Perception of Faces, Objects, and Scenes Mary A. Peterson, Gillian Rhodes, 2003-05-22 From a barrage of photons, we readily and effortlessly recognize the faces of our friends, and the familiar objects and scenes around us. However, these tasks cannot be simple for our visual systems-- faces are all extremely similar as visual patterns, and objects look quite different when viewed from different viewpoints. How do our visual systems solve these problems? The contributors to this volume seek to answer this question by exploring how analytic and holistic processes contribute to our perception of faces, objects, and scenes. The role of parts and wholes in perception has been studied for a century, beginning with the debate between Structuralists, who championed the role of elements, and Gestalt psychologists, who argued that the whole was different from the sum of its parts. This is the first volume to focus on the current state of the debate on parts versus wholes as it exists in the field of visual perception by bringing together the views of the leading researchers. Too frequently,

researchers work in only one domain, so they are unaware of the ways in which holistic and analytic processing are defined in different areas. The contributors to this volume ask what analytic and holistic processes are like; whether they contribute differently to the perception of faces, objects, and scenes; whether different cognitive and neural mechanisms code holistic and analytic information; whether a single, universal system can be sufficient for visual-information processing, and whether our subjective experience of holistic perception might be nothing more than a compelling illusion. The result is a snapshot of the current thinking on how the processing of wholes and parts contributes to our remarkable ability to recognize faces, objects, and scenes, and an illustration of the diverse conceptions of analytic and holistic processing that currently coexist, and the variety of approaches that have been brought to bear on the issues.

Child Care Needs and Numbers Jean Packman, 2021-11-07 Originally published in 1968, the study described in this title began in a very small way in late 1960. At that time some Oxfordshire county councillors and children's department officials were very conscious that the number of children in care in the county was high in comparison with the national average. This meant that expenditure was also high. The County's position, however, was not

unique. Oxford City was in a similar position, but other neighbours did not appear to have the same problem. A small research project was launched to investigate and it soon became apparent that there was a large and complex problem to be solved. The problem was of striking, persistent and puzzling variations in the proportion of children in care in the different local authority children's departments of England and Wales. This seemed to warrant a larger investigation on a country-wide basis and this book outlines the findings of that project.

Phoenix Prime Ted White,2011-09-29 The dream of being a superman came true for Max Quest - and immediately turned into a nightmare. He was not alone. There were Others with extraordinary powers, and the last thing they wanted was another superman on Earth - especially one working for good instead of evil. They couldn't kill him. But they could send him . . . elsewhere. Elsewhere was the viciously hostile world of Qanar, where Max's powers didn't work and sorcery was a more potent weapon than science, where shadows were as menacing as steel. Max Quest still had to save Earth from the corrupt threat of the Others - but he found his destiny intricately linked with that of Qanar as well. And somewhere in space-time was his lost love . . .

Prime Cut Diane Mott Davidson,2000-02-29 Cheesecake, beefcake, and a pair of dueling caterers whet someone's appetite for murder in this sinfully delicious novel by the New York Times bestselling author of *Sticks & Scones*. Caterer Goldy Schulz is convinced things couldn't get worse. An unscrupulous rival is driving her out of business. An incompetent contractor has left her precious kitchen in shambles. And she has just agreed to cater a fashion shoot at a nineteenth-century mountain cabin with her mentor and old friend, French chef André Hibbard. Together Goldy and André struggle in a hopelessly outdated kitchen to cater to a vacuous crowd of beautiful people whose personal dramas climax when a camera is pitched through a window . . . into the buffet. Then Goldy's contractor is found hanging in the house of one of her best friends. A second murder follows and Goldy must somehow solve a mystery and prepare for a society soirée that could make—or break—her career. It's a mystery that involves the dead contractor's unwholesome past, a food saboteur, the theft of four historical cookbooks, and an overzealous D.A. who has suspended Goldy's detective husband, Tom, from the force. What Goldy discovers is the perfect recipe for murder. And she may be dessert!
