The Oxford Handbook of Non-Synoptic Wind Storms Horia Hangan,Ahsan Kareem,2021-08-16 In different areas of the world, much of the damage due to wind is caused by non-synoptic, local wind storm events, such as tornadoes and downbursts. In North America the damage due to these winds is more than 65% of total wind damage, and there are no guidelines or code implementations to deal with such catastrophic events. As we enter the third decade of the twenty-first century, current research is in its first phase of addressing these types of events, from their characterization, simulation, and loading, to collapse-mode effects on buildings and structures, as well as socioeconomic implications. The need is clear to better understand non-synoptic local winds; properly simulate them; assess the difference in loading between these events and synoptic large-scale winds that have been part of the wind engineering practice for more than five decades; determine their statistics and associated risks; and apply this through guidelines, codes, risk mitigation, and adaptation responses to socioeconomic impact. The Oxford Handbook of Non-Synoptic Wind Storms, led by Dr. Horia Hangan and Dr. Ahsan Kareem, features nearly 30 chapters, contributed by an international panel of leading scientists, scholars, and engineers, that address these issues and stimulate thought, research, and responses to non-synoptic wind storm hazards in North America and worldwide. Together, these articles provide clear definitions of the problems to be tackled, offer a strategic framework for forward-looking research, identify the best-suited tools and methodologies to address the problems at hand, and suggest ways to maximize collaborative planning between the disciplines that will tackle these challenges.

Severe Convective Storms Charles Doswell,2015-03-30 This highly illustrated book is a collection of 13 review papers focusing on convective storms and the weather they produce. It discusses severe convective storms, mesoscale processes, tornadoes and tornadic storms, severe local storms, flash flood forecast and the electrification of severe storms.

Storm's Magical Halloween Trinity Blacio,2018-10-30 Can they give her a magical Halloween? Storm Lope is half pixie/half human and is known for her hot temper and her ability to hold a grudge. Storm learned to use both as self-defense to protect her fragile heart. Those defenses had worked well for her until she met two irritating men who refuse to be scared off. Nolan Moree and Matty Draco vow to break through Storm’s fiery walls. They almost lost her once. They weren’t going to take a chance of ever letting that happen again. With danger surrounding them, the men set out to give Storm a magical Halloween where nightmares are replaced with I dos, and Happy Ever Afters are real!

Frankenstorm Ray Garton,2014-05-26 Remember when paperback originals were cool? Sex, action, suspense? Try FRANKENSTORM. It's old school. —Stephen King A storm of epic proportions is brewing off the coast of northern California. Residents have been warned to prepare for disaster. It's a false hope in the face of what's coming. . . Frankenstorm In a secret government lab, virologist Fara McManus tries to stop an experiment out of control—before more human subjects are infected. But in a blazing hail of bullets, survivalist Ollie Monk launches a paramilitary attack on the lab, releasing the infected into the night. And as the nightmare escalates to a fever pitch, internet blogger Ivan Renner traces the destruction as it claims more victims, beginning with a single mother unknowingly spreading the virus. A father and son, held hostage by a lunatic. A local sheriff, single-handedly fighting madness, murder, and worse. No one will find shelter from this storm. Praise For Ray Garton Gripping, original, and sly.—Dean Koontz on Live Girls Garton will scare you.—Fangoria Includes Ray Garton's bonus story The Guy Down the Street
