Repurposed Noe Garcia,2021-10-19 Have you ever thought your life is beyond repair? Perhaps you asked, “How could God possibly use my brokenness for good?” We all tend to look for purpose in our pain. We are broken people living in a broken world. Depression, anxiety, hurting relationships, unmet expectations, and just that constant feeling of unease and discouragement make us question God, wondering if there is even a purpose to be found. In *Repurposed*, Noe Garcia takes readers on a journey through Romans 8, which many have called “The Greatest Chapter in the Bible.” Noe shares his life story, including abuse, depression, and overwhelming hopelessness. He reveals how God has redeemed him, repaired his brokenness, and restored him to new life. Whether your life is like Noe's was, or your brokenness looks different, this book will meet you where you are, and: Provide hope for your future. Remind you of the promise that God is for you. Lead you to surrender your brokenness to God. Help you see how God is using all things together for your good.

TIM FLANNERY Life throws us mysterious ingredients. If we are brave enough to put the recipe aside and experiment, it's right there that things get interesting. But when Ronni Kahn hit midlife, she found herself no longer able to turn a blind eye to her food waste problem. Hand delivering the untouched food to homeless shelters around Sydney became her renegade solution. Little did she know that fixing her small problem at work would lead her to unlock a hidden purpose at the very core of her inner life. Now founder and CEO of the food rescue organisation OzHarvest, Ronni leads hundreds of staff and thousands of volunteers with the goal to nourish Australia. She serves in an advisory capacity to government and is an instrumental leader in changing federal laws to improve social justice and environmental policies. *A Repurposed Life* is the story of how Ronni found her voice, her heart and her deepest calling. From her early years growing up under the brutal system of apartheid South Africa, to a socialist commune in Israel, Ronni finally settled in Australia to discover a profound new way of living. Shared with the humour, warmth and energy that have made her an internationally renowned keynote speaker, this heartfelt exploration of the choices that define us will speak to anyone seeking a more passionate expression of being alive.

Repurposed Rebels Mariam Bjarnesen,2020-09-15 Despite peace agreements, demobilization, and reintegration processes, the end of war does not automatically or necessarily make combatants abandon their wartime rebel networks. In Liberia such structures have lingered long after the civil war came to an end in 2003. Weak formal security institutions with a history of predatory behavior have contributed to the creation of an environment where informal initiatives for security and protection are called upon. In fragile postwar settings, former soldiers can be used as intimidators but have paradoxically reemerged as security providers, challenging our understanding of both the setting and the actors beyond the sphere of war. Based on original interview material and findings from fieldwork, *Repurposed Rebels* follows former rebel soldiers from the time of civil war to 2013. These actors have reemerged as “recycled” warriors in times of regional wars and crisis and as vigilantes and informal security providers for economic and political purposes. Through these actors, Mariam Bjarnesen examines the relevance of postwar rebel networks and ex-combatant identity in contemporary Liberia, with an eye to understanding the underlying aims of demobilization when reintegration is challenged. Bjarnesen argues that these ex-combatants have succeeded in reintegrating themselves due to, not despite, the fact that they have not been truly demobilized.

The Repurposed Library Lisa Occhipinti, 2019-11-26 “How-to instructions on crafting with books . . . will inspire you to think about creative ways to make new treasures out of old things” (The Virginian-Pilot). We all love to read and learn from books, but The Repurposed Library takes our passion even further, presenting us with thirty-three projects to make—quite literally—out of books. For these projects, Lisa Occhipinti rescues and repurposes orphaned and outdated books from flea markets and library sales and turns them into new art objects and practical items for the home. Her creations range from artfully constructed mobiles, wreaths, and vases, to functional items like shelves, storage boxes, and even a Kindle “keeper” for those who want to replicate the sensation of holding a “real” book while reading from an e-reader. Projects utilize every imaginable part of a book—from hardback cover to individual pages—and are a DIY celebration of a new way to view a book’s potential. “Occhipinti’s ‘repurposed’ books are truly beautiful art objects, and whether or not you’re crafty enough to give them a try yourself, her book is thoroughly enjoyable.” —Fine Books and Collections “She shows readers how to transform books into mobiles, lamp shades, even clocks.” —National Post

Repurposing Composition Shari J. Stenberg, 2015-09-23 In Repurposing Composition, Shari J. Stenberg responds to the increasing neoliberal discourse of academe through the feminist practice of repurposing. In doing so, she demonstrates how tactics informed by feminist praxis can repurpose current writing pedagogy, assessment, public engagement, and other dimensions of writing education. Stenberg disrupts entrenched neoliberalism by looking to feminism’s long history of repurposing “neutral” practices and approaches to the rhetorical tradition, the composing process, and pedagogy. She illuminates practices of repurposing in classroom moments, student writing, and assessment work, and she offers examples of institutions, programs, and individuals that demonstrate a responsibility approach to teaching and learning as an alternative to top-down accountability logic. Repurposing Composition is a call for purposes of work in composition and rhetoric that challenge neoliberal aims to emphasize instead a public-good model that values difference, inclusion, and collaboration.

Repurposing the Past Bob White, 2021-06-22 Nazi Submarines? Life-and-death battles with huge rats? The Cuban Missile Crisis? The assassination of JFK? These are not the predictable topics you'd typically associate with a book that appears to be about cleaning up toxic, abandoned industrial sites, urban redevelopment, economic growth, and job creation. But if your name is Bob White, they're all part of an improbable journey from naive farm boy, to Cold War-era U.S. Marine, to the executive directorship of the Redevelopment Authority of the County of Bucks. He's been referred to as a beefy, fast-talking construction expert, a larger-than-life visionary, a superstar in economic development, and numerous other glowing accolades by Bucks County's press, politicians, and redevelopment and real estate industry executives. There's good reason for that: During Bob White's tenure at the helm of Bucks County's Redevelopment Authority, more than 50 large-scale, transformative projects were completed and over 20,000 jobs were saved or generated in the process. Dozens of environmentally contaminated, blighted buildings—relics from the county's past glory years as a major East Coast manufacturing center—were replaced by beautiful parks, sparkling office complexes, research centers, upscale residential communities, new roadways, and a thriving deepwater port. Repurposing the Past is HGTV on an industrial scale. In addition to Bob's unique and inspiring story, this new and unique book gives you a ringside seat to several dozen of his most significant, far-reaching projects. More than 80 photos provide a before and after look at each site, along with a narrative depicting its history, the environmental challenges and remediations involved, and the demolitions, budgets, grants, redevelopment plans, and community and political participation that helped Bucks County boldly step into the 21st century. Whether you're a student or a professional in the fields of environmental sciences, economic development, and urban studies, or you're simply looking to read a unique, inspiring story, Repurposing the Past will prove to be a page turner.

The author is a master storyteller, and you are sure to enjoy The Repurposed Spy.” CB “I loved the book! I genuinely loved it. It's not at all I was expecting it to be - in a good way. It was filled with unpredictable twists, unforgettable characters, and an end that I didn't see coming but was totally satisfied with. Great book!” DR “There is something Orwellian about this story - the central character, Ronald Jones, kept reminding me of Winston Smith in 1984, always looking over his shoulder. The author keeps you on the edge of your seat throughout, wondering what will next befall this hapless and apparently reluctant spy. It is an intriguing tale, narrated in a light, slightly whimsical style that constantly keeps you off guard. I rattled through Oliver Dowson’s debut novel at breakneck speed, anxious to get to the denouement. I wasn’t disappointed, and neither, I venture, will you. DJ “The Repurposed Spy is a page turner. The novel grabbed my attention from the outset and retained my interest throughout. That’s the trademark of a good mystery thriller - it keeps you guessing throughout and looking forward to finding out more at the end. The twist at the end was really surprising! I did not see that coming, and I’m usually good at predicting the outcome.” BR

The Seven Basic Plots Christopher Booker, 2005-11-11 This remarkable and monumental book at last provides a comprehensive answer to the age-old riddle of whether there are only a small number of 'basic stories' in the world. Using a wealth of examples, from ancient myths and folk tales via the plays and novels of great literature to the popular movies and TV soap operas of today, it shows that there are seven archetypal themes which recur throughout every kind of storytelling. But this is only the prelude to an investigation into how and why we are 'programmed' to imagine stories in these ways, and how they relate to the inmost patterns of human psychology. Drawing on a vast array of examples, from Proust to detective stories, from the Marquis de Sade to E.T., Christopher Booker then leads us through the extraordinary changes in the nature of storytelling over the past 200 years, and why so many stories have 'lost the plot' by losing touch with their underlying archetypal purpose. Booker analyses why evolution has given us the need

to tell stories and illustrates how storytelling has provided a uniquely revealing mirror to mankind's psychological development over the past 5000 years. This seminal book opens up in an entirely new way our understanding of the real purpose storytelling plays in our lives, and will be a talking point for years to come.

Drug Repurposing David Cavalla,2022-01-31 Drug repurposing is the development of existing drugs for new uses: given that 9 in 10 drugs that enter drug development are never marketed and therefore represent wasted effort, it is an attractive as well as inherently more efficient process. Three repurposed drugs can be brought to market for the same cost as one new chemical entity; and they can also be identified more quickly, an important benefit for patients whose diseases are progressing faster than therapeutic innovation. But repurposing also requires a fresh look at configuring pharmaceutical R&D, considering clinical, regulatory and patent issues much earlier than would otherwise be the case; a holistic gedanken experiment almost needs to be undertaken at the very start of any repurposing development. In addition to new ways of thinking, the discovery of repurposing opportunities can take advantage of artificial intelligence techniques to match the perfect new use for an existing drug. And while repurposing of medicines has been in the mind of every doctor since Hypocrates, modern clinical practice will simply have to adapt to new repurposing techniques in an age where the number of known diseases is increasing much faster than the healthcare dollars available.
