengaluru, Gurugram, Hyderabad, Kolkata and Pune in India, and Kathmandu Valley in Nepal. The book looks into specifically peri-urban water security issues in a context of rapid urbanization and social-environmental changes, including the changing climate and its emerging impacts. It demonstrates how urbanization processes change water flows between rural and urban areas, the implications of this processes for the water security of peri-urban populations, and how new institutions and technologies develop to mediate the relationships between peri-urban communities and water. The book seeks to further the debate on peri-urban water security, including what constitutes the peri-urban, socially differentiated access to water in peri-urban spaces, interventions for improving water access, and emerging forms of cooperation and conflict related to water access in a context of urbanization and climate change. As such, this book is an interesting read for academics with various disciplinary backgrounds, professionals working in the worlds of national and international policy, NGOs, activist groups, research and development institutes, and individual readers interested in water security and urbanization.

**Conflict and Change in Australia's Peri-Urban Landscapes** Melissa Kennedy, Andrew Butt, Marco Amati, 2016-03-22 In an era of rapid urbanization, peri-urban areas are emerging as the fastest-growing regions in many countries. Generally considered as the space extending one hundred kilometres from the city fringe, peri-urban areas are contested and subject to a wide range of uses such as residential development, productive farming, water catchments, forestry, mineral and stone extraction and tourism and recreation. Whilst the peri-urban space is valued for offering a unique ambiance and lifestyle, it is often highly vulnerable to bushfire and loss of biodiversity and vegetation along with threats to farming and food security in highly productive areas. Drawing together leading researchers and practitioners, this volume provides an interdisciplinary contribution to our knowledge and understanding of how peri-urban areas are being shaped in Australia through a focus on four overarching themes: Peri-urban Conceptualizations; Governance and Planning; Land Use and Food Production; and Solutions and Representations. Whilst the case studies focus on Australia, they advance a variety of tools useful in discerning processes and impacts of peri-urban change globally. Furthermore, the findings are instructive of the issues and tensions commonly encountered in rapidly urbanizing peri-urban areas throughout the world, from landscape valuation and biosecurity concerns to functional adaptation and social change.

**Risk Factors for Peri-implant Diseases** Yorimasa Ogata, 2020-04-01 In this book, leading experts from around the world present the latest knowledge on the risk factors for peri-implant diseases and also examine the prevalence, etiology, and treatment strategy. Reports have suggested that a variety of risk factors, including poor oral hygiene, a history of periodontitis, diabetes, smoking, lack of keratinized mucosa, and implant surface topography, are associated with these diseases. Periodontally compromised patients who do not adhere completely to the supportive periodontal therapy have been found to present a higher implant failure rate, and several studies have shown that periodontal pathogens can translocate from periodontally involved teeth to the peri-implant sulci in partially dentate patients, highlighting the importance of periodontal treatment of the residual dentition prior to placement of dental implants. Recently a new concept was proposed as intraindividual variation exists in core microbiota in peri-implantitis and periodontitis. In elucidating the strength of association of peri-implant diseases with all of the risk factors identified to date, the book will be of interest to practitioners and other professionals in the field.

**Peri-Urban Developments and Processes in Africa with Special Reference to Zimbabwe** Innocent Chirisa, Elias Mazhindu, Elmond Bandaiko, 2016-05-23 This book focuses on peri-urban development processes in Africa, with special emphasis on Zimbabwe. The debates included highlight a number of issues in the peri-urban context, such as access to water, appropriate technologies and land management, political economy in the peri-urban space, peri-urban agriculture, and place marketing in peri-urban development, among others. The debates raised by the authors in this book revolve around locating the peri-urban space within the context of sustainability, in which key issues are addressed. The book essentially examines peri-urban development processes from various angles in an effort to understand how peri-urban areas develop, function, and how their residents survive. Peri-urban dwellers currently face numerous challenges, including land tenure insecurity, poor infrastructure and services, land use conflicts, stringent planning law and land use planning regulations. This work seeks to address the "knowledge gap" on peri-urban development processes in Africa, and is also intended to inform urban policy practice in the African Cities and beyond. Offering policy makers valuable insights on the peri-urban space, it provides guidance for decision-making in the contexts of service delivery, land management, housing, new town development and place marketing, among others.

*The Peri-Urban Interface* Duncan McGregor, David Simon, 2012-04-27 Peri-urban interfaces - the zones where urban and rural areas meet - suffer from the greatest problems to humans caused by rapid urbanization, including intense pressures on resources, slum formation, lack of adequate services such as water and sanitation, poor planning and degradation of farmland. These areas, home to hundreds of millions of people, face unique problems and need distinctive and innovative approaches and solutions. This book, authored by top researchers and practitioners, covers the full breadth and depth of the impacts of rapid urbanization on livelihoods, poverty and resources in the peri-urban zones in diverse African, Asian, Latin American and Caribbean contexts. Topics include peri-urban resource sustainability, ecosystems and societies and environmental changes in peri-urban zones. Rich case studies cover production systems and livelihoods including the impacts of irrigated vegetable production, horticulture, dairy enterprises, waste-fed fisheries and pastoral livelihoods. Also addressed are planning and development issues in the peri-urban interface including the difficulty in achieving sustainability, conflict and cooperation over resources, and a fresh look at the relationship between people and their environment. The final part of the book presents policies and strategies for promoting and measuring sustainability in peri-urban zones including community-based waste management, the co-management of watersheds and empowerment of the poor. This book is the most comprehensive examination of the challenges and solutions facing the people and environments of peri-urban zones and is essential reading for all practitioners, students and academics in geography and development.

**Peri-Implant Soft-Tissue Integration and Management** Mario Rocuzzo, Anton Sculean, 2021-04-19 Popular demand for dental implants as a reliable long-term option to replace missing teeth has risen dramatically. However, situations remain that pose challenges to practitioners and the treatment process. Written by renowned clinicians and supported by cases contributed by expert practitioners, the present volume of the ITI Treatment Guide series highlights the integration and management of peri-implant soft tissues. It discusses soft-tissue management before and during implant placement and during supportive peri-implant therapy and addresses the techniques and materials used for peri-implant soft-tissue augmentation and replacement and for the treatment of peri-implant soft-tissue dehiscences. Volume 12 of the ITI Treatment Guides series offers clinicians a comprehensive overview of various evidence-based techniques and treatment approaches for use in daily practice, with a focus on current techniques and materials.

*Peri-urban Water and Sanitation Services* Mathew Kurian, Patricia McCarney, 2010-08-17 More than 2.6 billion people in the developing world lack access to safe water and sanitation service. The Millennium Development Goal's (MDG) target is to halve the number of people without access to a sustainable source of water supply and connection to a sewer network by 2015. That target is unlikely to be met. If there is anything that can be learnt from European experience it is that institutional reform occurs incrementally when politically enfranchised urban populations perceive a threat to their material well-being due to contamination of water sources.

*Coping Mechanisms for Climate Change in Peri-Urban Areas* S. Manasi, K. V. Raju, 2019-05-24 This book discusses the dynamics and resource management qualities of the peri-urban interface to address climate change consequences, focusing on the peri-urban region of the global city of Bengaluru. In 5 chapters, the authors document the unique challenges experienced in peri-urban areas, including soil-water vegetation dynamics, local and regional impacts on water bodies (surface and groundwater), food production issues, and the inhibited adaptive capacity of local communities. The book also provides knowledge on implementations of environmental management by local institutions, government interventions that have acted as catalysts in promoting community based adaptation strategies, and the physical, social and economic aspects of rural-urban dynamics. The book not only adds to the scarce existing literature on peri-urban contexts, but also addresses the role of culture in protecting ecological landscapes and how traditions play an important role in coping with climate change. Furthermore, the authors expand on these climate change coping mechanisms in peri-urban areas, taking into account local cultural factors and interesting governance interventions in the context of health. The book will be of interest to planners, policy makers, and students and researchers engaged in rural-urban dynamics and climate change adaptation.

*Peri-Urban Areas and Food-Energy-Water Nexus* Angela Colucci, Marcello Magoni, Scira Menoni, 2016-08-10 This book explores the nexus among food, energy and water in peri-urban areas, demonstrating how relevant this nexus is for environmental sustainability. In particular it examines the effective management of the nexus in the face of the risks and trade-offs of mitigation policies, and as a mean to create resilience to climate change. The book delineates strategies and actions necessary to develop and protect our natural resources and improve the functionality of the nexus, such as: integrated management of the major resources that characterize the metabolism of a city, stronger coordination among stakeholders who often weight differently the services that are relevant to their individual concerns, integration of efforts towards environmental protection, adaptation to and prevention of climate change and disaster risks mitigation.

**Urban and peri-urban agriculture case studies – Overview, conclusions and recommendations** Erwin, D., 2022-06-02 The population of the world is steadily growing. Most of this population growth is concentrated in cities and urban areas, which means, 68 percent of the world's 9.7 billion inhabitants will be urban dwellers by 2050. However, many of those currently living in cities especially, though not exclusively, in the Global South, are malnourished, impoverished and food insecure. Urban and peri-urban agriculture (UPA) is a vital strategy for building the resilience of cities' food supply, reducing poverty and increasing employment, improving nutritional outcomes, and mitigating environmental degradation of urban spaces. While UPA is no silver bullet, when combined with effective city-region planning, the food system can more efficiently meet the needs of diverse actors in urban areas. To provide additional insights into how UPA is managed as input for the "Urban and peri-urban agriculture: from production to food systems", Rikolto conducted a series of case studies in six cities around the world, which are Quito (the Republic of Ecuador), Leuven (the Kingdom of Belgium), Dakar (the Republic of Senegal), Arusha (the United Republic of Tanzania), Surakarta (the Republic of Indonesia) and Tegucigalpa (the Republic of Honduras). This report first gives detailed accounts of each city and its UPA policies, challenges and practices. These are grouped according to the themes of land (availability, tenure); water (irrigation, access); labour (seasonal versus full-time, worker profile); finance (expenses, revenues, access to credit); agronomy (UPA practices, technical assistance) and value chain (commercialization, availability of inputs, consumer profiles). While policy mechanisms and support interventions are included among these themes, a policy overview presents the final theme of governance. These city accounts are followed by a comparative overview of all six cities and culminate in generalizable lessons-learned, interesting findings, and actionable recommendations for planners and policy-makers.

In a world consumed by displays and the ceaseless chatter of quick interaction, the melodic beauty and mental symphony produced by the prepared term usually diminish into the background, eclipsed by the persistent sound and distractions that permeate our lives. Nevertheless, nestled within the pages of Peri a charming fictional prize filled with organic thoughts, lies an immersive symphony waiting to be embraced. Crafted by a masterful composer of language, that fascinating masterpiece conducts visitors on a psychological journey, well unraveling the hidden songs and profound impact resonating within each cautiously constructed phrase. Within the depths of this poignant evaluation, we will investigate the book is key harmonies, analyze its enthralling writing fashion, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
