Seducing Ingrid Bergman Chris Greenhalgh, 2014-03-18 The beautiful Casablanca star, the world's greatest war photographer, and the secret love affair that would change their lives forever . . . in Chris Greenhalgh's *Seducing Ingrid Bergman* June 1945. When Ingrid Bergman walks into the lobby of the Ritz hotel in Paris, war photographer Robert Capa is enchanted. From the moment he slips a mischievous invitation to dinner under her door, the two find themselves helplessly attracted. Played out against the cafés and nightclubs of post-war Paris and the parties and studios of Hollywood, they pursue an intense and increasingly reckless affair. But the light-hearted Capa, who likes nothing more than to spend his mornings reading in the tub and his afternoons at the racetrack, is not all that he seems. And Ingrid offers the promise of salvation to a man haunted by the horrors of war, his father's suicide, and the death of a former lover for which he blames himself. Addicted to risk, Capa must wrestle his devils, including gambling and drink, and resist an impulse to go off and photograph yet another war. Meanwhile, Ingrid, trapped in a passionless marriage and with a seven-year-old daughter to bring up, must court scandal and risk compromising her Hollywood career and saintly reputation if their love is to survive. With their happiness and identities at stake, both Capa and Ingrid are presented with terrible choices.

Viral Spiral David Bollier, 2008 From free and open-source software, Creative Commons licenses, Wikipedia, remix music video mashups and open science, digital media has spawned a new sharing economy in competition with media giants. Media journalist Bollier provides a comprehensive history of the attempts of this new 'free culture' community to create a digital republic committed to freedom and innovation. Interweaving disparate and eclectic strands of activity with major technological developments, pivotal legal struggles and case studies, Bollier exposes the magical processes of this era.'

Justice Interruptus Nancy Fraser,2014-04-23 Refuting the argument to choose between the politics of recognition and the politics of redistribution, Justice Interruptus integrates the best aspects of both.

***** ** What does it mean to think critically about politics at a time when inequality is increasing worldwide, when struggles for the recognition of difference are eclipsing struggles for social equality, and when we lack any credible vision of an alternative to the present order? Philosopher Nancy Fraser claims that the key is to overcome the false oppositions of postsocialist commonsense. Refuting the view that we must choose between the politics of recognition and the politics of redistribution, Fraser argues for an integrative approach that encompasses the best aspects of both.

Fortunes of Feminism Nancy Fraser,2013-04-24 Second Wave feminism emerged as a struggle for women's liberation and took its place alongside other radical movements. But feminism's subsequent immersion in identity politics coincided with a decline in its utopian energies and the rise of neoliberalism. Now, foreseeing a revival in the movement, Fraser argues for a reinvigorated feminist radicalism able to address the global economic crisis.

Religion, Ethnicity and Contested Nationhood in the Former Ottoman Space J. Rgen Nielsen,Jørgen S. Nielsen,2011-12-09 Building on the work of a new generation of historians, this volume presents twelve papers from all parts of the former Ottoman space, from the Middle East to the Balkans, showing new approaches to Ottoman provincial history.

The New Spirit of Capitalism Luc Boltanski,Eve Chiapello,2005 A century after the publication of Max Weber's *The Protestant Ethic and the Spirit of Capitalism* , a major new work examines network-based organization, employee autonomy and post-Fordist

horizontal work structures.

Equity in Education Oecd,2018-10-29 In times of growing economic inequality, improving equity in education becomes more urgent. While some countries and economies that participate in the OECD Programme for International Student Assessment (PISA) have managed to build education systems where socio-economic status makes less of a difference to students' learning and well-being, every country can do more. *Equity in Education: Breaking Down Barriers to Social Mobility* shows that high performance and more positive attitudes towards schooling among disadvantaged 15-year-old students are strong predictors of success in higher education and work later on. The report examines how equity in education has evolved over several cycles of the OECD Programme for International Student Assessment (PISA). It identifies the policies and practices that can help disadvantaged students succeed academically and feel more engaged at school. Using longitudinal data from five countries (Australia, Canada, Denmark, Switzerland, and the United States), the report also describes the links between a student's performance near the end of compulsory education and upward social mobility - i.e. attaining a higher level of education or working in a higher-status job than one's parents.

Video Games and Learning Kurt Squire,2011-07-09 Can we learn socially and academically valuable concepts and skills from video games? How can we best teach the “gamer generation”? This accessible book describes how educators and curriculum designers can harness the participatory nature of digital media and play. The author presents a comprehensive model of games and learning that integrates analyses of games, game culture, and educational game design. Building on more than 10 years of research, Kurt Squire tells the story of the emerging field of immersive, digitally mediated learning environments (or games) and outlines the future of education. Featuring engaging stories from the author’s experiences as a game researcher, this book:

Explores the intersections between commercial game design for entertainment and design-based research conducted in schools. Highlights the importance of social interactions around games at home, at school, and in online communities. Engages readers with a user-friendly presentation, including personal narratives, sidebars, screenshots, and annotations. Offers a forward-looking vision of the changing audience for educational video games.

Is Technology Good for Education? Neil Selwyn, 2016-06-07

Digital technologies are a key feature of contemporary education. Schools, colleges and universities operate along high-tech lines, while alternate forms of online education have emerged to challenge the dominance of traditional institutions. According to many experts, the rapid digitization of education over the past ten years has undoubtedly been a 'good thing'. *Is Technology Good For Education?* offers a critical counterpoint to this received wisdom, challenging some of the central ways in which digital technology is presumed to be positively affecting education. Instead Neil Selwyn considers what is being lost as digital technologies become ever more integral to education provision and engagement. Crucially, he questions the values, agendas and interests that stand to gain most from the rise of digital education. This concise, up-to-the-minute analysis concludes by considering alternate approaches that might be capable of rescuing and perhaps revitalizing the ideals of public education, while not denying the possibilities of digital technology altogether.

What is Digital Sociology? Neil Selwyn, 2019-07-12 The rise of digital technology is transforming the world in which we live. Our digitalized societies demand new ways of thinking about the social, and this short book introduces readers to an approach that can deliver this: digital sociology. Neil Selwyn examines the concepts, tools and practices that sociologists are developing to analyze the intersections of the social and the digital. Blending theory and empirical examples, the five chapters highlight areas of inquiry where digital approaches are taking hold and shaping the

discipline of sociology today. The book explores key topics such as digital race and digital labor, as well as the fast-changing nature of digital research methods and diversifying forms of digital scholarship. Designed for use in advanced undergraduate and graduate courses, this timely introduction will be an invaluable resource for all sociologists seeking to focus their craft and thinking toward the social complexities of the digital age.

A Brief Account of the Destruction of the Indies

Bartolomé de las Casas, 2020-03-16 Witness the chilling chronicle of colonial atrocities and the mistreatment of indigenous peoples in 'A Brief Account of the Destruction of the Indies'. Written by the compassionate Spanish Dominican friar Bartolomé de las Casas in 1542, this harrowing account exposes the heinous crimes committed by the Spanish in the Americas. Addressed to Prince Philip II of Spain, Las Casas' heartfelt plea for justice sheds light on the fear of divine punishment and the salvation of Native souls. From the burning of innocent people to the relentless exploitation of labor, the author unveils a brutal reality that spans across Hispaniola, Puerto Rico, Jamaica, and Cuba.

Psi Spies Jim Marrs, 2007-01-01 Takes readers behind the scenes of the U.S. Army's formerly top-secret remote viewing unit, discussing how the military has used this psychic ability to its advantage since the unit's creation in the 1970's.

Understanding Theatre Marco De Marinis, 2023-05-04 Over the past three decades, theater studies has undergone a radical worldwide development and renewal. This happened through two different yet complementary paths: the first (North American in origin) led to the birth of the discipline of performance studies; the second (European continental) is what Marco de Marinis calls new teatrology. New teatrology arises from the dialogue between theatre history and the humanities and social sciences, yet de Marinis also characterizes it by a strong experimental imprint resulting from a close and participatory relationship with theatrical practice and its players. The first part of *Understanding Theatre*

retraces the main steps that brought theater studies to make the transition from performance to the audience to their receptive act, giving proper attention to the documentary element. In the second part, de Marinis tests the new perspective of investigation on some fundamental innovative theatrical experiences of the twentieth century. In this way, the volume collects de Marinis's essays--written for magazines, conference programs, and edited collections--from a span of almost thirty years and documents key post-semiological developments in how we understand theater today.

Translation and Web Localization Miguel A. Jimenez-Crespo, 2013-11-07 Web localization is a cognitive, textual, communicative and technological process by which interactive web texts are modified to be used by audiences in different sociolinguistic contexts. *Translation and Web Localization* provides an in-depth and comprehensive overview into this emerging field of study. The book covers the key areas and main theoretical and practical approaches of the subject, rather than a step by step practical guide. Topics covered include the often controversial definition of localization, how the process develops, what constitutes a text in this process, digital genre theory and its implications, and how to conduct research or training in this field. The book concludes with a look into the dynamic nature of web localization and the forces, such as crowdsourcing, that are reshaping web localization and translation as we know it. In light of the deep changes brought by the Internet, *Translation and Web Localization* is an indispensable book for researchers, postgraduate and advanced undergraduate students of translation studies, as well as practitioners and researchers in related fields such as computational linguistics, applied linguistics, Internet linguistics, digital genre theory and web development.

Legitimation Crisis Juergen Habermas, 1975-08-25 Critical Theory originated in the perception by a group of German Marxists after the First World War that the Marxist analysis of capitalism

had become deficient both empirically and with regard to its consequences for emancipation, and much of their work has attempted to deepen and extend it in new circumstances. Yet much of this revision has been in the form of piecemeal modification. In his latest work, Habermas has returned to the study of capitalism, incorporating the distinctive modifications of the Frankfurt School into the foundations of the critique of capitalism. Drawing on both systems theory and phenomenological sociology as well as Marxism, the author distinguishes four levels of capitalist crisis - economic, rationality, legitimation, and motivational crises. In his analysis, all the Frankfurt focus on cultural, personality, and authority structures finds its place, but in a systematic framework. At the same time, in his sketch of communicative ethics as the highest stage in the internal logic of the evolution of ethical systems, the author hints at the source of a new political practice that incorporates the imperatives of evolutionary rationality.

Shipwrecked Body Ana Clavel, 2008

Working with Portuguese Corpora Tony Berber Sardinha, Telma de Lurdes São Bento Ferreira, 2014-04-10 Although Portuguese is one of the main world languages and researchers have been working on Portuguese electronic text collections for decades (e.g. Kelly, 1970; Biderman, 1978; Bacelar do Nascimento et al., 1984; see Berber Sardinha, 2005), this is the first volume in English that encapsulates the exciting and cutting-edge corpus linguistic work being done with Portuguese language corpora on different continents. The book includes chapters by leading corpus linguists dealing with Portuguese corpora across the world, and their contributions explore various methods and how they are applicable to a wide range of language issues. The book is divided into six sections, each covering a key issue in Corpus Linguistics: lexis and grammar, lexicography, language teaching and terminology, translation, corpus building and sharing, and parsing and annotation. Together these sections present the reader with a

broad picture of the field.

Post-editing of Machine Translation Laura Winther Balling, Michael Carl, Sharon O'Brian, 2014-03-17 Post-editing is possibly the oldest form of human-machine cooperation for translation. It has been a common practice for just about as long as operational machine translation systems have existed. Recently, however, there has been a surge of interest in post-editing among the wider user community, partly due to the increasing quality of machine translation output, but also to the availability of free, reliable software for both machine translation and post-editing. As a result, the practices and processes of the translation industry are changing in fundamental ways. This volume is a compilation of work by researchers, developers and practitioners of post-editing, presented at two recent events on post-editing: The first Workshop on Post-editing Technology and Practice, held in conjunction with the 10th Conference of the Association for Machine Translation in the Americas, held in San Diego, in 2012; and the International Workshop on Expertise in Translation and Post-editing Research and Application, held at the Copenhagen Business School, in 2012.

The Colour Monster Anna Llenas, 2018-06 One day, Colour Monster wakes up feeling very confused. His emotions are all over the place; he feels angry, happy, calm, sad and scared all at once! To help him, a little girl shows him what each feeling means through colour. A gentle exploration of feelings for young and old alike.
