King Lear Jeffrey Kahan, 2008-04-18 Is King Lear an autonomous text, or a rewrite of the earlier and anonymous play King Leir? Should we refer to Shakespeare's original quarto when discussing the play, the revised folio text, or the popular composite version, stitched together by Alexander Pope in 1725? What of its stage variations? When turning from page to stage, the critical view on King Lear is skewed by the fact that for almost half of the four hundred years the play has been performed, audiences preferred Naham Tate's optimistic adaptation, in which Lear and Cordelia live happily ever after. When discussing King Lear, the question of what comprises 'the play' is both complex and fragmentary. These issues of identity and authenticity across time and across mediums are outlined, debated, and considered critically by the contributors to this volume. Using a variety of approaches, from postcolonialism and New Historicism to psychoanalysis and gender studies, the leading international contributors to King Lear: New Critical Essays offer major new interpretations on the conception and writing, editing, and cultural productions of King Lear. This book is an up-to-date and comprehensive anthology of textual scholarship, performance research, and critical writing on one of Shakespeare's most important and perplexing tragedies. Contributors Include: R.A. Foakes, Richard Knowles, Tom Clayton, Cynthia Clegg, Edward L. Rocklin, Christy Desmet, Paul Cantor, Robert V. Young, Stanley Stewart and Jean R. Brink

**Creating Value in Financial Services** Edward L. Melnick, Praveen R. Nayyar, Michael L. Pinedo, Sridhar Seshadri, 2012-12-06 Creating Value in Financial Services is a compilation of state-of-the-art views of leading academics and practitioners on how financial service firms can succeed in today's competitive environment. The book is based on two conferences held at New York University: the first, 'Creating Value in Financial Services', held in March 1997, and the second, 'Operations and Productivity in Financial Services', in April 1998. The book is essentially designed to be a compendium of leading edge thinking and practice in the management of financial services firms. There is no book today that has this focus. It contains ideas that can apply to other service industries. Topics addressed are increasingly important worldwide as the financial services industries consolidate and search for innovative new directions and ways to create value in a fiercely competitive environment.

**Othello** William Shakespeare, 2024-04-20 Othello: The Moor of Venice by William Shakespeare is a timeless tragedy that delves into themes of jealousy, manipulation, and racial prejudice. Set against the backdrop of Venetian society, the play follows the noble Moorish general Othello as he navigates the treacherous waters of love and betrayal. Othello's marriage to the beautiful Desdemona becomes the target of manipulation by the villainous Iago, who exploits Othello's insecurities and doubts to sow seeds of jealousy. As tensions escalate and trust erodes, Othello's tragic downfall becomes inevitable. Shakespeare's masterful portrayal of human emotion and psychological complexity makes Othello a compelling exploration of the destructive power of jealousy and the fragility of love.

**The Future of Literacy Studies** M. Baynham,M. Prinsloo,2009-11-27 This book brings together authors actively involved in shaping the field of literacy studies, presenting a robust approach to the theoretical and empirical work which is currently pushing the boundaries of literacy research and also pointing to future directions for literacy research.

**Efficient Learning for the Poor** Helen Abadzi,2006 Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman?'s terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers, supervisors, and inspectors, as well as university professors and students.
