**Coastal Disasters and Climate Change in Vietnam** Nguyen Danh Thao,Hiroshi Takagi,Miguel Esteban,2014-06-04 Coastal Disasters and Climate Change in Vietnam is the first book to focus specifically on natural hazards and climate change in Vietnam. The book examines threats such as tropical cyclones, sea-level rise, flooding, erosion, and salinity intrusion, and their respective effects on coastal structures and environments. It also looks at crucial management and mitigation efforts, including breakwater design, irrigation systems, coastal dunes and dikes, and more. The challenges faced by this country in the future will have important regional and global repercussions; areas such as the Mekong Delta produce a significant proportion of the world's rice, and coastal impacts on this region will have far-reaching economic and public health effects. This book is an important source of information for government and local policy makers, environmental and climate scientists, and engineers. Broad coverage of climate challenges specific to the region, including sea-level rise, storms, erosion, and more Assessments of impact on, and effects of, economic development and port construction Examination of public policy responses to climate change

**Human Ecology of Climate Change Hazards in Vietnam** An Thinh Nguyen,Luc Hens,2018-08-13 This book analyzes climate change associated effects in the mountainous and coastal environments of Vietnam. The scope of the book allows international comparisons to be made between these two affected areas and other similarly affected locations under constant environmental pressure. Frequent and intense climate change hazards are described, along with a wider context of integrated interpretations, socioeconomic implications and policy responses. The book reports on original research combining methodologies from the natural sciences with approaches in human sciences, providing an interdisciplinary human ecological context to analyze similar situations worldwide. The book is structured in four parts. The first part offers background information, and details the human ecological framework. The geography of the analyzed regions is discussed to reflect the environmental and socioeconomic context of Vietnam's coasts and mountains. The second part addresses the coast of Central Vietnam. The effects of tropical storms, floods, rising sea levels and coastal erosion in Ky Anh are studied to highlight the impacts on the local population and its development perspectives. The third part focuses on the uplands of Northern Vietnam. The effects of cyclones, heavy rains, floods, flash floods, and landslides in the Van Chan Mountains are studied to compare the biophysical and socioeconomic impacts. Part four makes policy recommendations in building resilient landscapes and green cities, and discusses the potential implications of findings for practice in Vietnam. The book addresses a wide array of researchers, geography and economics students, consultants and decision makers interested in the actual status and the likely developments on the physical, socioeconomic and mitigation and adaptation attitudes and policies of climate change associated effects.

*The Approaching Storm: Conflict in Asia, 1945-1965* Edward J. Marolda,2015-05-01 America's participation in the Vietnam conflict dates to the waning days of World War II, when certain victory over Japan prompted the Allies and Asian peoples of many ideological persuasions to change the political landscape. France, Great Britain, the Netherlands, and other European countries planned to reestablish control over their colonies in China, India, and Southeast Asia. Anticolonial resistance movements, in many cases led by Communists, prepared for military and political action to seize control of Korea, China, and Indochina. This book focuses on events in the region between 1945 and 1965 and the growing U.S. concern over Communist inroads into the region. From the Chinese civil war to the French-Indochina war and the rise of Ho Chi Minh, this book describes U.S. response to the Communist movements in Asia and how the U.S. Navy's role evolved from an advisory one to actual combat after the Tonkin Gulf attack of August 1964.

*Storms over the Mekong* William Pace Head,2020-04-30 From the defeat of the Army of the Republic of Vietnam at Ap Bac to the battles of the Ia Drang Valley, Khe Sanh, and more, Storms over the Mekong offers a reassessment of key turning points in the Vietnam War. Award-winning historian William P. Head not only reexamines these pivotal battles but also provides a new interpretation on the course of the war in Southeast Asia. In considering Operation Rolling Thunder, for example—which Head dubs as “too much rolling and not enough thunder”—readers will grasp the full scope of the campaign, from specifically targeted bridges in North Vietnam to the challenges of measuring success or failure, the domestic political situation, and how over time, Head argues, “slowly, but surely, Rolling Thunder dug itself into a hole.” Likewise, Head shows how the battles for Saigon and Hue during the Tet Offensive of 1968 were tactical defeats for the Communist forces with as many as 40,000 killed and no real gains. At the same time, however, Tet made it clear to many in Washington that victory in Vietnam would require a still greater commitment of men and resources, far more than the American people were willing to invest. Storms over the Mekong is a blow-by-blow account of the key military events, to be sure. But beyond that, it is also a measured reconsideration of the battles and moments that Americans thought they already knew, adding up to a new history of the Vietnam War.

Vietnamese Colonial Republican Peter Zinoman,2013-11-16 This volume is a comprehensive study of Vietnam's greatest and most controversial 20th century writer who died tragically in 1939 at the age of 28. Vu Trong Phung is known for a remarkable collection of politically provocative novels and sensational works of non-fiction reportage that were banned by the communist state from 1960 to 1986. Leading Vietnam scholar, Zinoman, resurrects the life and work of an important intellectual and author in order to reveal a neglected political project that is excluded from conventional accounts of modern Vietnamese political history. He sees Vu Trong Phung as a leading proponent of a localized republican tradition that opposed colonialism, communism, and unfettered capitalism—and that led both to the banning of his work and to the durability of his popular appeal in Vietnam today.

**Disaster Recovery Planning for Communications and Critical Infrastructure** Leo Anthony Wrobel,Sharon M. Wrobel,2009 Addressing the vulnerabilities in today's critical infrastructure to natural disasters and terrorism, this practical book describes what public safety and other officials need to do to protect should be doing to pipelines, power plants, telecommunications, and other essential services before the unthinkable happens. The book explains how to maintain command and control in any disaster, and how to predict the probability of those disasters. Written by two highly regarded experts in the field, this one-of-a-kind guidebook shows how to simplify risk assessments and emergency response procedures to disasters affecting our critical national and local infrastructure.

**The Lotus and the Storm** Lan Cao,2015-04-28 A lyrical novel of love and betrayal in the aftermath of the fall of Saigon—from the author of Monkey Bridge A singular work of witness, inspiration, and courage, The Lotus and the Storm marks the welcome return of Lan Cao's pitch-perfect

voice, telling the story only she can tell. Four decades after the war, Vietnam’s flavors of clove and cinnamon have been re-created by a close-knit refugee community in a Virginia suburb. But the lives of Minh and Mai, father and daughter, are haunted by ghosts, secrets, and the loss of their country. During the disastrous last days in Saigon, in a whirl of military signals and helicopter evacuations, Mai never had a chance to say goodbye to so many people who meant so much to her. What happened to them? How will Mai cope with the trauma of war—and will the thay phap, a Vietnamese spirit exorcist, be able to heal her?

**The Great Hurricane, 1938** Cherie Burns,2007-12-01 “Before there was the Perfect Storm, there was the Great Hurricane of 1938. A riveting and wonderfully written account.” —Nathaniel Philbrick On the night of September 21, 1938, news on the radio was full of the invasion of Czechoslovakia. There was no mention of any severe weather. By the time oceanfront residents noticed an ominous color in the sky, it was too late to escape. In an age before warning systems and the ubiquity of television, this unprecedented storm caught the Northeast off guard, obliterated coastal communities on Long Island and in New England, and killed nearly seven hundred people. The Great Hurricane, 1938 is a spellbinding hour-by-hour reconstruction of one of the most destructive and powerful storms ever to hit the United States. With riveting detail, Burns weaves together countless personal stories of loved ones lost and lives changed forever—from those of the Moore family, washed to sea on a raft formerly their attic floor, to Katharine Hepburn, holed up in her Connecticut mansion, watching her car take to the air like a bit of paper. “A very good book.” —The Washington Post

**Winds of Hope, Storms of Discord** Salim Yaqub,2022-11-03 In brisk and engaging prose, this comprehensive introductory textbook traverses the broad sweep of US history since 1945. Winds of Hope, Storms of Discord explores how Americans from all walks of life – political leaders, businesspeople, public intellectuals, workers, students, activists, migrants, and others – struggled to define the nation's political, economic, geopolitical, demographic, and social character. It chronicles the nation's ceaseless ferment, from the rocky conversion to peacetime in the early aftermath of World War II; to the frightening emergence of the Cold War and repeated US military adventures abroad; to the struggles of African Americans and other minorities to claim a share of the American Dream; to the striking transformations in social attitudes catalyzed by the women's movement and struggles for gay and lesbian liberation; to the dynamic force of political, economic, and social conservatism. Carrying the story to the spring of 2022, Winds of Hope also shows how dizzying technological changes at times threatened to upend the nation's civic and political life.

*Floods and Farmers* Cong Huu Pham,2012 The Mekong Delta of Vietnam is extremely vulnerable to floods and, therefore, the establishment of dike systems is generally considered an appropriate approach to flood control. Based on intensive field work in the heart of the Delta, this dissertation investigates current dike planning practices, as well as its implementation at district and commune levels. The research reveals numerous shortcomings with regard to planning and shows that the dike system also produces adverse negative impacts on the ecosystems and livelihoods. Dissertation.
