*Environmental Education in Indonesia* Lyn Parker,Kelsie Prabawa-Sear,2019-08-08 Indonesia's wealth of natural resources is being exploited at breakneck speed, and environmental awareness and knowledge among the populace is limited. This book examines how young people learn about the environment to see how education can help to develop environmental awareness and avert vast environmental destruction, not only in Indonesia, but also in the Global South more generally. Based on in-depth studies conducted in the cities of Yogyakarta and Surabaya, complemented with surveys of students in secondary schools, *Environmental Education in Indonesia* examines educational curricula, pedagogy and green activities to reveal what is currently being done in schools to educate children about the environment. The book investigates the shortcomings in environment education, including underqualified teachers, the civil service mentality, the still-pervasive chalk-and-talk pedagogy and the effect of the examination system. It also analyses the role of local government in supporting (or not) environmental education, and the contribution of environmental NGOs. The book establishes that young people are not currently being exposed to effective environmental education, and the authors propose that the best and most culturally appropriate way forward in Indonesia is to frame pro-environment behaviour and responsibility as a form of citizenship, and specifically that environmental education should be taught as a separate subject. This book will be of great interest to students and scholars of contemporary Indonesia and Southeast Asia, education for sustainability and environmental education, as well as sustainability and sustainable development more generally. **Indonesia** Asian Development Bank,2016-04-01 The Country Water Assessment (CWA) evaluates the balance between reliable and available water supplies and future demands for sustainable economic development in Indonesia. Articulated around the water,food, and energy nexus, the CWA explores technical, institutional, and policy options to improve planning, management, and development of water resources. The 2015-2019 midterm government development policy guides the priorities covered under the CWA. This assessment intends to provide a platform for dialogue to advance water reforms across Indonesia, focusing on Java, Sumatera, and Sulawesi---the country's three main economic regions.

*Apartheid's Contras* William Minter,1994 It also outlines a new kind of Third World warfare - neither classic guerrilla warfare nor straightforward external aggression; instead, one comprising elements of civil war, but dominated by the initiatives of external powers.

**The Artful Mind** Mark Turner,2006-10-26 All normal human beings alive in the last fifty thousand years appear to have possessed, in Mark Turner's phrase, irrepressibly artful minds. Cognitively modern minds produced a staggering list of behavioral singularities--science, religion, mathematics, language, advanced tool use, decorative dress, dance, culture, art--that seems to indicate a mysterious and unexplained discontinuity between us and all other living things. This brute fact gives rise to some tantalizing questions: How did the artful mind emerge? What are the basic mental operations that make art possible for us now, and how do they operate? These are the questions that occupy the distinguished contributors to this volume, which emerged from a year-long Getty-funded research project hosted by the Center for Advanced Study in the Behavioral Sciences at Stanford. These scholars bring to bear a range of disciplinary and cross-disciplinary perspectives on the relationship between art (broadly conceived), the mind, and the brain. Together they hope to provide directions for a new field of research that can play a significant role in answering the great riddle of human singularity.

Masterplanning for Change Ombretta Romice,Sergio Porta,Alessandra Feliciotti,2020-07-03 Cities are under increased pressure to be resilient and resistant to the effects of climate change and rapid urbanisation. However, this idea has still not been fully integrated in to practice. This book presents a practical approach to masterplanning the city and its areas (existing and new) as urban environments for the 21st century, addressing the design of cities as complex adaptive systems.

**How to Think Like a CEO** D. A. Benton,1999-08-04 Drawing on in-depth interviews with hundreds of the nation's top

executives, D. A. Benton explains the 22 vital traits that make a CEO - the leader responsible for making decisions, guiding teams, selling ideas, managing crises, and conquering the mountains before them. You'll penetrate the mystery of why some people make it to the top and some don't, when they're all equally good at their jobs. You'll learn how to avoid getting fired and how to get promoted more quickly, how to enjoy the quality of life you want and deserve, and - if you decide you want to be the Big Boss - how to have the right character traits to get there. These are some of the traits that make a CEO. Are you ready to make them yours? You're gutsy and a little wild - yet modest and in control. You're competitive and tenacious - yet flexible and generous. You're willing to admit mistakes - yet unapologetic. You're secure in yourself - yet constantly improving. You're original and straightforward - yet think before you talk. Make your ascent not only gratifying, but also exhilarating and fun. This is how chiefs run the show - and how you can act like a chief to become a chief, even sooner than you dreamed.

**Translation From Theory to Practice** Laurentia Sumarni,2020-02-28 The book which was written and compiled from many sources was aimed to provide theoretical foundations to students who want to learn the arts and skills of translating. Since translation is both science and skills, understanding of the theories is beneficial before embarking on the translation project. This book, which was also drawn from the writer's personal research, also provides overview of relevant theories that translation students or translators need to justify their decision making.

Dictionary of Translation Studies Mark Shuttleworth,2014-04-08 Published at a time of unprecedented growth of interest in translation, the Dictionary of Translation Studies aims to present the insights of a number of different approaches to translation in an unbiased, non-partisan way. With more than 300 articles, this essential volume provides the reader with a snapshot of a rapidly developing discipline, based on work produced in serveral languages. With a clear, easy-to-follow layout, the Dictionary provides a comprehensive and highly accessible survey of key terms and concepts (such as Abusive Translation, Equivalence, Informationsangebot, Minimax Principle, Texteme and Thick Translation), types of activity (Autotranslation, Dubbing, Signed Language Interpreting), and schools and approaches (Leipzig School, Manipulation School, Nitra School). Each term is presented within the context in which it first occurred and is given a definition which is both clear and informative. Major entries include a discussion of relevant viewpoints as well as comments on how the usage and application of the term have developed subsequent to its coining. In addition, all entries provide suggestions for further reading, and there is an extensive bibliography included at the end. This is an indispensable tool for anyone studying or teaching translation at university level.

*Translation* Basil Hatim,Jeremy Munday,2004 Provides support for advanced study of translation. Examines the theory and practice of translation from many angles, drawing on a wide range of languages and exploring a variety of sources. Concludes with readings from key figures.

**Beyond Voluntarism** ,2002 Content.  
**The Moral Un-Neutrality of Science** C. P. Snow,2011-06-01  
**Samael's Fall** Marion Webb-De Sisto,2005-11 A stirring account of how and why the first and most radiant archangel fell from grace and became the Devil. This is a story of angels and demons, love and hate, goodness and evil. An angelic tale of long, long ago that predates Creation and even the beginning of time. Religion has taught us that the archangels and angels are extremely wise and have faultless purity. However, this is not the author's controversial portrayal of them. These heavenly beings possess a child-like quality, they make mistakes and use poor judgment. Several also display a whole range of emotions and motivations, from being supremely good to unrighteously evil. Could it be their initial frailty was the opening gambit for the duality of the human race? This book is the first of The Angelic Chronicles trilogy. It is a blending of fantasy with esoteric teachings.
