Transactions on Computational Science XXXII Marina L. Gavrilova, C.J. Kenneth Tan, Alexei Sourin, 2018-03-06 This, the 32nd issue of the Transactions on Computational Science, focusses on cybersecurity and biometrics. The eight detailed papers cover the following topics: Multimodal Warnings for Distracted Smartphone Users on the Move; EEG-Based Mental Workload and Stress Monitoring of Crew Members in a Maritime Virtual Simulator; Detecting Web Defacement and Enabling Web-Content Regeneration; Software as a Weapon in the Context of (Inter)national Security; Multi-user Architecture and Multi-player Games; An Adaptive Discrete Wavelet Transform Based Face Recognition Approach; Synthesizing Images of Imagined Faces Based on Relevance Feedback; and Neurofeedback Training to Enhance the Focused Attention of Elite Rifle Shooters.

Dependency and Directionality Marcel den Dikken, 2017-12-31 The direction in which the structure of sentences and filler-gap dependencies are built is a topic of fundamental importance to linguistic theory and its applications. This book develops an integrated understanding of structure building, movement and locality embedded in a syntactic theory that argues for a 'top down' approach, presenting an explicit counterweight to the bottom-up derivations pervading the Chomskian mainstream. It combines a compact and comprehensive historical perspective on structure building, the cycle, and movement, with detailed discussions of island effects, the typology of long-distance filler-gap dependencies, and the special problems posed by the subject in clausal syntax. Providing introductions to the main issues, reviewing extant arguments for bottom-up and top-down approaches, and presenting several case studies in its development of a new theory, this book should be of interest to all students and scholars of language interested in syntactic structures and the dependencies inside them.

Internet Jurisdiction Law and Practice Julia Hörnle, 2021-01-07 From a technological standpoint, geography is largely irrelevant. Data flows through the internet without regard for political borders or territories. Services, communication, and interaction can occur online between persons who may be in different countries. Illegal activities, like hacking, cyberespionage, propagating terrorist propaganda, defamation, revenge porn, and illegal marketplaces may all be remotely targeted and accessed from various countries. As such, the internet has created an interesting and complex set of challenges for the concept of jurisdiction and conflicts of law. This title takes a comparative approach covering the EU, UK, US, Germany, and China. Broken into four parts, this book delves into the notion of jurisdiction as it relates to the internet. Part I focuses on the different meanings of the concept of jurisdiction,

from a legal and historical perspective, and distinguishing between the different branches of government. It will highlight the challenges created by the internet, including social media and cloud computing. Part II analyses criminal jurisdiction, in regards to both jurisdictions in cybercrime cases and jurisdictional issues relating to criminal investigations (access to the cloud) and enforcement. Part III examines jurisdiction and applicable law in civil and commercial matters, such as e-commerce B2B and B2C contracts, torts typically occurring online, and online defamation and privacy infringement. Finally, Part IV looks at regulatory jurisdiction, examining the power of the executive (whether an arm of government or independent regulator) to apply and enforce national law. It will look at aspects like the provision of online audio-visual media services and online gambling services, both of which are heavily regulated, but which can be easily provided remotely from different jurisdictions. The book concludes by analysing how the concept of jurisdiction should be adapted to ensure the rule of law by nation states and prevent international conflicts between states. This title gives a comprehensive look at the complicated subject of internet jurisdiction, essential for all dealing with jurisdictions in the modern age.

The Sphere of Influence Edward Hendrie, 2019-07-07 This book is a sequel to *The Greatest Lie on Earth (Expanded Edition): Proof That Our World Is Not a Moving Globe*. It will primarily focus on the infiltration into the church of the superstitious myth of heliocentrism and how that infiltration has served to undermine the gospel. The gospel is the entire Holy Bible, not just some of it. Matthew 4:4. Christian belief is an all or nothing proposition. “All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness.” 2 Timothy 3:16. God’s account of his creation is part and parcel of the gospel. A person with genuine faith believes what Jesus said about both heavenly and earthly things. “If I have told you earthly things, and ye believe not, how shall ye believe, if I tell you of heavenly things?” John 3:12. Jesus is God. Jesus created all things in heaven and on earth. See Colossians 1:16-18. God has revealed himself through his creation. [T]hat which may be known of God is manifest in them; for God hath shewed it unto them. For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse. Romans 1:19-20. If men have a misunderstanding of God’s creation, they will also have a misunderstanding of who God is. If people believe in a creation that does not exist, they consequently also believe in a creator that does not exist. It is essential, therefore, to have an accurate understanding of God’s creation. God did not make a movable, spherical earth. If men believe in a heliocentric creation, they will necessarily believe in a heliocentric creator. A heliocentric creation does not exist. So also, a

heliocentric creator does not exist. A heliocentric creator is a false god. We have been warned to avoid the preaching of a false gospel, which presents a false Jesus. For if he that cometh preacheth another Jesus, whom we have not preached, or if ye receive another spirit, which ye have not received, or another gospel, which ye have not accepted, ye might well bear with him. 2 Corinthians 11:4.

The Bluebeam Guidebook Rachel Attebery, Jason Hascall, 2018-03-27 Expert tips for the last piece in the paperless puzzle The Bluebeam Guidebook offers comprehensive coverage of the industry's leading PDF tool to help AEC professionals adopt a more efficient digital workflow. For AEC professionals seeking a better way to get things done, The Bluebeam Guidebook is your ultimate guide to everything Bluebeam can do for you.

Religious Talk Online Stephen Pihlaja, 2018-02-28 In the online world, people argue about anything and everything - religion is no exception. Stephen Pihlaja investigates how several prominent social media figures present views about religion in an environment where their positions are challenged. The analysis shows how conflict creates a space for users to share, explain, and develop their opinions and beliefs, by making appeals to both a core audience of like-minded viewers and a broader audience of viewers who are potentially interested in the claims, ambivalent, or openly hostile. The book argues that in the back and forth of these arguments, the positions that users take in response to the arguments of others have consequences for how religious talk develops, and potentially for how people understand and practice their beliefs in the twenty-first century. Based on

original empirical research, it addresses long-debated questions in sociolinguistics and discourse analysis regarding the role of language in building solidarity, defining identity and establishing genres and registers of interaction.

The Swan Riders Erin Bow, 2016-09-20 Greta was her country's crown princess, and also its hostage, destined to be the first casualty in an inevitable war. But when the war came, it broke all the rules, and Greta forged a different past. She is no longer princess. No longer hostage. No longer human. Greta Stuart has become an AI.--Page 2 of cover.

Gypsies in Central Asia and the Caucasus Elena Marushiakova, Vesselin Popov, 2016-10-01 This book explores diverse communities living in Central Asia and the Caucasus, who are generally gathered under the umbrella term of 'Gypsies', their multidimensional identities, self-appellations and labels given to them by surrounding populations, researcher and policy-makers. The book presents various Gypsy and Gypsy-like communities and provides a comprehensive review of their history, demography, ways of life, past and present occupations, and contemporary migration in post-Soviet space. The authors situate these communities in historical settings and also in the wider context of contemporary evolving global and areal developments. The book will be of interest to scholars and students of history, sociology, social anthropology, nationalities studies, global and Central Asia and Caucasus areal studies, and Gypsy/Romani studies, and also for policy-makers and civic organizations.

EU Copyright Law Morten Rosenmeier, Kacper Szkalej, Sanna Wolk, 2019-03-25 EU Copyright Law Subsistence, Exploitation and Protection of Rights Morten Rosenmeier, Kacper Szkalej and Sanna Wolk Against a background in which technology continues to change the ways we create, use, distribute and consume cultural content – and where there has been a noticeable increase in the body of case law of Court of Justice of the European Union (CJEU) relating to copyright – copyright protection has become an essential component of the knowledge-based economy and the information society. This book, structured around the various rights and issues rather than the legislative instruments, greatly facilitates an understanding of the complex legal area of European Union (EU) copyright law and provides for a more conscious application of these rules. Among the issues and topics covered are the following: the CJEU's interpretation of EU copyright law and application of fundamental rights; authorship and ownership of copyright; protection of computer programs and databases; scope of exclusive rights, such as communication to the public and distribution, including rental and lending; application of limitations and exceptions; cross-border access to online content services; digital exhaustion of copyright; and enforcement of copyright

and cross-border issues; With its practical approach to the substance of the various legal rules and principles both at EU level and in the various EU Member States, the book clearly describes in detail how copyright law functions throughout the EU. Professionals, business entities and academics who must be familiar with this dynamic legal area, especially in the digital environment, will benefit greatly from the book's clear consideration of legal questions that arise in connection with copyright issues.

Crossroads Semantics Hilke Reckman, Lisa L.S. Cheng, Maarten Hijzelendoorn, Rint Sybesma, 2017-04-12 As language is a multifaceted phenomenon, the study of language, as long as it is geared at providing a comprehensive picture of it, cannot be restricted to one component or one approach. This applies to the many different components of language as well, including semantics. If we want to fully understand the phenomenon of language meaning, we must not limit our research to lexical semantics, syntax-induced meaning or pragmatics. In order to enable ourselves to construct a consistent account of meaning, we need to extract relevant information from research done in different frameworks and from different theoretical standpoints. This volume brings together a number of computational, psycholinguistic as well as theoretical studies, which highlight and illustrate how research done in one subfield of linguistics can be relevant to others. The articles highlight the different ways in which one can work with different aspects of language meaning.

reviewed and selected from 155 papers. The articles are organized in topical sections on wireless security; Web security; forensics, biometrics and software protection; access control; cryptography and protocol analysis; information flow, side channels, and vulnerability analysis; usability, trust, and economics of security and privacy; and privacy.

Version Control Dexter Palmer, 2017-01-10 Although Rebecca Wright has pieced her life back together after a major tragedy, she can't shake a sense that the world around her feels off-kilter. Meanwhile, her husband's dedication to his invention, "the causality violation device" (which he would greatly prefer you not call a time machine) has effectively stalled his career—but he may be closer to success than either of them can possibly imagine. Emotionally powerful and wickedly intelligent, *Version Control* is a stunningly prescient novel about the effects of science and technology on our lives, our friendships, and our sense of self that will alter the way you see the future—and the present.

Media Communities Brigitte Hipfl, Theo Hug, 2006 This book analyzes the different ways in which media are being used for community building and it also critically interrogates the concept of community itself. The authors do that from a variety of different perspectives, ranging from e.g. fundamental philosophical questions regarding community, to the role of journalism.

The Trump Effect L. Rowand Archer, 2022-11-03 With the election of Donald Trump on November 8, 2016, Americans experienced a sense of relief and joy, knowing they could again participate in a vibrant business environment that offers them the power of self-determination and the freedom to pursue their life goals and live according to their faith, unencumbered by political correctness and the stifling ideology of creeping socialism. For the last fifty or so years, the dark-side left have, though academia, the entertainment industry, deep-state bureaucrats, and the liberal big media, successfully been undoing the centuries-old institutions of free market economies, which has created unprecedented wealth the world over. In its place, the dark-side

left have been molding these institutions to reflect their warped ideology of a new socialist world order, with no boarder and based on a Marxist, progressive left utopia, an oxymoron, if there ever is one. The long-term strategy for achieving their transition relies on undermining the economic engine by enacting burdensome big government regulations; by imposing political correctness and identity politics into our daily conversations, social interactions, and norms; and finally by attacking one's religious faith and values. The dark-side left's long march through the culture has resulted in the indoctrination of each new generation using the direct influence of academia, movies and television programs, the daily news coverage, and government policy. Miraculously, as if by divine intervention, after just one year of his presidency, Donald Trump has managed to force into the open this sinister plot by the dark-side left, with the world now acutely aware of the serious bias of the liberal big media, the corruption present at the senior levels of the intelligence branches left behind by the Obama administration, the serious extent of liberal bias in academia and their effort to restrict free speech, and the self-interest of lawmakers seeking self-enrichment from Washington's swamp-dwelling domestic and foreign lobbyists. With his unwavering commitment to work on behalf of the American people, Trump has almost single-handedly inflicted journalists and the political elites with varying degrees of Trump derangement syndrome and exposing their warped, self-serving values, resulting in them becoming almost totally incapable of providing unbiased, insightful political arguments on current issues for their audience. Because of President Trump, the world is witnessing the excruciating collapse of the dark-side left and the Washington swamp. His ability to navigate through the minefields laid by the bipartisan swamp and the liberal big media can only be answered through our faith in God, who, in all his wisdom, has chosen this man to save free market countries and its people from the evils of the dark-side left and their elitist minions.

HCI International 2023 Posters Constantine Stephanidis, Margherita Antona, Stavroula Ntoa, Gavriel Salvendy, 2023-07-08 The five-volume set CCIS 1832-1836 contains the extended abstracts of the posters presented during the 25th International Conference on Human-Computer Interaction, HCII 2023, which was held as a hybrid event in Copenhagen, Denmark, in July 2023. The total of 1578 papers and 396 posters included in the 47 HCII 2023 proceedings volumes were carefully reviewed and selected from the 7472 contributions. The posters presented in these five volumes are organized in topical sections as follows: Part I: HCI Design: Theoretical Approaches, Methods and Case Studies; Multimodality and Novel Interaction Techniques and Devices; Perception and Cognition in Interaction; Ethics, Transparency and Trust in HCI; User Experience and Technology Acceptance Studies. Part II:

Supporting Health, Psychological Wellbeing, and Fitness; Design for All, Accessibility and Rehabilitation Technologies; Interactive Technologies for the Aging Population. Part III: Interacting with Data, Information and Knowledge; Learning and Training Technologies; Interacting with Cultural Heritage and Art. Part IV: Social Media: Design, User Experiences and Content Analysis; Advances in eGovernment Services; eCommerce, Mobile Commerce and Digital Marketing: Design and Customer Behavior; Designing and Developing Intelligent Green Environments; (Smart) Product Design. Part V: Driving Support and Experiences in Automated Vehicles; eXtended Reality: Design, Interaction Techniques, User Experience and Novel Applications; Applications of AI Technologies in HCI.

The Employees: A workplace novel of the 22nd century Olga Ravn, 2022-02-01 Shortlisted for the International Booker prize and the Ursula K. Le Guin Prize, *The Employees* reshuffles a sci-fi voyage into a riotously original existential nightmare Longlisted for the 2022 National Book Award Funny and doom-drenched, *The Employees* chronicles the fate of the Six-Thousand Ship. The human and humanoid crew members complain about their daily tasks in a series of staff reports and memos. When the ship takes on a number of strange objects from the planet New Discovery, the crew becomes strangely and deeply attached to them, even as tensions boil toward mutiny, especially among the humanoids. Olga Ravn's prose is chilling, crackling, exhilarating, and foreboding. *The Employees* probes into what makes us human, while delivering a hilariously stinging critique of life governed by the logic of productivity. It was shortlisted for the the Ursula K. Le Guin Prize.
