David E. Griffith

The Apple of His Eye William Chester Jordan, 2020-09-08 The thirteenth century brought new urgency to Catholic efforts to convert non-Christians, and no Catholic ruler was more dedicated to this undertaking than King Louis IX of France. His military expeditions against Islam are well documented, but there was also a peaceful side to his encounter with the Muslim world, one that has received little attention until now. This splendid book shines new light on the king's program to induce Muslims—the “apple of his eye”—to voluntarily convert to Christianity and resettle in France. It recovers a forgotten but important episode in the history of the Crusades while providing a rare window into the fraught experiences of the converts themselves. William Chester Jordan transforms our understanding of medieval Christian-Muslim relations by telling the stories of the Muslims who came to France to live as Christians. Under what circumstances did they willingly convert? How successfully did they assimilate into French society? What forms of resistance did they employ? In examining questions like these, Jordan weaves a richly detailed portrait of a dazzling yet violent age whose lessons still resonate today. Until now, scholars have dismissed historical accounts of the king's peaceful conversion of Muslims as hagiographical and therefore untrustworthy. Jordan takes these narratives seriously—and uncovers archival evidence to back them up. He brings his findings marvelously to life in this succinct and compelling book, setting them in the context of the Seventh Crusade and the universalizing Catholic impulse to convert the world.

Health at a Glance: Europe 2014 OECD, European Union, 2014-12-03 This third edition of Health at a Glance: Europe presents a set of key indicators related to health status, determinants of health, health care resources and activities, quality of care, access to care, and health expenditure and financing in 35 European countries.

Nontuberculous Mycobacterial Disease David E. Griffith, 2018-10-05 This book is a comprehensive and authoritative source on nontuberculous mycobacterial (NTM) pathogens and diseases and their appropriate management, with a focus on lung disease. NTM diseases, especially lung diseases, are increasing in prevalence in the U.S. and internationally with concomitant growing interest in a broad section of the medical community. Often merely included in coverage of tuberculosis, many aspects of NTM organisms and diseases are actually very different than TB. These differences are not intuitive or trivial and frequently result in suboptimal management of NTM patients. This book addresses these gaps in the literature with

chapters on microbiology, pathophysiology, epidemiology, the various diseases that can stem from NTM, and their particular management. There is also coverage on prevention and NTM as a public health problem. For pulmonologists and infectious disease physicians, this is the definitive resource on nontuberculous mycobacteria.
