The Reinvention of Distinction Van Nguyen-Marshall, Lisa B. Welch Drummond, Danièle Bélanger, 2011-11-17 This pioneering collection brings together an international group of scholars to explore the Vietnamese middle class. From the leisure pursuits of the colonial middle class to the impact of the new urban rich on landscape of the countryside, this interdisciplinary volume explores the ways in which middle classness has been practiced in a wide range of contexts throughout the 20th century and into the 21st. In addition to offering insights into how middle classness was and is constituted and negotiated, this collection illuminates the cultural and social conditions of two distinctive periods in Vietnamese history. Three historical chapters consider how middle class status was experienced and displayed under French colonialism and in 1960s republican. These chapters offer examinations of middle classness through recreation, consumption, and associational life. Six contemporary studies examine the modes of experimentation and practice within middle class urban Vietnam. Still a sensitive topic politically, the contemporary middle class, nascent but increasingly powerful, is exerting a strong impact on the shape of contemporary society and culture, as well as on urban and rural landscapes. This volume offers a series of studies which critically interrogate the practices of those who engage in or aspire to urban middle-class lifestyles in Vietnam both in the past and in the present.

TYPIX Standardized Data and Crystal Chemical Characterization of Inorganic Structure Types Erwin Parthé,Louise Gelato,Bernard Chabot,Marinella Penzo,Karin Cenzual,Roman Gladyshevskii,2013-11-11 TYPIX is a critical compilation of crystallographic data prepared by E. Parthé at the University of Geneva. It contains over 3200 compounds representative of the structure types found among inorganic compounds. This work contains condensed crystal chemical information about individual structure types as well as an extensive chapter on the crystal chemistry of particular structure families. The aim of the compilation is to clarify and classify published data for intermetallic and other inorganic structures (types found exclusively with halides or oxides are only included for a few special cases). It provides a tool for additional crystal chemical studies and the development of new materials.

Physical Methods in Heterocyclic Chemistry V5 P Wheatley,1972-01-28 Physical Methods in Heterocyclic Chemistry, Volume V: Handbook of Molecular Dimensions focuses on bond lengths and angles from X-ray crystallography. This book provides a list of known X-ray structure determinations of molecules and ions that contain heterocyclic rings. Comprised of one chapter, this volume starts with an overview of the use of X-ray diffraction for the study of the geometry of molecules of all types. This text then discusses the three primary reasons for the lack of accuracy in bond lengths and angles determined by X-ray diffraction. This book discusses as well the effect of substitution on the bond lengths and angles in a heterocyclic ring system. The reader is also introduced to the various factors influencing the magnitudes of bond lengths and angles in molecules, which include the degree of hybridization, bond orders, electronegativity, interelectronic repulsion, or the equivalent concepts in terms of which these factors may be expressed. Heterocyclic

chemists, biochemists, molecular biologists, and researchers will find this book useful.
