Animal Quilling Patterns James Mullen,2021-04-16 Quilling is considered as an ancient art form and it is still being practiced today. This is sometimes called the paper filigree, this is an art form that involves paper strips that are rolled, shaped, and glued together to create very decorative designs. The rolled paper is wound around the quill that creates a basic coil shape. The paper will be glued at its tip and the coil will then be shaped, the shaped coils will then be arranged to form flowers, leaves, and other ornamental patterns that can also be similar to ironwork; this is the basic way on how to do quilling Nowadays, paper quilling is still alive and well. People who practice this kind of artwork are called quillers. Quillers teach young ladies on how to do quilling, as a part of their income, hobby, interest, or even do this for leisure. Doing this art is no longer classified as an upper class art since ordinary people can also do this. The art suddenly became the people's art form and the beauty they create is always expanding and innovated. The said craft easily became popular because of its low cost of materials. It is often used to make an invitation for wedding, birth announcements, scrapbook pages, and different storage boxes. I will show you a step by step guide on how to create animal quilling masterpieces. Happy Quilling!

Mobile Computing, Applications, and Services Petros Zerfos,Rebecca Montanari,Thomas Phan,2010-05-11 This proceedings volume includes the full research papers presented at the First International Conference on Mobile Computing, Applications, and Services (MobiCASE) held in San Diego, California, during October 26-29, 2009. It was sponsored by ICST and held in conjunction with the First Workshop on Innovative Mobile User Interactivity (WIMUI). MobiCASE highlights state-of-the-art academic and industry research work in - main topics above the OSI transport layer with an emphasis on complete end-to-end systems and their components. Its vision is largely influenced by what we see in the consumer space today: high-end mobile phones, high-bandwidth wireless networks, novel consumer and enterprise mobile applications, scalable software infrastructures, and of course an increasingly larger user base that is moving towards an almost a- mobile lifestyle. This year's program spanned a wide range of research that explored new features, algorithms, and infrastructure related to mobile platforms. We received submissions from many countries around the world with a high number from Europe and Asia in addition to the many from North America. Each paper received at least three independent reviews from our Technical Program Committee members during the Spring of 2009, with final results coming out in July. As a result of the review process, we selected 15 high-quality papers and complemented them with six invited submissions from leading researchers, reaching the final count of 21 papers in the program.
