Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Painting Beyond Pollock Morgan Falconer,2015-04-20 Painting Beyond Pollock is a captivating account of the history of European and American painting from the mid-20th century onwards. Art historian and critic Morgan Falconer presents an extensively researched piece of writing that explains why painting has surged in popularity since Jackson Pollock and the Abstract Expressionists began painting in the late 1940s–early 1950s. Drawing on both original sources and contemporary scholarship, this bold and richly designed book lavishly illustrates the most important works made beginning in the Post War era. In addition to well-known artists such as Willem de Kooning, Agnes Martin, Alex Katz, Ellsworth Kelly, Marlene Dumas, Gerhard Richter and Brice Marden, Falconer explores the work of contemporary stars such as Cecily Brown, Mark Grotjahn, Elizabeth Peyton, John Currin, Neo Rauch and Mark Bradford as well as up-and-coming artists such as Blink Palermo and Sigmar Polke. Topics include: Things must be pulverized – Abstract Expressionism Wounded Painting – Informel in Europe and Beyond Against Gesture – Geometric Abstraction Witnesses – Post-war Figurative Painting Anti‐Tradition – Pop Painting Post‐Painting Part I – After Pollock A transcendental, high art – Neo-Expressionism and its Discontents Post-Painting Part II – After Pop New Figuration – Pop Romantics

Values at Play in Digital Games Mary Flanagan,Helen Nissenbaum,2016-09-02 A theoretical and practical guide to integrating human values into the conception and design of digital games, with examples from Call of Duty, Journey, World of Warcraft, and more. All games express and embody human values, providing a compelling arena in which we play out beliefs and ideas. “Big ideas” such as justice, equity, honesty, and cooperation—as well as other kinds of ideas, including violence, exploitation, and greed—may emerge in games whether designers intend them or not. In this book, Mary Flanagan and Helen Nissenbaum present Values at Play, a theoretical and practical framework for identifying socially recognized moral and political values in digital games. Values at Play can also serve as a guide to designers who seek to implement values in the conception and design of their games. After developing a theoretical foundation for their proposal, Flanagan and Nissenbaum provide detailed examinations of selected games, demonstrating the many ways in which values are embedded in them. They introduce the Values at Play heuristic, a systematic approach for incorporating values into the game design process. Interspersed among the book's chapters are texts by designers who have put Values at Play into practice by accepting values as a design constraint like any other, offering a real-world perspective on the design challenges involved.

Diaspora, Memory and Identity Vijay Agnew,2005-01-01 Memories establish a connection between a collective and individual past, between origins, heritage, and history. Those who have left their places of birth to make homes elsewhere are familiar with the question, Where do you come from? and respond in innumerable well-rehearsed ways. Diasporas construct racialized, sexualized, gendered, and oppositional subjectivities and shape the cosmopolitan intellectual commitment of scholars. The diasporic individual often has a double consciousness, a privileged knowledge and perspective that is consonant with postmodernity and globalization. The essays in this volume reflect on the movements of people and cultures in the present day, when physical, social, and mental borders and boundaries are being challenged and sometimes successfully dismantled. The contributors - from a variety of disciplinary perspectives - discuss the diasporic experiences of ethnic and racial groups living in Canada from their perspective, including the experiences of South Asians, Iranians, West Indians, Chinese, and Eritreans. Diaspora, Memory, and Identity is an exciting and innovative collection of essays that examines the nuanced development of theories of Diaspora, subjectivity, double-consciousness, gender and class experiences, and the nature of home.

From the Shinto-inspired Japanese video game Okami to the internationally popular The Legend of Zelda and Halo, many video games rely on religious themes and symbols to drive the narrative and frame the storyline. Playing with Religion in Digital Games explores the increasingly complex relationship between gaming and global religious practices. For example, how does religion help organize the communities in MMORPGs such as World of Warcraft? What role has censorship played in localizing games like Actraiser in the western world? How do evangelical Christians react to violence, gore, and sexuality in some of the most popular games such as Mass Effect or Grand Theft Auto? With contributions by scholars and gamers from all over the world, this collection offers a unique perspective to the intersections of religion and the virtual world.
