RC tank model making Gerhard O. W. Fischer, RC tank models are particularly popular with many model makers, which is probably due to the technology and the completely different control method of these models. Tracked vehicle models are mostly all-metal models, but a combined construction of metal and plastic has also become popular, especially for kits. Now, it is not everyone's cup of tea to handle metal. Not every model maker has the knowledge, the manual skills and the technical equipment to build a

tank model and to install the necessary electronics. For this group of interested people, the author describes the do-it-yourself construction of tank models with the help of kits. From the content: • armoured fighting vehicle IV • armoured fighting vehicle TIGER I • KÖNIGSTIGER armoured fighting vehicle • LEOPARD armoured combat vehicle • armoured fighting vehicle PANTHER A • and armoured fighting vehicle PANTHER G from Tamiya • Battle tank LEOPARD 2A5 from GRAUPNER • Transport tank FUCHS from AFV-model • Kits from Sonderfahrzeug-Modellbau Peter Müller: • Bergepanzer 3 BÜFFEL • Battle tank LEOPARD • anti-aircraft tank GEPARD • MARDER infantry fighting vehicle • and Airborne Tank WIESEL

Virtual and Remote Control Tower Norbert Fürstenau, 2022-07-01 This book presents the interdisciplinary and international “Virtual and Remote Tower” research and development work. It has been carried out since nearly twenty years with the goal of replacing the conventional aerodrome control tower by a new “Remote Tower Operation” (RTO) work environment for enhancing work efficiency and safety and reducing cost. The revolutionary human-system interface replaces the out-of-windows view by an augmented vision video panorama that allows for remote aerodrome traffic control without a physical tower building. It enables the establishment of a (multiple) remote control center (MRTO, RTC) that may serve several airports from a central location. The first (2016) edition of this book covered all aspects from preconditions over basic research and prototype development to initial validation experiments with field testing. Co-edited and -authored by DLR RTO-team members Dr. Anne Papenfuss and Jörn Jakobi, this second extended edition with nearly doubled number of chapters includes further important aspects of the international follow-up work towards the RTO-deployment. Focus of the extension with new contributions from ENRI/Japan and IAA/Dublin with Cranfield University, is on MRTO, workload, implementation, and standardization. Specifically, the two revised and nine new

Chapters put the focus on inclusion of augmented vision and virtual reality technologies, human-in-the-loop simulation for quantifying workload and deriving minimum (technical) requirements according to standards of the European Organization for Civil Aviation Equipment (EUROCAE), and MRTTO implementation and certification. Basics of optical / video design, workload measures, and advanced psychophysical data analysis are presented in four appendices.

Restoring and Upgrading Your Vintage Taiyo/Tyco RC Cars Chak Tin Yu, Rcpres Hobbypress, 2021-02-19 Learning about basic electronics and creating your own projects is a lot easier than you may think with the help of modern software such as TinkerCAD. TinkerCAD allows you to quickly build circuits using ready-made components. You can test the effect of your circuit using simulation. This capability allows you to install and adjust the electronic components bit by bit and test things out. It is this process that helps you learn electronics quickly. This book is all about Toy Grade RC car restoration and conversion to real RC. Remember the 80s where we had Taiyo, Nikko and Bandai producing RC buggies giving us endless hours of fun and enjoyment? After 30+ years these RC cars are seriously aged. For them to run again a lot of things have to be fixed. And the electronics are likely dead already so you may as well turn them into real RC by using real RC car electronics on them. We show you how these can be accomplished using real life examples. In this book, several Taiyo (aka Tyco) cars including the 1:12 Jet Fighter and JetHopper are converted to real RC step by step.
