Big Fish Daniel Wallace, 2012-01-01 When his attempts to get to know his dying father fail, William Bloom makes up stories that recreate his father's life in heroic proportions.

The Orient Under the Caliphs Alfred Freiherr von Kremer, 1920 Von Kremer's *ulturgeaehichte des Orients* will be welcome to all English-knowing lovers of Islamic history and culture. Von Kremer still stands unsurpassed. He has had no competitors; he alone occupies the field. His researches patient, laborious, thorough have illuminated every aspect of Muslim life. He is the most trustworthy interpreter of the social, political, economic, literary, and legal problems of Islam. The volume before us opens with an account of the death of the Prophet, and the trouble that arose over the question of succession. Faction fought faction. Heavy banks of cloud loomed up menacingly on the political horizon of Arabia. The spirit of tribal faction theretofore checked and kept in restraint asserted itself; and, in its very infancy, Islam was threatened with division, disunion, ruin and disruption. Omar saw the danger, and felt the need of prompt and vigorous action. He did as a practical and sagacious statesman would do. He settled the question of succession at a stroke; and with that the clouds rolled away, and the danger which had confronted Islam was at once averted. -- From <https://www.amazon.co.uk> (Sep. 21, 2016).

Folding in Architecture Greg Lynn, 2004-06-07 This seminal book from Architectural Design was originally published in 1993, at a time of crucial change and on the eve of the digital revolution. It brought together a series of essays that many believe created the favourable environment in which

computer-based design could thrive. Considered one of the most influential architecture publications of the 1990s, this book ranks as a classic and in itself is a crucial chapter of history, though one that has been out of print since 1999. This faithful reprinting includes a substantial new introductory essay by Mario Carpo, Head of the Study Centre at the Canadian Centre for Architecture, which examines the impact of the original texts and their ongoing significance. Thereafter, the book is true to its original content showcasing projects by ground-breaking architects such as Greg Lynn, Jeffrey Kipnis, Bahram Shirdel, Frank Gehry and Philip Johnson.

Origami 5 Patsy Wang-Iverson, Robert J. Lang, Mark YIM, 2016-04-19 *Origami5* continues in the excellent tradition of its four previous incarnations, documenting work presented at an extraordinary series of meetings that explored the connections between origami, mathematics, science, technology, education, and other academic fields. The fifth such meeting, 5OSME (July 13-17, 2010, Singapore Management University) followed the precedent previous meetings to explore the interdisciplinary connections between origami and the

real world. This book begins with a section on origami history, art, and design. It is followed by sections on origami in education and origami science, engineering, and technology, and culminates with a section on origami mathematics—the pairing that inspired the original meeting. Within this one volume, you will find a broad selection of historical information, artists' descriptions of their processes, various perspectives and approaches to the use of origami in education, mathematical tools for origami design, applications of folding in engineering and technology, as well as original and cutting-edge research on the mathematical underpinnings of origami.
