At 9:32 a.m. on July 16, 1969, the Apollo 11 rocket launched in the presence of more than a million spectators who had gathered to witness a truly historic event. In a Rocket Made of Ice Gail Guttradt,2014-08-12 A beautifully told, inspiring true story of one woman's volunteer experiences at an orphanage in rural Cambodia—a book that embodies the belief that love, compassion, and generosity of spirit can overcome even the most fearsome of obstacles. Gail Guttradt was at a crossroads in her life when she learned of the Wat Opot Children's Community. Begun with just fifty dollars in the pocket of Wayne Dale Matthyse, a former Marine Corps medic in Vietnam, Wat Opot, a temple complex nestled among Cambodia's verdant rice paddies, was once a haunted scrubland that became a place of healing and respite where children with or orphaned by HIV/AIDS could live outside of fear or judgment, and find a new family—a place that Guttradt calls “a workshop for souls.” Disarming, funny, deeply moving, *In a Rocket Made of Ice* gathers the stories of children saved and changed by this very special place, and of one woman's transformation in trying to help them. With wry perceptiveness and stunning humanity and humor, this courageous, surprising, and evocative memoir etches the people of Wat Opot forever on your heart.

Rocket Girl George D. Morgan,2013-07-09 LIKE THE FEMALE SCIENTISTS PORTRAYED IN HIDDEN FIGURES, MARY SHERMAN MORGAN WAS ANOTHER UNSUNG HEROINE OF THE SPACE AGE—NOW HER STORY IS FINALLY TOLD. This is the extraordinary true story of America's first female rocket scientist. Told by her son, it describes Mary Sherman Morgan's crucial contribution to launching America's first satellite and the author's labyrinthine journey to uncover his mother's lost legacy--one buried deep under a lifetime of secrets political, technological, and personal. In 1938, a young German rocket enthusiast named Wernher von Braun had dreams of building a rocket that could fly him to the moon. In Ray, North Dakota, a young farm girl named Mary Sherman was attending high school. In an age when girls rarely dreamed of a career in science, Mary wanted to be a chemist. A decade later the dreams of these two disparate individuals would coalesce in ways neither could have imagined. World War II and the Cold War space race with the Russians changed the fates of both von Braun and Mary Sherman Morgan. When von Braun and other top engineers could not find a solution to the repeated failures that plagued the nascent US rocket program, North American Aviation, where Sherman Morgan then worked, was given the challenge. Recognizing her talent for chemistry, company management turned the assignment over to young Mary. In the end, America succeeded in launching rockets into space, but only because of the joint efforts of the brilliant farm girl from North Dakota and the famous German scientist. While von Braun went on to become a high-profile figure in NASA's manned space flight, Mary Sherman Morgan and her contributions fell into obscurity--until now.

Rockets and Missiles A. Bowdoin Van Riper, 2007-11-26 Beginning with World War II, missiles transformed the art of war. For the first time, cities of warring nations were vulnerable to sudden, unannounced, long-distance attacks. At the same time, rockets made possible one of the great triumphs of the modern age—the exploration of space. Beginning with the origins of rocketry in medieval and early modern Asia, *Rockets and Missiles* traces the history of the technology that led to both the great fear of global warfare and the great excitement of the Space Age. This volume focuses on rocketry in late-twentieth-century Western Europe, Russia, and the United States, as well as the spread of rocket technology to East Asia and the Middle East. It covers the full history of rocket technology—including how rockets improved in performance, reliability, and versatility and how they affected everyday life.

Family Life: A Novel Akhil Sharma, 2014-04-07 Winner of the 2016 International Dublin Literary Award Gorgeously tender at its core...beautiful, heartstopping...Family Life really blazes. —Sonali Deraniyagala, New York Times Book Review Hailed as a supreme storyteller (Philadelphia Inquirer) for his cunning, dismaying and beautifully conceived fiction (New York Times), Akhil Sharma is possessed of a narrative voice as hypnotic as those found in the pages of Dostoyevsky (The Nation). In his highly anticipated second novel, *Family Life*, he delivers a story of astonishing intensity and emotional precision. We meet the Mishra family in Delhi in 1978, where eight-year-old Ajay and his older brother Birju play cricket in the streets, waiting for the day when their plane tickets will arrive and they and their mother can fly across the world and join their father in America. America to the Mishras is, indeed, everything they could have imagined and more: when automatic glass doors open before them, they feel that surely they must have been mistaken for somebody important. Pressing an elevator button and the elevator closing its doors and rising, they have a feeling of power at the fact that the elevator is obeying them. Life is extraordinary until tragedy strikes, leaving one brother severely brain-damaged and the other lost and virtually orphaned in a strange land. Ajay, the family's younger son, prays to a God he envisions as Superman, longing to find his place amid the ruins of his family's new life. Heart-wrenching and darkly funny, *Family Life* is a universal story of a boy torn between duty and his own survival.

Rocket to the Moon! Don Brown, 2019-03-05 On July 20, 1969, Neil Armstrong took “one small step for man, one giant leap for mankind” when the Apollo 11 landed on the moon. But it wasn't just one man who got us to the moon. *Rocket to the Moon!* explores the people and technology that made the moon landing possible. Instead of examining one person's life, it focuses on the moon landing itself, showing the events leading up to it and how it changed the world. The book takes readers through the history of rocket building: from ancient Chinese rockets, to “bombs bursting in air” during the War of 1812, to Russia's Sputnik program, to the moon landing. Beautifully illustrated and well-researched, this book is the perfect resource for curious readers and tomorrow's scientists. It includes a timeline of space travel, a bibliography, and an index.

Rocket Men Robert Kurson, 2018-04-03 NEW YORK TIMES BESTSELLER • The riveting inside story of three heroic astronauts who took on the challenge of mankind's historic first mission to the Moon, from the bestselling author of *Shadow Divers*. “Robert Kurson tells the tale of Apollo 8 with novelistic detail and immediacy.”—Andy Weir, #1 New York Times bestselling author of *The Martian* and *Artemis* By August 1968, the American space program was in danger of failing in its two most important objectives: to land a man on the Moon by President Kennedy's end-of-decade deadline, and to triumph over the Soviets in space. With its back against the wall, NASA made an almost unimaginable leap: It would scrap its usual methodical approach and risk everything on a sudden launch, sending the first men in history to the Moon—in just four months. And it would all happen at Christmas. In a year of historic violence and discord—the Tet Offensive, the assassinations of Martin Luther King, Jr., and Robert Kennedy, the riots at the Democratic National Convention in Chicago—the Apollo 8 mission would be the boldest, riskiest test of America's greatness under pressure. In this gripping insider account, Robert Kurson puts the focus on the three astronauts and their families: the commander, Frank Borman, a conflicted man on his final mission; idealistic Jim Lovell, who'd dreamed since boyhood of riding a rocket to the Moon; and Bill Anders, a young nuclear engineer and hotshot fighter pilot making his first space flight. Drawn from hundreds of hours of one-on-one interviews with the astronauts, their loved ones, NASA personnel, and myriad experts, and filled with vivid and unforgettable detail, *Rocket Men* is the definitive account of one of America's finest hours. In this real-life thriller, Kurson reveals the epic dangers involved, and the singular bravery it took, for mankind to leave Earth for the first time—and arrive at a new world. “*Rocket Men* is a riveting introduction to the [Apollo 8] flight. . . . Kurson details the mission in crisp, suspenseful scenes. . . . [A] gripping book.”—The New York Times Book Review
