Storm George R. Stewart,2021-08-17 A thrilling, innovative novel about the interplay between nature and humankind by the author of *Names on the Land*. With *Storm*, first published in 1941, George R. Stewart invented a new genre of fiction: the eco-novel. California has been plunged into drought throughout the summer and fall when a ship reports an unusual barometric reading from the far western Pacific. In San Francisco, a junior meteorologist in the Weather Bureau takes note of the anomaly and plots “an incipient little whorl” on the weather map, a developing storm, he suspects, that he privately dubs

Maria. Stewart's novel tracks Maria's progress to and beyond the shores of the United States through the eyes of meteorologists, linemen, snowplow operators, a general, a couple of decamping lovebirds, and an unlucky owl, and the storm, surging and ebbing, will bring long-needed rain, flooded roads, deep snows, accidents, and death. Storm is an epic account of humanity's relationship to and dependence on the natural world.

But when an unexpected betrayal destroys a tense alliance with neighboring Chiltæ, all that has been won comes crashing down. In Kisia, Princess Miko Ts'ai is a prisoner in her own castle. She dreams of claiming her empire, but the path to power could rip it, and her family, asunder. In Chiltæ, assassin Cassandra Marius is plagued by the voices of the dead. Lean Fall Stand Jon McGregor, 2022-09-06 A thrilling and propulsive novel of an Antarctica expedition gone wrong and its far-reaching consequences for the explorers and their families leaves the reader moved and subtly changed, as if she had become part of the story (Hilary Mantel). “McGregor's depiction of speechlessness, both metaphorical and physical, makes the novel much more interesting than if he had provided a page-turner about a botched expedition in Antarctica . . . McGregor's carefully composed dialogue, filled with the repetition of so few words, had an eerie effect on me: for several days my own inner dialogue was often composed of the same words, as though I, too, was discovering how they could express drastically different emotions yet remain unreadable to the world. —Yiyun Li, New York Review of Books Remember the training: find shelter or make shelter, remain in place, establish contact with other members of the party, keep moving, keep calm. Robert 'Doc' Wright, a veteran of Antarctic surveying, was there on the ice when the worst happened. He holds within him the complete story of that night—but depleted by the disaster, Wright is no longer able to communicate the truth. Instead, in the wake of the catastrophic expedition, he faces the most daunting adventure of his life: learning a whole new way to be in the world. Meanwhile Anna, his wife, must suddenly scramble to navigate the sharp and unexpected contours of life as a caregiver. From the Booker Prize-longlisted, American Academy of Arts & Letters Award-winning author of Reservoir 13, this is a novel every bit as mesmerizing as its setting. Tenderly unraveling different notions of heroism through the rippling effects of one extraordinary expedition on an ordinary family, Lean Fall Stand explores the indomitable human impulse to turn our experiences into stories—even when the words may fail us.

This Storm James Ellroy, 2019-06-04 January '42. L.A. reels behind the shock of Pearl Harbor. Local Japanese residents are rounded up and slammed behind bars. Massive thunderstorms hit the city. A body is unearthed in Griffith Park. The cops tag it a routine dead-man job. They're wrong. It's an early-warning signal of Chaos. There's a murderous fire and a gold heist. There's Fifth Column treason on American soil. There are homegrown Nazis, Commies, and race racketeers. It's populism ascendant. There's two dead cops in a dive off the jazz-club strip. And three men and one woman have a hot date with history. Elmer Jackson is a corrupt Vice cop. He's a flesh peddler and a bagman for the L.A. Chief of Police. Hideo Ashida is a crime-lab whiz, lashed by anti-Japanese rage. Dudley Smith is PD hardnose working Army Intelligence. He's gone rogue and gone all-the-way fascist. Joan Conville was born rogue. She's a defrocked Navy lieutenant and a war profiteer to her core. L.A. '42. Homefront madness. Wartime inferno--This Storm is James Ellroy's most audacious novel yet. It is by turns savage, tender, elegiac. It lays bare and celebrates crazed Americans of all stripes. It is a masterpiece.

Storm World Chris Mooney, 2008-08-04 An investigation into climate change and increasingly dangerous hurricanes from the New York Times--bestselling author of *The Republican War on Science*. A leading science journalist delves into a red-hot debate in meteorology: whether the increasing ferocity of hurricanes is connected to global warming. In the wake of Katrina, Chris Mooney follows the careers of leading scientists on either side of the argument through the 2006 hurricane season, tracing how the media, special interests, politics, and the weather itself have skewed and amplified what was already a fraught scientific debate. As Mooney puts it: "Scientists, like hurricanes, do extraordinary things at high wind speeds." Mooney—a New Orleans native, host of the Point of Inquiry podcast, and author of *The Republican Brain*—has written "a well-researched, nuanced book" that closely examines whether we as a society should be held responsible for making hurricanes even bigger monsters than they already are (*The New York Times*). "Mooney serves his readers as both an empiricist who gathers data and an analyst who puts it into context. The result is an important book, whose author succeeds admirably in both his

roles.” —The Plain Dealer “Engaging and readable . . . Mooney catches real science in the act and, in so doing, weaves a story as intriguing as it is important.” —Los Angeles Times Book Review “Mooney has hit upon an important and controversial topic, and attacks it with vigor.” —The Boston Globe “An absorbing, informed account of the politics behind a pressing contemporary controversy.” —Kirkus Reviews

Isaac's Storm Erik Larson, 2011-10-19 At the dawn of the twentieth century, a great confidence suffused America. Isaac Cline was one of the era's new men, a scientist who believed he knew all there was to know about the motion of clouds and the behavior of storms. The idea that a hurricane could damage the city of Galveston, Texas, where he was based, was to him preposterous, an absurd delusion. It was 1900, a year when America felt bigger and stronger than ever before. Nothing in nature could hobble the gleaming city of Galveston, then a magical place that seemed destined to become the New York of the Gulf. That August, a strange, prolonged heat wave gripped the nation and killed scores of people in New York and Chicago. Odd things seemed to happen everywhere: A plague of crickets engulfed Waco. The Bering Glacier began to shrink. Rain fell on Galveston with greater intensity than anyone could remember. Far away, in Africa, immense thunderstorms blossomed over the city of Dakar, and great currents of wind converged. A wave of atmospheric turbulence slipped from the coast of western Africa. Most such waves faded quickly. This one did not. In Cuba, America's overconfidence was made all too obvious by the Weather Bureau's obsession with controlling hurricane forecasts, even though Cuba's indigenous weathermen had pioneered hurricane science. As the bureau's forecasters assured the nation that all was calm in the Caribbean, Cuba's own weathermen fretted about ominous signs in the sky. A curious stillness gripped Antigua. Only a few unlucky sea captains discovered that the storm had achieved an intensity no man alive had ever experienced. In Galveston, reassured by Cline's belief that no hurricane could seriously damage the city, there was celebration. Children played in the rising water. Hundreds of people gathered at the beach to marvel at the fantastically tall waves and gorgeous pink sky, until the surf began ripping the city's beloved beachfront apart. Within the next few hours Galveston would endure a hurricane that to this day remains the nation's deadliest natural disaster. In Galveston alone at least 6,000 people, possibly as many as 10,000, would lose their lives, a number far greater than the combined death toll of the Johnstown Flood and 1906 San Francisco Earthquake. And Isaac Cline would experience his own unbearable loss. Meticulously researched and vividly written, *Isaac's Storm* is based on Cline's own letters, telegrams, and reports, the testimony of scores of survivors, and our latest understanding of the hows and whys of great storms. Ultimately, however, it is the story of what can happen when human arrogance meets nature's last great uncontrollable force. As such, *Isaac's Storm* carries a warning for our time.
