Developing Early Maths Skills Outdoors Marianne Sargent,2020-01-09 Developing Early Maths Skills Outdoors provides practitioners with practical planning for how to develop and enhance the outdoor area to facilitate mathematical learning. It includes up to 80 activities to embed each learning experience into daily provision, with dedicated plans to develop specific skills and aspects of mathematics. The activities throughout the book are low cost and easy to set up, aiming to reassure practitioners and give them the confidence to plan more mathematical learning experiences outdoors. This is further supported with planning guidance and resource ideas, as well as advice on observation and assessment, including suggestions for how to reduce the paperwork burden and a useful observation template. The book is divided into sections that represent the different aspects of mathematics and includes: An introduction to each aspect, explaining why it is important, and outlining the fundamental skills and concepts that underpin it; ideas for adult-led and adult-initiated activities that aim to develop children's early mathematical knowledge, skills and understanding; suggestions for how to enhance continuous outdoor provision so that it promotes independent investigation, fostering creative and critical thinking; pointers and tips about teaching mathematics in the early years; ideas for how to involve parents and carers and links to all four British early years curriculum frameworks.

Number and Calculating Cherri Moseley,2004 Number and calculating provides play activities for mathematical concepts and skills using popular early years' themes. The themes cover four areas of learning: number, counting, calculating (exploring the beginnings of addition, subtraction, multiplication and division) and problem solving. Each theme offers inspirational ideas for three to fives using the indoor and outdoor environment in a fun, practical way and covering all areas of early years learning.

Coping Power John E. Lochman,Karen Wells,Lisa,2008-03-17 The Coping Power Program is designed for use with preadolescent and early adolescent aggressive children and their parents and is often delivered near the time of children's transition to middle school. Aggression is one of the most stable problem behaviors in childhood. If not dealt with effectively, it can lead to negative outcomes in adolescence such as drug and alcohol use, truancy and dropout, delinquency, and violence. This program has proven effective in helping to avoid these types of problems. The parent component of the program consists of 16 group meetings also held during the 5th and 6th grade school years. Parents are taught ways of reinforcing their children's positive behaviors, as well as effective discipline techniques for eliminating negative behaviors. Skills for improving family communication, providing academic support in the home, and building family cohesion are also a focus. Parents also learn how to give effective instructions and establish age-appropriate rules and expectations for their children at home. In addition to these basic parenting skills, the program describes relaxation techniques that parents can use to deal with their own stress. Tips

for taking care of personal needs and effective time management strategies also help to ease the challenges of parenting an aggressive child.

Advances in Multimedia Information Processing - PCM 2004 Kiyoharu Aizawa, Yuichi Nakamura, Shin'ichi Satoh, 2004-10-29 Welcome to the proceedings of the 5th Pacific Rim Conference on Multimedia (PCM 2004) held in Tokyo Waterfront City, Japan, November 30–December 3, 2004. Following the success of the preceding conferences, PCM 2000 in Sydney, PCM 2001 in Beijing, PCM 2002 in Hsinchu, and PCM 2003 in Singapore, the 5th PCM brought together the researchers, developers, practitioners, and educators in the field of multimedia. Theoretical breakthroughs and practical systems were presented at this conference, thanks to the support of the IEEE Circuits and Systems Society, IEEE Region 10 and IEEE Japan Council, ACM SIGMM, IEICE and ITE. PCM2004 featured a comprehensive program including keynote talks, regular paper presentations, posters, demos, and special sessions. We received 385 papers and the number of submissions was the largest among recent PCMs. Among such a large number of submissions, we accepted only 94 oral presentations and 176 poster presentations. Seven special sessions were also organized by world-leading researchers. We kindly acknowledge the great support provided in the reviewing of submissions by the program committee members, as well as the additional reviewers who generously gave their time. The many useful comments provided by the reviewing process must have been very valuable for the authors' work. This conference would never have happened without the help of many people. We greatly appreciate the support of our strong organizing committee chairs and advisory chairs. Among the chairs, special thanks go to Dr. Ichiro Ide and Dr. Takeshi Naemura who smoothly handled publication of the proceedings with Springer. Dr. Kazuya Kodama did a fabulous job as our Web master.

Little Big World Jeffrey Hammond, 2010-04-15 Jeffrey Hammond's *Little Big World: Collecting Louis Marx and the American Fifties* is the story of a middle-aged man's sudden compulsion to collect the toys of his childhood: specifically themed playsets produced by the Louis Marx Toy Company. Hammond never made a conscious decision to become a collector of any kind, so he was surprised when his occasional visits to web sites turned into hours spent gazing at, and then impulsively purchasing, the tiny plastic people and animals in the Civil War set, the Fort Apache set, Roy Rogers Ranch, and Happy-Time Farm—just a few of the dozens of playsets the Marx Company produced. Hammond interweaves childhood memories with reflections on what they reveal about the culture and values of cold war America, offering an extended meditation on toys as powerful catalysts for the imagination of both children and adults. Never sentimentalizing his childhood in an effort to get his old toys back, Hammond exposes the dangers of nostalgia by casting an unsettling light on the culture of the fifties and the era's lasting impact on those who grew up in it. Writing in a lovably quirky voice, Hammond not only attempts to understand his personal connection to the Marx toys but also examines the psychology of his fellow eBay denizens. In this warm, funny, and contemplative work, the reader encounters an online community of serious adult collectors who, as the author suspects, are driven to obsession by middle-aged nostalgia. When Hammond questions this preoccupation with the past, he comes to realize that his own collecting has prevented him from moving forward. With this insight, he offers an insider's take on the culture and psychology of collecting.

Children of the Dark Jonathan Janz, 2016-03-15 Will Burgess is used to hard knocks. Abandoned by his father, son of a drug-addicted mother, and charged with raising his six-year-old sister, Will has far more to worry about than most high school freshmen. To make matters worse, Mia Samuels, the girl of Will's

dreams, is dating his worst enemy, the most sadistic upperclassman at Shadeland High. Will's troubles, however, are just beginning. Because one of the nation's most notorious criminals—the Moonlight Killer—has escaped from prison and is headed straight toward Will's hometown. And something else is lurking in Savage Hollow, the forest surrounding Will's rundown house. Something ancient and infinitely evil. When the worst storm of the decade descends on Shadeland, Will and his friends must confront unfathomable horrors. Everyone Will loves—his mother, his little sister, Mia, and his friends—will be threatened. And very few of them will escape with their lives.

The Minds Behind Sega Genesis Games Patrick Hickey, Jr., 2022-07-08 Prior to the arrival of the Sega Genesis, video games were still largely considered kid stuff, but with a far more mature and eclectic range of titles, and an understanding of what gamers wanted, Sega and its Genesis/Mega Drive console began to shift the expectations for what gaming could be. Never scared to innovate, Sega's impact on the industry continues to this day through the games they originally developed and the technology their consoles pushed into the mainstream. Featuring interviews with the creators of over 40 games on the Sega Genesis console including Sonic the Hedgehog 2, Altered Beast, Aladdin, Earthworm Jim and NHL 95, this book gives a behind-the-scenes look at the creation of some of the influential, iconic, and sometimes forgotten games on Sega's most important contribution to the game industry. The interviewees reveal the challenges of working with mega publishers, the uncertainties of public reception, and the creative processes that produced some of the 16-bit era's classic titles.

Casual Game Design Gregory Trefry, 2010-01-26 From Windows Solitaire to Bejeweled to Wii Tennis, casual games have radically changed the landscape of games. By simplifying gameplay and providing quick but intense blasts of engaging play, casual games have drawn in huge new audiences of players. To entertain and engage the casual player, game designers must learn to think about what makes casual

Tragedy and Redress in Western Literature Richard Gaskin, 2018-05-04 This book offers a unique interpretation of tragic literature in the Western tradition, deploying the method and style of Analytic philosophy. Richard Gaskin argues that tragic literature seeks to offer moral and linguistic redress (compensation) for suffering. Moral redress involves the balancing of a protagonist's suffering with guilt (and vice versa): Gaskin contends that, to a much greater extent than has been recognized by recent critics, traditional tragedy represents suffering as incurred by avoidable and culpable mistakes of a cognitive nature. Moral redress operates in the first instance at the level of the individual agent. Linguistic redress, by contrast, operates at a higher level of generality, namely at the level of the community: its fundamental motor is the sheer expressibility of suffering in words. Against many writers on tragedy, Gaskin argues that language is competent to express pain and suffering, and that tragic literature has that expression as one of its principal purposes. The definition of tragic literature in this book is expanded to include more than stage drama: the treatment stretches from the Classical and Medieval periods through to the early twentieth century. There is a special focus on Sophocles, but Gaskin takes account of most other major tragic authors in the European tradition, including Homer, Aeschylus, Euripides, Virgil, Seneca, Chaucer, Marlowe, Shakespeare, Corneille, Racine, Lessing, Goethe, Schiller, Kleist, Büchner, Ibsen, Hardy, Kafka, and Mann; lesser-known areas, such as Renaissance neo-Latin tragedy, are also covered. Among theorists of tragedy, Gaskin concentrates on Aristotle and Bradley; but the contributions of numerous contemporary commentators are also assessed. *Tragedy and Redress in Western Literature: A Philosophical Perspective* offers a new and genuinely interdisciplinary perspective on tragedy that will be of considerable interest both to philosophers of literature and to literary critics.

Encyclopedia of Religion and Film Eric Michael Mazur,2011-03-08 Comprising 91 A–Z entries, this encyclopedia provides a broad and comprehensive introduction to the topic of religion within film. Technology has enabled films to reach much wider audiences, enabling today's viewers to access a dizzying number of films that employ diverse symbolism and communicate a vast array of viewpoints. Encyclopedia of Religion and Film will provide such an audience with the tools to begin their own exploration of the deeper meanings of these films and grasp the religious significance within. Organized alphabetically, this encyclopedia provides more than 90 entries on the larger religious traditions, the major film-producing regions of the globe, the films that have stirred controversy, the most significant religious symbols, and the more important filmmakers. The included topics provide substantially more information on the intersection of religion and film than any of the similar volumes currently available. While the emphasis is on the English-speaking world and the films produced therein, there is also substantial representation of non-English, non-Western film and filmmakers, providing significant intercultural coverage to the topic.

Impossible Plays Jack Shepherd,Keith Dewhurst,2014-06-01 Bill Bryden's Cottesloe Company, which flourished at Peter Hall's National Theatre, was the English theatre's only true ensemble of the last thirty or so years. Impossible Plays tells the story of the company and the many actors and musicians connected to it. Co-written by Keith Dewhurst, author of eight plays for the group, and Jack Shepherd, a founder-actor, it explains the ideas behind the company's work and how the work was staged, and provides an idiosyncratic, lively and deeply personal take on the company. The search was always to find a popular theatre, a form of theatre that would draw into it people from all backgrounds, not just the cultured and the educated. Beginning with a Royal Court Theatre Sunday night performance in 1970, the story of one company's aim to create a popular theatre form includes such milestone productions as The Mystery cycle of plays and Lark Rise to Candleford. With photographs by John Haynes, Michael Mayhew and Nobby Clark, Impossible Plays is a glorious and timely tribute to one of theatre's most innovative companies.

Formal Methods in Outer Space Ezio Bartocci,Yliès Falcone,Martin Leucker,2021-10-17 This Festschrift, dedicated to Klaus Havelund on the occasion of his 65th birthday, celebrated in 2021 due to the COVID-19 pandemic, contains papers written by many of his closest friends and collaborators. After work as a software programmer in various Danish companies, Klaus has held research positions at various institutes, including the Danish Datamatics Center, the Ecole Polytechnique, LIP 6 lab in Paris, Aalborg University, and NASA Ames. Since 2006 he has been working in NASA's Jet Propulsion Laboratory (JPL), the federally funded center managed by Caltech whose primary function is to construct and operate planetary robotic spacecraft. His professional awards include the Turning Goals Into Reality engineering innovation award, the Outstanding Technology Development award, and the JPL Mariner, Ranger, Voyager, and Magellan awards. Klaus has provided constant and generous service to the formal methods community by organizing, participating in, and chairing numerous committees. His academic awards include the 2020 SIGSOFT Impact Paper Award, the RV 2018 Test of Time award, and the ASE 2014 and ASE 2016 Most Influential Paper awards. His research activities have generated more than 100 publications with more than 100 collaborators, cited over 12,000 times. The book title reflects Klaus's main research and engineering focus throughout his career: formal methods, often applied at NASA. The contributions, which went through a peer-review process, cover a wide spectrum of the topics related to his scientific interests, including programming language design, static analysis, runtime verification, dynamic assurance, and automata learning.
