Autonomous Vehicle Ethics Ryan Jenkins,David Cerny,Tomas Hribek,2022 A runaway trolley is speeding down a track So begins what is perhaps the most fecund thought experiment of the past several decades since its invention by Philippa Foot. Since then, moral philosophers have applied the trolley problem as a thought experiment to study many different ethical conflicts - and chief among them is the programming of autonomous vehicles. Nowadays, however, very few philosophers accept that the trolley problem is a perfect analogy for driverless cars or that the situations autonomous vehicles face will resemble the forced choice of the unlucky bystander in the original thought experiment. This book represents a substantial and purposeful effort to move the academic discussion beyond the trolley problem to the broader ethical, legal, and social implications that autonomous vehicles present. There are still urgent questions waiting to be addressed, for example: how AVs might interact with human drivers in mixed or hybrid traffic environments; how AVs might reshape our urban landscapes; what unique security or privacy concerns are raised by AVs as connected devices in the Internet of Things; how the benefits and burdens of this new technology, including mobility, traffic congestion, and pollution, will be distributed throughout society; and more. An attempt to map the landscape of these next-generation questions and to suggest preliminary answers, this volume draws on the disciplines of philosophy, sociology, economics, urban planning and transportation engineering, business ethics and more, and represents a global range of perspectives.

Watching Sympathetic Perpetrators on Italian Television Dana Renga,2019-02-11 This book offers the first comprehensive study of recent, popular Italian television. Building on work in American television studies, audience and reception theory, and masculinity studies, *Sympathetic Perpetrators and their Audiences on Italian Television* examines how and why viewers are positioned to engage emotionally with—and root for—Italian television antiheroes. Italy's most popular exported series feature alluring and attractive criminal antiheroes, offer fictionalized accounts of historical events or figures, and highlight the routine violence of daily life in the mafia, the police force, and the political sphere. Renga argues that Italian broadcasters have made an international name for themselves by presenting dark and violent subjects in formats that are visually pleasurable and, for many across the globe, highly addictive. Taken as a whole, this book investigates what recent Italian perpetrator television can teach us about television audiences, and our viewing habits and preferences.

The book provides practical suggestions from the authors' experiences together with those of other women who have successfully combined parenting with professorships. Professor Mommy addresses key questions—when to have children and how many, what kinds of academic institutions are the most family friendly, how to negotiate around the myths that many people hold about academic life, etc.—for women throughout all stages of their academic careers, from graduate school through full professor. Written in clear, jargon-free prose, the book is accessible to women in all disciplines, with concise chapters for the time-constrained academic. The book's conversational tone is supplemented with a review of the most current scholarship on work/family balance and a survey of emerging family-friendly practices at U.S. colleges and universities. Professor Mommy asserts that the faculty mother has become and will remain a permanent fixture on the landscape of the American academy.The paperback edition features a new Preface that addresses the public conversation about mothers and work raised in Sheryl Sandberg's *Lean In* and Ann Marie Slaughter's *Why Women Still Can't Have it All*. The Shop on Royal Street Karen White,2023-03-21 Nola Trenholm is hopeful for a fresh start in the Big Easy but must deal with ghosts from her past—as well as new ones—in this first book in a spin-off series of Karen White's New York Times bestselling Tradd Street novels. After a difficult detour on her road to adulthood, Nola Trenholm is looking to begin anew in New Orleans, and what better way to start her future than with her first house? But the historic fixer-upper she buys comes with even more work than she anticipated when the house's previous occupants don't seem to be ready to depart. Although she can't communicate with ghosts like her stepmother can, luckily Nola knows someone in New Orleans who is able to—even if he's the last person on earth she wants anything to do with ever again. Beau Ryan comes with his own dark past—a past that involves the disappearance of his sister and parents during Hurricane Katrina—and he's connected to the unsolved murder of a woman who once lived in the old Creole cottage Nola is determined to make her own...whether the resident restless spirits agree or not.

The Flipped Classroom Carl Reidsema, Lydia Kavanagh, Roger Hadgraft, Neville Smith, 2017-02-27 Teaching and learning within higher education continues to evolve with innovative and new practices such as flipped teaching. This book contributes to the literature by developing a much deeper understanding of the complex phenomenon of flipped classroom approaches within higher education. It also serves as a practical guide to implementing flipped classroom teaching in academic practice across different higher educational institutions and disciplines. Part 1 of this book (Practice) describes the considerations involved in flipped classroom teaching, including the challenges faced in transforming teaching and learning within higher education. Further, it reviews the educational concepts on which the flipped classroom is based, including a selected history of similar innovations in the past. The final sections of Part 1 explore the tools needed for flipping, the design steps, assessment methods and the role of reflective practice within flipped teaching environments. Part 2 of the book (Practices) provides a range of case studies from higher educational institutions in different countries and disciplines to demonstrate the many shapes and sizes of flipped classrooms. Many of the challenges, such as engaging students in their own learning and shifting them from spectators in the learning process to active participants, prove to be universal.

From Testing to Productive Student Learning David Carless, 2012-03-12 Research evidence indicates that formative assessment is one of the most effective ways of enhancing student learning. It is, however, difficult to implement successfully, principally because what is tested through summative assessment has such a powerful influence on teacher and student actions. This book scrutinizes the relationship between testing and learning from alternative perspectives to the dominant literature from the major Anglophone countries. It develops the notion of contextually grounded formative assessment practices by analyzing data from schools in the Confucian-heritage setting of Hong Kong. It explores questions such as: • Under what circumstances do tests support or hinder student learning? • How can teachers effectively prepare students for tests and appropriately follow up after tests? • What are the key socio-cultural influences impacting on testing and student learning in the classroom? • How do teachers change in their orientation towards assessment and what support do they require? This text is a valuable resource for education students, professionals and researchers, policy-makers and curriculum developers.

I Am Malala Malala Yousafzai, 2013-10-08 A MEMOIR BY THE YOUNGEST RECIPIENT OF THE NOBEL PEACE PRIZE As seen on Netflix with David Letterman I come from a country that was created at midnight. When I almost died it was just after midday. When the Taliban took control of the Swat Valley in Pakistan, one girl spoke out. Malala Yousafzai refused to be silenced and fought for her right to an education. On Tuesday, October 9, 2012, when she was fifteen, she almost paid the ultimate price. She was shot in the head at point-blank range while riding the bus home from school, and few expected her to survive. Instead, Malala's miraculous recovery has taken her on an extraordinary journey from a remote valley in northern Pakistan to the halls of the United Nations in New York. At sixteen, she became a global symbol of peaceful protest and the youngest nominee ever for the Nobel Peace Prize. I AM MALALA is the remarkable tale of a family uprooted by global terrorism, of the fight for girls' education, of a father who, himself a school owner, championed and encouraged his daughter to write and attend school, and of brave parents who have a fierce love for their daughter in a society that prizes sons. I AM MALALA will make you believe in the power of one person's voice to inspire change in the world.
