The Storm Ivor van Heerden, Mike Bryan, 2006-05-18 The ultimate inside story of the Katrina tragedy—from the cofounder of the LSU Hurricane Center After warning for years about the looming threat of catastrophic flooding in New Orleans, Ivor van Heerden was one of the highest-profile media experts during the Katrina disaster. Over the following eighteen months, he was even more prominent as

he challenged the official version of those events and campaigned for an engineering plan that would protect all of southeastern Louisiana, once and for all. In *The Storm*, van Heerden lays out in full detail the stunning incompetence among the bureaucrats, the politicians, and the Army Corps of Engineers that culminated in the catastrophe that crippled, perhaps forever, a great American city.

The Last Drop Tim Smedley, 2023-06-15 'Smart, sobering, and scholarly.' - Steve Brusatte, the Sunday Times bestselling author of *The Rise and Fall of Dinosaurs* A gripping, thought-provoking and ultimately optimistic investigation into the world's next great climate crisis - the scarcity of water. Water scarcity is the next big climate crisis. Water stress - not just scarcity, but also water-quality issues caused by pollution - is already driving the first waves of climate refugees. Rivers are drying out before they meet the oceans and ancient lakes are disappearing. It's increasingly clear that human mismanagement of water is dangerously unsustainable, for both ecological and human survival. And yet in recent years some key countries have been quietly and very successfully addressing water stress. How are Singapore and Israel, for example - both severely water-stressed countries - not in the same

predicament as Chennai or California? In *The Last Drop*, award-winning environmental journalist Tim Smedley meets experts, victims, activists and pioneers to find out how we can mend the water table that our survival depends upon. He offers a fascinating, universally relevant account of the environmental and human factors that have led us to this point, and suggests practical ways to address the crisis, before it's too late.

What Stands in a Storm Kim Cross, 2016-03 Enter the eye of the storm in this gripping real-life thriller—*A Perfect Storm* on land—that chronicles America's biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it's a story of survival; for others it's the story of their last hours. Cross's immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that's just as real: in times of trouble, the things that tear our world apart reveal what

holds us together.

Voices from the Storm Lola Vollen,Chris

Ying,2015-10-01 Hurricane Katrina inflicted damage on a scale unprecedented in American history, nearly destroying a major city and killing thousands of its citizens. With far too little help from indifferent, incompetent government agencies, the poor bore the brunt of the disaster. The residents of traditionally impoverished and minority communities suffered incalculable losses and endured unimaginable conditions. And the few facilities that did exist to help victims quickly became miserable, dangerous places. Now, the victims of Hurricane Katrina find themselves spread across the United States, far from the homes they left and faced with the prospect of starting anew. Families are struggling to secure jobs, homes, schools, and a sense of place in unfamiliar surroundings. Meanwhile, the rebuilding of their former home remains frustrating out of their hands. This bracing read brings readers to the heart of the disaster and its aftermath as those who survived it speak with candor and eloquence of their lives then and now.

Narrating the Storm Kristen Barber, Danielle A.

Hidalgo, 2009-03-26 For those interested in learning more about the personal impact of Hurricane Katrina and its aftermath, *Narrating the Storm* serves as an essential read. This important and timeless volume is a compilation of sixteen narratives that address the experiences of Gulf Coast residents, faculty, and graduate students who were caught up in the largest (not so) natural disaster in United States history. Each contributor deploys storytelling sociology as a methodological approach in order to illustrate how "personal" experiences with disaster are not so personal, but rather reflect and are informed by larger social phenomena related to issues including race, class, gender, age, bureaucracy, risk, collective memory, the blasé, and more. The narratives in this volume exemplify how inequality and injustice are unveiled, exacerbated, and created by the occurrence of disaster; and reveal the sociological in everyday and not-so-everyday experiences.
