Seducing Mr. Storm Poppy Summers,2015-10-11 Can Susanna seduce Mr. Storm—and keep her heart intact? In the late 1700s, Susanna Seymour's mother is very keen to find a husband for her younger sister, Lucy, while Susanna is considered on the shelf at twenty-seven. Enter their neighbor arrived from London, the dashing and irreverent Elijah Storm, who makes his admiration for Susanna plain from the start. Susanna is not looking for a husband and is keen to make sure Lucy wins the bachelor, but things don't go quite to plan. Elijah is frank in his desire to have Susanna's sexual services, and she believes by giving him what he wants, he will lose all interest in her. Her price is his agreement to marry her sister. But when passion ignites, what will happen when Susanna seduces Mr. Storm?

IN A STORM OF SCANDAL(colored version) Kim Lawrence,Masami Shinohara,2020-12-10 Luca and Poppy swore they'd be together forever, until one day when Luca suddenly broke off their relationship, telling Poppy to forget him and find happiness. His family needed him to marry a woman of similarly high standing and he couldn't let them down. Fast forward seven years and Poppy's been trapped in a storm while checking on her grandmother's castle in Scotland. Shivering with fear, she hears the door burst open and the great silhouette of a man appears—revealing none other than Luca, the man she could never forget. Now the two must spend a candlelit night in the great, cold castle until the storm passes!□This work is originally colored.

The Poppy Lady Heather Johnson,2023-01-31 Madame Anna Guérin is the fascinating personality behind the title 'The Poppy Lady'. Her idea of the 'Inter-Allied Poppy Day' gave work to women and children in the devastated areas of France, in addition to offering support for First World War veterans. Born in 1878, she was an early feminist, becoming financially independent. During the First World War, and the immediate years after the Armistice, many people knew of Madame Guérin's reputation as a selfless fundraiser for French and American charities. Her speeches inspired many people to make generous donations. Having had her name lost in the mists of time, this is the first biography of Madame E. Guérin. The book follows her extraordinary story as 'The Poppy Lady', a woman born before her time, but confined to anonymity for too long.

Commercial Code Evaluation Pilot Study Final Report Poppy Storm,David Baylon,Benjamin Hannas,2016 The Northwest Energy Efficiency Alliance contracted Ecotope, Inc. to conduct a small pilot study to develop and test a methodology for commercial energy code evaluation. This objective supports the growing focus on energy code as a key strategy for meeting energy planning and performance goals. The researchers point out that code is successful to the degree that it is well-developed, adopted in a timely manner, supported in implementation and broadly accepted by market actors (i.e., compliance), and that a competent methodology must address each of these elements. Typically, current approaches to code assessment have focused only on measuring compliance. The methodology developed from this study embodies a more broad-based, integrated approach, including a cost-effective field review and compliance assessment of completed buildings with additional assessments of the enforcement/implementation environment, and post-occupancy energy performance--Publisher's description (viewed April 20, 2016)

Barra,2019-01-22 Poppy Haviland & The Secret of the Lively Widow is the first book in a series featuring twelve-year-old aspiring actress Poppy Petunia Haviland and her adventuresome friends. Simply being twelve years old is tough enough, but try being twelve AND the daughter of the world's most famous movie star. Yeah... exactly. In The Secret of the Lively Widow, Poppy's family relocate to a small town where the appearance of superstar Holly Haviland takes the community by storm. Even when Poppy discovers a treasure map carefully tucked within their historic lodgings, she can't seem to capture anyone's attention for very long. She recruits her best friend, Annie Kim, and her strange new neighbour Rick Reyes (a rapper and inventor), to explore the history of the map and of their new community. The trio learns that the town that they are living in was a key terminal on the Underground Railroad - the illegal passageway to freedom that played a major role in the termination of slavery in America - and that Poppy's family played an important role in that history. Will their efforts result in the discovery of a long-rumoured historical treasure, or will someone else get to it first?

Residential Building Stock Assessment Poppy Storm,Benjamin Hannas,David Baylon,Bob Davis,2013 This report is the second in a series of reports summarizing the results of the Residential Building Stock Assessment (RBSA). This second report summarizes the characteristics observed onsite and energy use data for the manufactured home component of the RBSA. The scope and magnitude of this representative field study exceeds any previous studies conducted in the Northwest. The final RBSA sample includes households representing 99 utilities: 89 public utilities, seven investor-owned utilities, and three natural gas-only utilities. Of the 99 utilities represented in the overall RBSA study, 52 were represented in the manufactured home sample. The report presents interesting findings on manufactured home characteristics. Manufactured home characteristics reflect a high degree of uniformity across the four states. This uniformity stems from preemptive federal standards and the region's energy efficiency programs, which use common standards across all factories. While the overall conductive heat loss rates across all vintages of homes show minor differences among the states and climates, the overall heat loss by vintage suggest considerable differences between homes built to federal standards and homes built to regional utility program specifications. Homes built to federal standards average about twice the heat loss and twice the infiltration rate of homes built under utility programs. Other key highlights of the report indicate that: About 70% of manufactured homes use electricity as their primary fuel for space heating, while approximately 11% of homes use gas as their primary heating fuel, approximately 90% of Domestic Hot Water (DHW) tanks are electrically operated, the average number of lamps per home is 35 and the mean saturation of CFLs throughout manufactured homes in the region is about 28% of all lamps, on average manufactured homes have about 1.3 refrigerators and 58% of those refrigerators were manufactured since 2000. Information gleaned from this report can help to establish a benchmark of residential building stock characteristics in the Northwest. Additionally, the results of this study will serve as a basis for planning, forecasting, and program development initiatives by various entities in the region. *Please note when printing we recommend color for better representation of the graphs--Publisher's description (viewed August 22, 2016).
