Charles Pierre Lefebvre De Laboulaye

Didi-Huberman and the image Chari Larsson, 2020-09-29 Philosopher and art historian Georges Didi-Huberman is one of the most innovative and influential critical thinkers writing today. This book is the first English-language study of his writing on images. An image is a form of representation, but what are the philosophical frameworks supporting it? The book considers how Didi-Huberman takes up this question repeatedly over the course of his career. Placing his project in relation to major historical and intellectual contexts, it shows not only how he modifies dominant disciplinary traditions, but also how the study of images is central to a new way of thinking about poststructuralist-inspired art history.

The Making of Visual News Thierry Gervais, Gaëlle Morel, 2020-09-23 The Making of Visual News sets out to show how photography has changed the way we read, report and sell the news. It investigates how photographs first became news images at the end of the nineteenth century and how magazines in the USA, the UK, France and Germany have put them to use ever since. Drawing on a wide selection of images, author Thierry Gervais (in collaboration with Gaëlle Morel) analyses news photographs in the context of their original presentation in print. Highly illustrated, the book contains 85 full colour magazine layouts and spreads, offering the reader a view of how photographs were and are used in print publications, including Life, Picture Post, the Berliner Illustrierte Zeitung and VU. It examines how photographs were employed to attract new readers throughout the twentieth century, arguing that photography was the main tool by which news editors sought to communicate the news and attract a broader readership. Looking beyond the roles of photographer and journalist, this study also highlights the contributions of picture editors and artistic directors; by commissioning photographs and incorporating images into magazine layouts, these figures played critical but often overlooked roles in the construction of visual news, even as they crafted unique styles for their publications. Charting changes in technology and reportage, as well as broader social and political histories, The Making of Visual News offers new insight into the history of photojournalism, making this an essential resource for students and scholars

of photojournalism and the history of photography, media and culture
