Karin Nielsen-Saines

*Steel* Richard Matheson, 2011-09-27 Richard Matheson's classic short story is now the basis for *Real Steel*, a gritty, white-knuckle film starring Hugh Jackman. But *Steel*, which was previously filmed as a powerful episode of the original *Twilight Zone* television series, is just one of over a dozen unforgettable tales in this outstanding collection, which includes two new stories that have never appeared in any previous Matheson collection. Also featured is a bizarre satirical fantasy, *The Splendid Source*, that was turned into an episode of *The Family Guy*. Imagine a future in which the sport of boxing has gone high-tech. Human boxers have been replaced by massive humanoid robots. And former champions of flesh-and-blood are obsolete . . . . Richard Matheson was recently inducted into the Science Fiction Hall of Fame. *Steel: And Other Stories* demonstrates once again the full range of his legendary imagination. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Facts Still Can't Speak for Themselves** Eric Oliver, 2015-09-11 Today, most trial lawyers and consultants accept the fact that all legal decision makers decide cases by first making up their own version of the case story. Yet, few have yet to fully adjust their practices to meet the demands of that reality. *Facts Still Can't Speak for Themselves* offers specific methods for trial professionals to increase their reach into the full range of potential stories decision makers can construct (and will construct) during any single case, and then shows you how

to refine those stories into the one most compelling presentation for any legal decision maker to judge, in any legal decision-making venue. What you'll find inside: \* How the stories decision makers imagine affect verdicts as much as their backgrounds and beliefs or the attorney's presentation in court \* Which focus group method reveals the real range of stories decision makers can build from your case \* How to profitably apply focus group results in negotiations and mediation equally well as in trials \* How to run voir dire like a focus group (and a focus group like voir dire) improving both in the process and how to avoid common misleading mistakes \* How focus group deliberations are the least valuable part of the process \* How asking focus group participants which side in a case they "like" could be a major mistake \* Why you should think twice before ever again asking a "why" question or using the word "any" during voir dire or in focus groups \* How to establish immediate rapport with decision makers and to manage how they build their perceptions of your client's case story in time to affect their final judgments In this new edition, Eric Oliver dives deeply into cutting-edge research in communication, human judgment, perception, and influence and breaks down the process of turning theoretical abstractions into effective persuasive practices that help legal decision makers hear and see the case story from your client's point of view. Each chapter is now supplemented with some of the most relevant developments in the science of decision making, as well as with the decade of additional experience Eric has acquired working with trial lawyers and their clients since the first edition was published in 2005.

**Flexural-Torsional Buckling of Structures** N. S. Trahair,2017-11-13

Flexural-Torsional Buckling of Structures provides an up-to-date, comprehensive treatment of flexural-torsional buckling and demonstrates how to design against this mode of failure. The author first explains the fundamentals of this type of buckling behavior and then summarizes results that will be of use to designers and researchers in either equation or graphical form. This approach makes the book an ideal text/reference for students in structural engineering as well as for practicing civil engineers, structural engineers, and construction steel researchers and designers. The book begins by introducing the modern development of the theory of flexural-torsional buckling through discussions on the general concepts of equilibrium, total potential, virtual work, and buckling. It then continues with in-depth coverage of hand methods for solving buckling problems, the analysis of flexural-torsional buckling using the finite element method, and the buckling of different types of structural elements and frames composed of various elastic materials. Other topics addressed include the design and inelastic buckling of steel members. The book's final chapter considers a collection of special topics.

**Kosher Movies** Rabbi Herbert Cohen,2015-07-15

Crossing genres of films, this book contains movies that have lessons in them as a way of finding insights into daily life. While other critics summarize a film, focus on the amount of profanity and nudity it contains, and decide whether it's worthwhile to watch, Herbert Cohen takes a

different tactic and views films as life lessons. This collection of meaningful films, with inspiring and emotional stories that help understand the plight of others, provides new ways to approach self-growth.

**Making Steel** Mark Reutter, 2004 *Making Steel* chronicles the rise and fall of American steel by focusing on the fateful decisions made at the world's once largest steel mill at Sparrows Point, Maryland. Mark Reutter examines the business, production, and daily lives of workers as corporate leaders became more interested in their own security and enrichment than in employees, community, or innovative technology. This edition features 26 pages of photos, an author's preface, and a new chapter on the devastating effects of Bethlehem Steel's bankruptcy titled *The Discarded American Worker*.

Pure Fatherhood and the Hollywood Family Film Denise McNulty Norton, 2021-07-20 This book maps father failure and redemption through three decades of Hollywood family films, revealing how libertarian notions that align agency with autonomy lead to new conflicts for the contemporary father. The films find resolution to these conflicts through a re-gendering of parenting as relationship. In their creation of a 'pure' fatherhood that is valorised as authentic for its lack of parental responsibilities, the films serve to challenge the perception that fathering enacted outside the nuclear

family structure is fragile. McNulty Norton finds in the films a new essentialism that secures the pure relationship to the biological father, reinforcing his position in the face of changing family forms.
