The Zoroastrian Diaspora John R. Hinnells, 2005-04-28 What is the distinctive Zoroastrian experience, and what is the common diasporic experience? The Zoroastrian Diaspora is the outcome of twenty years of research and of archival and fieldwork in eleven countries, involving approximately 250,000 miles of travel. It has also involved a survey questionnaire in eight countries, yielding over 1,840 responses. This is the first book to attempt a global comparison of Diaspora groups in six continents. Little has been written about Zoroastrian communities as far apart as China, East Africa, Europe, America, and Australia or on Parsis in Mumbai post-Independence. Each chapter is based on unused original sources ranging from nineteenth century archives to contemporary newsletters. The book also includes studies of Zoroastrians on the Internet, audio-visual resources, and the modern development of Parsi novels in English. As well as studying the Zoroastrians for their own inherent importance, this book contextualizes the Zoroastrian migrations within contemporary debates on Diaspora studies. John R. Hinnells examines what it is like to be a religious Asian in Los Angeles or London, Sydney or Hong Kong. Moreover, he explores not only how experience differs from one country to another, but also the differences between cities in the same country, for example, Chicago and Houston. The survey data is used firstly to consider the distinguishing demographic features of the Zoroastrian communities in various countries; and secondly to analyse different patterns of assimilation between different groups: men and women and according to the level and type of education. Comparisons are also drawn between people from rural and urban backgrounds; and between generations in religious beliefs and practices, including the preservation of secular culture.

Always Managing Harry Redknapp, 2013-10-10 The Sunday Times no.1 bestselling memoir from Harry Redknapp 'From kicking a ball as a kid under the street lamps of Poplar and standing on Highbury's North Bank with my dad, to my first game at West Ham, I was born head over heels in love with football. It saved me, and 50 years on that hasn't changed one bit - I'd be lost without it...' Harry is the manager who has seen it all - from a dismal 70s Portakabin at Oxford City and training pitches with trees in the middle to the unbeatable highs of the Premiership, lifting the FA Cup and taking on Real Madrid in the Champions League. With his much loved, no-nonsense delivery, Harry brings us a story filled with passion and humour that takes you right inside every drama of his career. Harry finally tells the full story of all the controversial ups and downs - the pain and heartache of his court case, the England job, his love for Bobby Moore, his adventures at Portsmouth with Milan Mandaric, the Southampton debacle, Tottenham and Daniel Levy, and not forgetting his years at West Ham or the challenges at his current club QPR. It's the epic journey of one of the great managers and, along the way, the story of the British game itself over the last five decades. In an era now dominated by foreign coaches Harry is the last of an old-fashioned breed of English football man - one who has managed to move with the times and always come out fighting.

MEMBRANE SEPARATION PROCESSES KAUSHIK NATH, 2017-01-01 This concise and systematically organized text, now in its second edition, gives a clear insight into various membrane separation processes. It covers the fundamentals as well as the recent developments of different processes along with their industrial applications and the products. It includes the basic principles, operating parameters, membrane hardware, flux equation, transport mechanism, and applications of membrane-based technologies. Membrane separation processes are largely rate-controlled separations which require rate analysis for complete understanding. Moreover, a higher level of mathematical analysis, along with the understanding of mass transfer, is also required. These are amply treated in different chapters of the book to make the students comprehend the membrane separation principles with ease. This textbook is primarily designed for undergraduate students of chemical engineering, biochemical engineering and biotechnology for the course in membrane separation processes. Besides, the book will also be useful to process engineers and researchers. KEY FEATURES • Provides sufficient number of examples of industrial applications related to chemical, metallurgical, biochemical and food processing industries. • Focuses on important biomedical applications of membrane-based technologies such as blood oxygenator, controlled drug delivery, plasmapheresis, and bioartificial organs. • Includes chapter-end short questions and problems to test students' comprehension of the subject. NEW TO THIS EDITION • A new section on membrane cleaning is included. Membrane fabrication methods are supplemented with additional information (Chapter 2). • Additional information on silt density index, forward osmosis and sea water desalination (Chapter 3). • Physicochemical parameters affecting nanofiltration, determination of various resistances using resistance in series model and few more industrial applications with additional short questions (Chapter 4). • Membrane cross-linking methods used in pervaporation, factors affecting pervaporation and few more applications (Chapter 9). • Membrane distillation, membrane reactor with different modules, types of membranes and reactions for membrane reactor (Chapter 13).

Treacherous Alliance Trita Parsi, 2007-10-01 This award-winning study traces the shifting relations between Israel, Iran, and the U.S. since 1948—including secret alliances and treacherous acts. Vitriolic exchanges between the leaders of Iran and Israel are a disturbingly common feature of the news cycle. But the real roots of their enmity mystify Washington policymakers, leaving no promising pathways to stability. In *Treacherous Alliance*, U.S.

foreign policy expert Trita Parsi untangles the complex and often duplicitous relationship among Israel, Iran, and the United States from 1948 to the present. In the process, he reveals shocking details of unsavory political maneuverings that have undermined Middle Eastern peace and disrupted U.S. foreign policy initiatives in the region. Parsi draws on his unique access to senior American, Iranian, and Israeli decision makers to present behind-the-scenes revelations that will surprise even the most knowledgeable readers: Iran's prime minister asks Israel to assassinate Khomeini; Israel reaches out to Saddam Hussein after the Gulf War; the United States foils Iran's plan to withdraw support from Hamas and Hezbollah; and more. Treacherous Alliance not only revises our understanding of the recent past, it also spells out a course for the future. The Romance of Tata Steel R M Lala, 2007-08-01 'Russi has captured the "touch and feel" of events in Tata Steel from its early days . . . he also succeeds in bringing to life the human side of the company in a very readable and cogent manner. The book is a valuable and interesting record of the company's evolution over its 100-year history, while at the same time being an enjoyable book to read.' –From the Foreword by Ratan N. Tata 'The hand of history has woven the tapestry of the Tatas. Just over a hundred years ago Jamsetji Tata requested the Secretary of State in PBI - India, Lord George Hamilton, for the co-operation of the British Raj in starting PBI - India's first steel works. On the hundredth anniversary of the registration of Tata Iron & Steel Company, the company won the bid to purchase the Anglo-Dutch steel giant CORUS. And so the wheel has turned a full circle.' R.M. Lala traces a hundred years and more of the exciting history of Tata Steel—from men searching for iron ore and coking coal in jungle areas, traversing in bullock carts before the site was found, to the company's modern status as a PBI - World-class company. He brings to life a seldom-voiced account of the courage, vision and commitment of the men who created PBI - India's first modern industrial venture which was to be the fountainhead of its industrial growth. The story Lala recounts is an eventful one of struggle for finances, of survival under unimaginable government controls, the evolution of incredibly humane labour practices (like an eight-hour work day much before it was a Western concept), the effort to compete as liberalization was ushered in, and Tata Steel's ultimate triumph. For over a hundred years, Tata Steel has promoted a culture of philanthropy perhaps unequalled in the corporate PBI - World. The Romance of Tata Steel is a moving and fascinating account that draws upon extensive archival material and rare photographs to paint a compelling story that all PBI - Indians can be proud of. This informed and objective book is a fitting tribute to an exceptional PBI - Indian company in its centenary year.

The Sasanian Era Vesta Sarkhosh Curtis,Sarah Stewart,2010-07-20 This latest volume in The Idea of Iran series concentrates on the Sasanian period. Seizing power from the previous dynasty - the Parthians - the Sasanians ruled Iran and most of the ancient Near East from 224 until 642 CE. They are particularly fascinating because of their adherence to Zoroastrianism, an ancient dualistic Iranian religion named after the prophet Zarathustra (or, in Greek, Zoroaster). The Sasanians expressed the divine aspect of their rule in a variety of forms, such as on coins, rock reliefs and silver plates, and architecture and the arts flourished under their aegis. Sasanian military success brought them into conflict with Rome, and later Byzantium. Their empire eventually collapsed under the force of the Arab army in AD 642, when Zoroastrianism was replaced with Islam.Engaging with all the major aspects of Sasanian culture, twelve eminent scholars address subjects which include: early Sasanian art and iconography; early Sasanian coinage; religion and identity in the Sasanian empire; later Sasanian orality and literacy; and state and society in late antique Iran. The volume in question arguably comprises the most complete and comprehensive treatment of the Sasanian civilization yet to be published in English.
