Low-Carbon Birding Javier Caletrío, 2022-09-06 Birdwatching in Britain has grown increasingly dependent on burning fossil fuels. Regularly driving long distances to birding hotspots and frequent flying to see exotic species are seen as perfectly normal. In the face of the climate crisis, however, a growing number of birders are reassessing the way they enjoy and study birds. In this timely book, 30 contributors—from young birdwatchers to professional ornithologists—explain why and how they are shifting to climate-friendlier approaches. Low-carbon birding, they argue, is a legitimate and valuable way of enjoying birds. Furthermore, in itself this can bring many joys, some of them unexpected. From first encounters with hawfinches to focusing in on birdsong, from the Kalahari to the Hebrides, the stories told here are not about heroic efforts to save the planet. They are simply accounts of everyday humanity in unprecedented times—ordinary people with doubts and concerns about how to live a decent life and act responsibly in a rapidly warming world. The authenticity of their voices is a testament to the moment of awakening to the climate crisis in British ornithology. Above all, *Low-Carbon Birding* is an urgent call for birders to leave a better legacy in the skies and across the living world.

Global Innovation Management J. Christopher Westland, 2017-09-16 This is an exciting new edition of a core textbook that explores innovation management from a global perspective. Innovation management is increasingly significant, both as an academic discipline and as an integral part of the way businesses seek to change and grow. However the key factors behind successful innovation and the process by which innovation is turned into profit in the global arena remain largely undefined. The new edition provides a unique answer to these questions and offers a step-by-step guide to innovation strategy development, taking into account the global context in which businesses today operate. Written by a highly experienced instructor, this is an ideal companion for undergraduate students of innovation as well as postgraduate and MBA students

taking modules with an innovation component. New to this Edition: -
 Completely rewritten and restructured to explore in more depth how innovative ideas are identified and strategized in an increasingly globalized world -
 Fully updated and extended case studies on world-leading companies -
 Increased attention to commercialized innovation, including factors such as intellectual property laws, technology acceleration and the competition for venture capital and finance - Coverage of new topics such as open innovation and service innovation - Expanded coverage of the tools and methods needed to understand financial gain and risk
