Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Making Mechanical Cards Sheila Sturrock, 2009 The tradition of sending loved ones greeting cards goes back about 200 years and is more popular today than ever before. With a greeting card being the gift of choice for so many occasions, people are forever on the lookout for one that the recipient hasn't seen before. Because this is no easy task, the creatively minded among us are choosing to make our own cards. There are many books demonstrating how to make basic cards, but Making Mechanical Cards goes a considerable step further in showing how to make cards with mechanisms. The mechanisms are based on Victorian and Edwardian designs, and vary from the very simple to the really intricate. But the step-by-step instructions and diagrams provided make even the most complicated form of mechanism achievable. In addition, the materials and equipment needed to make these impressive cards are not extensive or specialized --- the main requirements are card stock, glue, and scissors, with wire or thread for the more complex designs.
