Culture and Human-Robot Interaction in Militarized Spaces Dr Julie Carpenter,2016-01-28 Explosive Ordnance Disposal (EOD) personnel are some of the most highly trained people in the military, with a job description that spans defusing unexploded ordnance to protecting VIP's and state dignitaries. EOD are also one of the first military groups to work with robots every day. These robots have become an increasingly important tool in EOD work, enabling people to work at safer distances in many dangerous situations. Based on exploratory research investigating interactions between EOD personnel and the robots they use, this study richly describes the nuances of these reciprocal influences, especially those related to operator emotion associated with the robots. In particular, this book examines the activities, processes and contexts that influence or constrain everyday EOD human-robot interactions, what human factors are shaping the (robotic) technology and how people and culture are being changed by using it. The findings from this research have implications for future personnel training, and the refinement of robot design considerations for many fields that rely on critical small group communication and decision-making skills.

Robot Tales Harry Harrison, Robert Sheckley, Charles Louis

Fontenay, 2011-11-18 This is a collection of eleven short stories about robots that are compiled from various sources. The stories are: (1) Arm of the Law (How could a robot-a machine, after all-be involved in something like law application and violence?), (2) The Velvet Glove (New York was a bad town for robots this year. In fact, all over the country it was bad for robots....), (3) Survival Tactics (The robots were built to serve Man; to do his work, see to his comforts, make smooth his way. Then the robots figured out an additional service-putting Man out of his misery), (4) Beside Still Waters, (5) A Spaceship Named McGuire (The basic trouble with McGuire was that, though he was a robot spaceship, nevertheless he had a definite weakness that a man might understand....), (6) Service with a Smile (Herbert was truly a gentleman robot. The ladies' slightest wish was his command....), (7) The Helpful Robots (This is the story of Rankin, who prided himself on knowing how to handle robots, but did not realize that the robots of the Clearchan Confederacy were subject to a higher law than implicit obedience to man), (8) Robots of the World! Arise! (What would you do if your best robots-children of your own brain-walked up and said We want union scale?), (9) The Love of Frank Nineteen (What will happen to love in that far off Day after Tomorrow? The result is a unique love story from that same Tomorrow), (10) Benefactor (We can anticipate that robots will be fiercely resented, at first, in a society that will see them as the latest-and an indestructible-widespread threat to the workers whom they will replace. The men who will seek to alter the status quo will be called robot lovers and stoned. But what happens next?), and (11) The Stutterer (A man can be killed by a toy gun-he can die of fright, for heart attacks can kill. What, then, is the deadly thing that must be sealed away, forever locked in buried concrete-a thing or an idea?). It is a pleasure to publish this new, high quality, and affordable edition of these timeless stories.

The Big Catch Anastasia Suen, 2010 Robot and Rico are off to the beach. Rico

wants to catch the biggest fish, but Robot may end up with the biggest surprise--Unedited summary from book.

Robotics Through Science Fiction Robin R. Murphy, 2018-12-25 Six classic science fiction stories and commentary that illustrate and explain key algorithms or principles of artificial intelligence. This book presents six classic science fiction stories and commentary that illustrate and explain key algorithms or principles of artificial intelligence. Even though all the stories were originally published before 1973, they help readers grapple with two questions that stir debate even today: how are intelligent robots programmed? and what are the limits of autonomous robots? The stories--by Isaac Asimov, Vernor Vinge, Brian Aldiss, and Philip K. Dick--cover telepresence, behavior-based robotics, deliberation, testing, human-robot interaction, the "uncanny valley," natural language understanding, machine learning, and ethics. Each story is preceded by an introductory note, "As You Read the Story," and followed by a discussion of its implications, "After You Have Read the Story." Together with the commentary, the stories offer a nontechnical introduction to robotics. The stories can also be considered as a set of--admittedly fanciful--case studies to be read in conjunction with more serious study. Contents "Stranger in Paradise" by Isaac Asimov, 1973 "Runaround" by Isaac Asimov, 1942 "Long Shot" by Vernor Vinge, 1972 "Catch That Rabbit" by Isaac Asimov, 1944 "Super-Toys Last All Summer Long" by Brian Aldiss, 1969 "Second Variety" by Philip K. Dick, 1953

The Wild Robot Peter Brown, 2020-04-07 Roz the robot discovers that she is alone on a remote, wild island with no memory of where she is from or why she is there, and her only hope of survival is to try to learn about her new environment from the island's hostile inhabitants.

Robot in Love T. L. McBeth, 2018-12-24 When a shiny, beautiful stranger catches Robot's eye, he knows she's the one. He thinks about her all the time. He even makes her a gift. But will he be able to keep his circuits from overheating and work up the courage to talk to her? T. L. McBeth's *Robot in Love* spins a funny and heartwarming story of love--perfect for sharing at Valentine's!

Robot Visions Isaac Asimov, 1991-03-05 From Isaac Asimov, the Hugo Award-winning Grand Master of Science Fiction, comes five decades of robot visions: thirty-four landmark stories and essays--including three rare tales--gathered together in one volume. Meet all of Asimov's most famous creations including: Robbie, the very first robot that his imagination brought to life; Susan Calvin, the original robot psychologist; Stephen Byerley, the humanoid robot; and the famous human/robot detective team of Lije Bailey and R. Daneel Olivaw, who have appeared in such bestselling novels as *The Robots of Dawn* and *Robots and Empire*. Let the master himself guide you through the key moments in the fictional history of robot-human relations--from the most primitive computers and mobile machines to the first robot to become a man. "It's good to have Isaac's classic robot stories, and his commentary on them, in one handsome volume."--Arthur C. Clarke

Wonky, 6 8 robotics, school friendship Darcy Pattison, 2018-09-08 Kirkus Review: . . .offbeat and clever. . . .With pages filled with animals and robots, this tale will certainly appeal to kids; the story of friendship conquering first-day-of-school jitters remains a bonus. Howie ambles into robot club hoping to find a friend. But when Lincoln bounds into the room, Howie hides. The strange new bird is too big and fluffy. The teacher,

however, puts the unlikely pair together. Will they be able to accept each other's wonky ideas and become friends? For STEM classes, this story emphasizes the discussion of form v. function. The story encourages divergent thinking as Lincoln and Howie design a robot. For kids who are rigid and inflexible, they'll see the value of considering different options, and accepting those who are different. For kids who love robots that transform, cyber robots, and deceptive robots.

The Robot Who Looked Like Me Robert Sheckley, 2014-05-13 "If the Marx Brothers had been literary fantasists, they would have been Robert Sheckley." –Harlan Ellison In "The Robot Who Looked Like Me," a busy man and a busy woman find a way to carve out time to romance each other—by having look-alike robots made to do the job—who then run away together. The twelve other stories in this collection are "Slaves of Time," "Voices," "A Suppliant in Space," "Sneak Previews," "Zirn Left Unguarded, the Jenghik Palace in Flames, John Westerly Dead," "Welcome to the Standard Nightmare," "The Never-Ending Western Movie," "What Is Life?", "I See a Man Sitting on a Chair, and the Chair Is Biting His Leg," "Is That What People Do?", "Silversmith Wishes," and "End City." From the very beginning of his career, Robert Sheckley was recognized by fans, reviewers, and fellow authors as a master storyteller and the wittiest satirist working in the science fiction field. Open Road is proud to republish his acclaimed body of work, with nearly thirty volumes of full-length fiction and short story collections. Rediscover, or discover for the first time, a master of science fiction who, according to the New York Times, was "a precursor to Douglas Adams."
