Critical Approaches to the Films of Robert Rodriguez Frederick Luis

Aldama, 2015-03-15 Frederick Aldama's *The Cinema of Robert Rodriguez* (2014) was the first full-scale study of one of the most prolific and significant Latino directors making films today. In this companion volume, Aldama enlists a corps of experts to analyze a majority of Rodriguez's feature films, from his first break-out success *El Mariachi* in 1992 to *Machete* in 2010. The essays explore the formal and thematic features present in his films from the perspectives of industry (context, convention, and distribution), the film blueprint (auditory and visual ingredients), and consumption (ideal and real audiences). The authors illuminate the manifold ways in which Rodriguez's films operate internally (plot, character, and event) and externally (audience perception, thought, and feeling). The volume is divided into three parts: *Matters of Mind and Media* includes essays that use psychoanalytic and cognitive psychology to shed light on how Rodriguez's films complicate Latino identity, as well as how they succeed in remaking audiences' preconceptions of the world. *Narrative Theory, Cognitive Science, and Sin City: A Case Study* offers tools and models of analysis for the study of Rodriguez's film re-creation of a comic book (on which Frank Miller was credited as codirector). *Aesthetic and Ontological Border Crossings and Borderlands* considers how Rodriguez's films innovatively critique fixed notions of Latino identity and experience, as well as open eyes to racial injustices. As a whole, the volume demonstrates how Rodriguez's career offers critical insights into the filmmaking industry, the creative process, and the consuming and reception of contemporary film.

Type Noun Constructions in Slavic, Germanic and Romance Languages Wiltrud Mihatsch, Inga Hennecke, Anna Kisiel, Alena Kolyaseva, Kristin Davidse, Lieselotte Brems, 2023-04-27 This volume is the first dedicated to the comprehensive, in-depth analysis of constructions with nouns like 'type' and 'sort'. It focuses on type noun constructions in Romance, Germanic and Slavic languages, integrating the different descriptive traditions that had been developed for each language family. As a result, a greater variety of type noun constructions is revealed than in the hitherto more fragmented literature. But attention is also drawn to the cross-linguistic similarity of the new pragmatic meanings, such as ad hoc and approximative categorization, hedging, focus and filler uses, and the new grammatical functions in NPs (e.g. phoric uses), clauses (e.g. adverbial uses) and complex sentences (e.g. quotatives). The volume offers survey chapters of type noun constructions in each language family as well as contributions focusing on specific aspects in one or two languages, such as their grammar, semantics and pragmatics, diachronic development, discursive and sociolinguistic variety. These complementary methodologies elucidate the unique cross-linguistic field of type noun constructions both descriptively and theoretically. Hence, this volume can also serve as a model for similar surveys in other functional domains.

Writing Mexican History Eric Van Young,2012-03-14 Essential essays from "one of the most prolific, provocative, and pre-eminent historians working in the field of Mexican and Latin-American history today" (Susan Deans-Smith, author of *Bureaucrats, Planters, and Workers*). This collection brings together a group of important and influential essays on Mexican history and historiography by Eric Van Young, a leading scholar in the field. The essays, several of which appear here in English for the first time, are primarily historiographical; that is, they address the ways in which separate historical literatures have developed over time. They cover a wide range of topics: the historiography of the colonial and nineteenth-century Mexican and Latin American countryside; historical writing in English on the history of colonial Mexico; British, American, and Mexican historical writing on the Mexican Independence movement; the methodology of regional and cultural history; and the relationship of cultural to economic history. Some of the essays have been and will continue to be controversial, while others—for example, those on studies of the Mexican hacienda since 1980, on the theory and method of regional history, and on the "new cultural history" of Mexico—are widely considered classics of the genre. "Van Young is one of the two or three preeminent thinkers in the Mexican and Latin American field whose essays are of such pioneering and enduring value to warrant this kind of greatest hits collection. Not only does he cross fields and disciplines and integrate northern and southern intellectual currents, his essays are a pleasure to read and constitute a rare combination of analytical bite, erudition, and playfulness." —Gilbert M. Joseph, Yale University

On Reduplication Allan T. Bäck, 2021-12-06 On Reduplication is a study of the logical properties of reduplicative propositions, that is, of propositions having qualifications, like 'Christ qua God is a creature' and 'being qua being is the subject of metaphysics'. The focus is on what ways qualifications change the truth value and the inference patterns of simple, categorical propositions. The central class of reduplications is that in which the qualifications are introduced by a qua connective like 'qua', 'insofar as', 'under the concept of', or 'in virtue of the fact that'. Reduplicative propositions occur frequently and importantly in both traditional and contemporary philosophical works, but there has been little modern analysis of them. This study presents, compares and analyzes the different theories of reduplication that have arisen in Western philosophy. Texts are presented and explicated, and their significance is weighed relative to modern logical theory. Throughout this study, some important applications of theories of reduplication are noted, such as Leibniz's qualification of the principle of the Identity of Indiscernibles, Ockham's reduction of abstract entities, and Aquinas's view on the Incarnation.

JQR Joey Rodriguez, 2020-03-07 After their home is destroyed by an atomic blast, an android and his best pup set out to find his human parents and piece together the remnants of a nation-wide invasion. Lost in their own backyard, our heroes must battle unknown forces both foreign and domestic, using the skills, and wit, of their favorite Saturday matinee heroes. Spills, chills, and thrills leap from the page in the explosive saga of JQR, an adventure sure to tickle even the bravest of readers! Hardcover Synopsis: An old enemy has returned. Dormant for only two decades, the rising sun stormed the beaches and the wide avenues to avenge their defeat. Just a boy and his dog; he a nearly obsolete model, her a pure breed. Left to fend for themselves during the invasion, JoJo, as his family affectionately called him, must wrestle with his metal construction, his childish memories, and the fact that he will never become human. His father's own experiences in the Last Great War, painful and victorious, have bred fear, doubt, and distrust in them all. But the world has been far from kind, the survivors hoarding their resources, firing blindly into the atomic remains of what they had proudly cultivated. Lost now in a world he thought he knew, his family's shadows fading quickly, there is much to learn about the hierarchy of man and where a small android and his loyal best friend fit in.

Truthmakers Helen Beebe, Julian Dodd, 2005-08-25 The concept of truthmaking is attracting much attention in contemporary metaphysics. This work asks how the truthmaker principle should be formulated, whether it is well motivated, whether it genuinely has the explanatory roles claimed for it, and whether

more modest principles might serve just as well.

Could there have been Nothing? Geraldine Coggins, 2010-11-24 The first book-length study of metaphysical nihilism: an analytical treatment of one of the most intriguing and fundamental questions in contemporary analytic metaphysics: Could there have been nothing at all? Predator - The Unofficial Guide to the Movie Franchise Nick Naughton, 2023-10-20 Predator is a product of the last great era of Hollywood action films - the eighties. A decade of bone crunching blood splattered foul mouthed blockbuster epics (Robocop, The Terminator, Die Hard, Commando) that wouldn't know what a PG-13 rating was if it skewered them with a spear and ripped their spinal column out to keep as a trophy (as the Predator is apt to do on occasion). In this book we'll take a deep dive into the original Predator and all the sequels it spawned. We'll discuss all of these films in this book and we shall also - of course - discuss the two AvP pictures too. We'll look at the background of each film, the development of them, and

discuss worked and what didn't in the actual movie.
