**Party Finance and Political Corruption** R. Williams, 2000-08-10 This book offers an in-depth examination of party finance and political corruption in a variety of political contexts. Its central focus is on the relationship between different forms of raising party finance and the consequent implications for improper influence over policy making and implementations. It presents both a general discussion of the issues and a set of case studies which illuminate the particular experiences of Britain, the United States, Russia, Italy, Germany and Southeast Asia.

**Symptoms of Modernity** Matti Bunzl, 2004-02-03 This book is an ethnography of Central European modernity in the form of a comparative study of Jews and queers in late twentieth-century Vienna.

**Comparative Issues in Party and Election Finance** F. Leslie Seidle, 1991-01-01 This book is one of 23 volumes of research commissioned by the Royal Commission on Electoral Reform and Party Financing, and one of five volumes within this series dealing specifically with party and election finance. Because the issue of money in elections is as old as democracy, the experience of other countries is instructive. The studies in this volume offer Canadians information about approaches to funding political parties and elections in the United States and Western Europe. The studies by Herbert Alexander and Robert Mutch examine how the United States has approached issues such as contribution limits and the disclosure of election finances. The latter study provides explicit comparisons to Canada, noting the constitutional role of the Supreme Court in each country. Jane Jenson draws on Western European experience to propose and assess reforms for the public funding for party foundations is documented by Michael Pinto-Duschinsky. The studies approach their material from a historical perspective, noting the uniqueness of the constitutions, institutions, and traditions of the countries reviewed. The authors provide background essential to any consideration of whether foreign experience might serve as a model for Canada.

*The German Political Foundations As Actors in Democracy Assistance* Alexander Mohr, 2010 In Germany, political foundations (Stiftungen) play an important role in shaping civil society through political democracy education. The foundations, however, have also committed themselves to strengthening democratic political and societal structures abroad. Their joint mission abroad is the contribution to democratic structures, information and debate in the countries and regions they are working in. They complement the official German foreign policy, but choose their own priorities and strategies. The focus of this thesis is the German political foundations as actors in democracy assistance. 'Democracy assistance' focuses less on the aspects of technical assistance but much more on political parties and the promotion of civil society as the backbone of democracy. Democracy assistance is a relatively recent international development activity of governments and international organizations. In recent years the international community has come to realize the importance of political parties and a well-functioning political party system for the process of democratisation. Here the German political foundations are working internationally as actors in democracy assistance - independent from the German government but at the same time fully state-funded. The objectives of

this dissertation are to understand the work and strategies of the German political foundations as actors in the context of democracy assistance abroad, research their partner spectrums on selected countries, to identify their short comings and to give an outlook of the foundations work in the future in the fast-changing global political environment.

The guide includes basic data of these parties (founding years, political orientations, affiliations to political parties at European level, European Parliament groups and political internationals) and a chronological summary of their history (predecessors, name changes, mergers and splits).

Relearning History Joe Regembogen, 2018-01-15 For many students, the traditional approach to the study of history does not work. The litany of facts arranged in a chronological sequence often turns out to be mind numbing and forgettable. In addition, they see little relevance between the past and the world they live in today. *Relearning History* was written for those students. Instead of reviewing the traditional time line of the past, the focus is directed at questions relevant to the present. Why does the two-party system dominate American politics? Why is wealth so unevenly distributed? Why does race and gender still play such a large role in modern society? Why has there never been a World War Three? These "why" questions, along with 11 others, serve as the foundation for a discussion of history so that the study of the past is inexorably linked to a enhanced understanding of the present. Students who are currently enrolled in history classes can use *Relearning History* to supplement and enrich the traditional curriculum. Some may even want to use it in place of the traditional curriculum. As for those adults who have completed their formal education and never learned much in their earlier history classes, this book will give them the chance to finally study history in a meaningful manner.

Power and Influence after the Cold War Ann L. Phillips, 2000-05-30 Challenging conventional wisdom about German dominance in the new Europe, this study presents a new approach to the question of power and influence after the Cold War. Ann L. Phillips's analysis of German relations with East-Central Europe convincingly demonstrates how the interplay of domestic and international politics has rewritten the terms of power and influence in the region. The author develops two new cases—the politics of reconciliation and the activities of German party-affiliated foundations—to explore the international-domestic connection and contribute new empirical evidence to the debate over German hegemony.

The German Greens Margit Mayer, John Ely, 1998 The Greens have been not only a political force and social conscience for Germany before reunification and after but also an inspiration to political groups and movements in many other countries. The Greens have raised the issues of ecology, gender, and grassroots democracy in protest against government. They have also had the rare opportunity to try converting themselves into a political party that works within the system. This is a book about their paradoxical situation and about the dilemmas all advocates of change face when they become powerful enough to negotiate with the status quo. The critical essays by German social scientists and activists also provide a detailed picture of the dynamics of the German Greens—where their support has come from, The nature of the competing factions, And The place of feminism. The editors provide a substantial introduction. The flavor and texture of the Greens—including their raucous public arguments and their innovative campaign tactics—are suggested by the political posters included in the book and by a whole section of primary documents. The documents And The essays (except for one originally written in English) have been translated from German. The result is to make available to English-speaking readers a view of a complex movement whose very name and color have become synonymous with social action in favor of the environment And The empowerment of people. Author note: Margit Mayer is Professor of Politics at the Free University of Berlin. She has also taught at the New School for Social Research And The University of California, Santa Cruz. John Ely is a long-time commentator on social movements in Germany.

**Varieties of Feminism** Myra Ferree, 2012-03-07 Varieties of Feminism investigates the development of German feminism by contrasting it with women's movements that arise in countries, like the United States, committed to liberalism. With both conservative Christian and social democratic principles framing the feminist discourses and movement goals, which in turn shape public policy gains, Germany provides a tantalizing case study of gender politics done differently. The German feminist trajectory reflects new political opportunities created first by national reunification and later, by European Union integration, as well as by historically established assumptions about social justice, family values, and state responsibility for the common good. Tracing the opportunities, constraints, and conflicts generated by using class struggle as the framework for gender mobilization—juxtaposing this with the liberal tradition where gender and race are more typically framed as similar—Ferree reveals how German feminists developed strategies and movement priorities quite different from those in the United States.

*Think Tanks, Foreign Policy and Geo-Politics* Donald Abelson, Stephen Brooks, Xin Hua, 2016-09-13 Questions about the role and influence of think tanks in matters of foreign policy and geopolitics are both timely and

important. The reconfiguration of global power, explosion of social media, shifts away from traditional print and oral-based ways of imparting knowledge, and the dramatic increase in the volume of information and ideas clamoring for the attention of policy-makers are changing the landscape of foreign policy-making and the pathways through which influence is achieved. This book explains the impact of think tanks on the framing of domestic and international conversations on matters of foreign policy and geopolitics. An international group of prominent experts examine these issues in specific countries and also across national and regional borders to better understand how governments and actors in civil society are influenced by the activities of think tanks.

Consolidating the Third Wave Democracies Larry Diamond, 1997-08-13 An in-depth analysis of the struggle to consolidate new and fragile democracies—available two paperback volumes for course use. The global trend that Samuel P. Huntington has dubbed the third wave of democratization has seen more than 60 countries experience democratic transitions since 1974. While these countries have succeeded in bringing down authoritarian regimes and replacing them with freely elected governments, few of them can as yet be considered stable democracies. Most remain engaged in the struggle to consolidate their new and fragile democratic institutions. Consolidating the Third Wave Democracies provides an in-depth analysis of the challenges that they face. Consolidating the Third Wave Democracies is available in two paperback volumes, each introduced by the editors and organized for convenient course use. The first paperback volume, Themes and Perspectives, addresses issues of institutional design, civil-military relations, civil society, and economic development. It brings together some of the world's foremost scholars of democratization, including Robert A. Dahl, Samuel P. Huntington, Juan J. Linz, Guillermo O'Donnell, Adam Przeworski, Philippe C. Schmitter, and Alfred Stepan. The second paperback volume, Regional Challenges, focuses on developments in Southern Europe, Latin America, Russia, and East Asia, particularly Taiwan and China. It contains essays by leading regional experts, including Yun-han Chu, P. Nikiforos Diamandouros, Thomas B. Gold, Michael McFaul, Andrew J. Nathan, and Hung-mao Tien.

**The Movement Toward a New Social and Political Consciousness in Postwar German Prose** Charlotte W. Ghurye, 1971 There is evidence in post World War II literature that a new social and political consciousness has emerged among contemporary German writers. Many of their works are «engagierte Literatur», that is works appraising the recent historical past and showing a deep concern for the future of Germany. The writers express a serious feeling of responsibility for a sound, liberal government and for the well-being of German society. The study is limited, however, to West German writers who remained in their country during the Third Reich era and it excludes the emigrant writers who either returned to their homeland after 1945 or continued to live abroad.
