Taming the Storm Jack Bass, 2002-12-01 Thrust into the center of a raging storm over civil rights, Frank M. Johnson, Jr., was the youngest federal judge in the country at the time of his appointment in 1955. During his twenty-four years on the district court in Montgomery, Alabama, Johnson handed down a string of precedent-setting decisions that were vastly unpopular at the time but that would prove to have profound consequences for America's future. Not only did Johnson's trailblazing opinions greatly expand the access of African Americans to their constitutional rights, but his opinions also helped to dismantle discrimination against women, prison inmates, and the mentally ill. Johnson paid a heavy price for his judicial vision, however, for he had to endure public scorn, death threats, and the outrage of a society that felt itself and its values to be under siege. Eventually Johnson prevailed, winning honor even in his native Alabama and a respected place in the history of the civil rights movement. *Taming the Storm* is the story of an authentic American hero and the era he did so much to define.

Uncultivated Andy Brennan, 2019-06-17 Today, food is being reconsidered. It's a front-and-center topic in everything from politics to art, from science to economics. We know now that leaving food to government and industry specialists was one of the twentieth century's greatest mistakes. The question is where do we go from here. Author Andy Brennan describes uncultivation as a process: It involves exploring the wild; recognizing that much of nature is omitted from our conventional ways of seeing and doing things (our cultivations); and realizing the advantages to embracing what we've somehow forgotten or ignored. For most of us this process can be difficult, like swimming against the strong current of our modern culture. The hero of this book is the wild apple. *Uncultivated* follows Brennan's twenty-four-year history with naturalized trees and shows how they have guided him toward successes in agriculture, in the art of cider making, and in creating a small-farm business. The book contains useful information relevant to those particular fields, but is designed to connect the wild to a far greater audience, skillfully blending cultural criticism with a food activist's agenda. Apples rank among the most manipulated crops in the world, because not only do farmers want perfect fruit, they also assume the health of the tree depends on human intervention. Yet wild trees live all around us, and left to their own devices, they achieve different forms of success that modernity fails to apprehend. Andy Brennan learned of the health and taste advantages of such trees, and by emulating nature in his orchard (and in his cider) he has also enjoyed environmental and financial benefits. None of this would be possible by following today's prevailing winds of apple cultivation. In all fields, our cultural perspective is limited by a parallel proclivity. It's not just agriculture: we all must fight tendencies toward specialization, efficiency, linear thought, and predetermined growth. We have cultivated those tendencies at the exclusion of nature's full range. If *Uncultivated* is about faith in nature, and the power it has to deliver us from our own mistakes, then wild apple trees have already shown us the way.

Pippin's Wedge Geoff Bottone, 2018-07-24 The sleepy Township of Pippin's Wedge sits nestled in a mountain valley on the westernmost edge of the kingdom. It is a place that adventurers often pass through on their way to more interesting places, such as the dangerous, orkan-controlled, Western Mountains, or the bustling hub of trade and intrigue that is Silverton, the county seat. The few adventurers that decide to stay in the township and look past its facade will find a place as intriguing as any backroom meeting of the Weavers' Guild and as mysterious as any lost ruin in a mountain valley. For those who get to know

the people and the places of Pippin's Wedge, there is a wealth of grudges, hopes, dreams, deceit, monsters, magic, and adventure. This setting guide is for them.

Siege Warfare and Military Organization in the Successor States (400-800 AD) Leif Inge Ree Petersen, 2013-09-15 Siege Warfare follows the adaptation of late Roman military organization among successor states to 800 AD from Francia to the Caliphate, as siege technology, military infrastructure and administrative techniques throughout the Mediterranean derived from 4th and 5th century imperial innovations.

Mental Illness in Popular Media Lawrence C. Rubin, 2014-01-10 Whether in movies, cartoons, commercials, or even fast food marketing, psychology and mental illness remain pervasive in popular culture. In this collection of new essays, scholars from a range of fields explore representations of mental illness and disabilities across various media of popular culture. Contributors address how forms of psychiatric disorder have been addressed in film, on stage, and in literature, how popular culture genres are utilized to communicate often confusing and conflicted relationships with the mentally ill, and how popular cultures around the world reflect mental illness and disability. Analyses of sources as disparate as the Batman films, Broadway musicals and Nigerian home movies reveal how definitions of mental illness, mental health, and of psychology itself intersect with discourses on race, gender, law, capitalism, and globalization. Instructors considering this book for use in a course may request an examination copy [here](#).

Well, Let Me Just Tell Y'All Chris W. Scholl, 2016-12-15 When life circumstances made her run from the God she had known all her life, He continued to show Himself to her. Once Chris Scholl realized He was not going anywhere, she gave in and is now closer to Him than ever. God speaks today, just as He did in the Old Testament days. The only difference now is, we have so much more clatter around us that we just have to look harder and listen closer. In Well, Let Me Just Tell Y'all, Chris keeps it simple as she shares the lessons God has taught her. The book includes inspirations, devotionals, poems, and just a few of the many scriptures God has used to remind her that He has a purpose for all of us, that He loves us, and that He provides strength, hope, and forgiveness.

In These Girls, Hope Is a Muscle Madeleine Blais, 2017-07-11 “Beautifully written . . . A celebration of girls and athletics.” The national bestselling sports classic from a Pulitzer Prize–winning journalist (USA Today). Expanded and updated with a new epilogue, Madeleine Blais’ book tells the story of a season in the life of the Amherst Lady Hurricanes, a girls’ high school basketball team from the Western Massachusetts college town. The Hurricanes were a talented team with a near-perfect record, but for five straight years, when it came to the crunch of the playoffs, they somehow lacked the desire to go all the way. Now, led by senior guards Jen Pariseau, a three-point specialist, and Jamila Wideman, an All-American phenom, this was the year to prove themselves. It was a season to test their passion for the sport and their loyalty to each other, and a chance to discover who they really were. As an off-season of summer jobs and basketball camps turns to fall, as students arrive and the games begin, Blais charts the ups and downs of the team and paints a portrait of the wider Amherst community, which comes to revel in the athletic exploits of their girls. Finally, a women’s team was getting the attention they deserve. And the Hurricanes were richly deserving; these teenage girls are fierce and funny, smart and ambitious, and they are the heart of this gripping book. “Extraordinary.” —The Baltimore Sun “A picture of a changing period in American sports history, when a town rallied around its female athletes in a way that had previously been reserved for males.” —Publishers Weekly

The Dark Ages, 476-918 Charles Oman, 2022-07-21 The Dark Ages, 476-918 by Charles Oman was an educational text that helped students and non-students alike learn about the dark ages in the late 19th century when the book was first published. Finding original resources that are easy to find and easy to understand could be difficult, thus works like Oman’s were very important in order to learn about the dark ages.

Minstrel Weather Marian Storm, 2024-01-30 THOUGH January has days that dress in saffron for their going, and noons of yellow light, foretelling crocuses, the month is yet not altogether friendly. The year is moving now toward its most un pitying season. Nights that came on kindly may turn the meadows to iron, tear off the last faithful leaves from oaks, drive thick clouds across the moon, to end in a violent dawn. January holds gentle weather in one hand and blizzards in the other, and what a blizzard can be only dwellers on prairies or among the mountains know. Snow gone mad, its legions rushing across the land with daggers drawn, furious, bearing no malice, but certainly no compassion, and overwhelming all creatures abroad: bewildered flocks, birds half frozen on their twigs, cattle unwisely left on shelterless ranges, and people who lose the way long before animals give up. Snow hardly seems made of fairy stars and flowers when its full terror sweeps Northern valleys or the interminable solitudes of the plains. The gale so armed for attack owns something of the wicked intention which Conrad says that sailors often perceive in a storm at sea. The rider pursued by a blizzard may feel, like the tossed mariner, that “these elemental forces are coming at him with a purpose, with an unbridled cruelty which means to sweep the whole precious world away by the simple and appalling act of taking his life.”

Brain Storm Rebecca M. Jordan-Young, 2011-01-07 Jordan-Young has written a stunning book that demolishes most of the science associated with the

dominant paradigm of the development of sex and gender identity, behavior, and orientation. The current paradigm, brain organization theory, proposes: Because of early exposure to different sex hormones, males and females have different brains; and these hormones also create gay and straight brains. Jordan-Young interviewed virtually every major researcher in the field and reviewed hundreds of published scientific papers. Her conclusion: Brain organization theory is little more than an elaboration of longstanding folk tales about antagonistic male and female essences and how they connect to antagonistic male and female natures. She explains, in exquisite detail, the flaws in the underlying science, from experimental designs that make no statistical sense to conceptually sloppy definitions of male and female sexuality, contradictory results, and the social construction of normality. Her conclusion that the patterns we see are far more complicated than previously believed and due to a wider range of variables will shake up the research community and alter public perception.

The Hanky of Pippin's Daughter Rosmarie Waldrop,2019-10-01 Poet Rosmarie Waldrop's classic novel about the horrors and banalities of German life between the World Wars. "Josef and Frederika Seifert made a bad marriage—he so metaphysical, she, furious frustrated singer, furious frustrated femme fatale, unfaithful within two months of the wedding day. The setting is small town Germany between the wars; the Seiferts are just those 'ordinary people' who helped Hitler rise, bequeathing their daughter, who tells their story, a legacy of grief and guilt. Rosmarie Waldrop's haunting novel, superbly intelligent, evocative and strange, reverberates in the memory for a long time, a song for the dead, a judgment." (Angela Carter)
