Antico Forno Roscioli Elisia Menduni, 2016-06-08

In 1972 the Antico Forno Roscioli opened its doors in the bustling heart of Rome. Since then, various members of the family have taken their turn at the helm, expanding the business, transforming it. This book goes behind the scenes of one of the hottest tickets on the Roman dining scene, exploring what makes it tick, its recipes, its city. Photographs by Maurizio Camagna.

Clean Cocktails: Righteous Recipes for the Modernist Mixologist Beth Ritter Nydick, Tara Roscioli, 2017-12-05 Drink to your health with fresh herbs, spices, and natural sweeteners. In Clean Cocktails, holistic health coaches Beth Ritter Nydick and Tara Roscioli bring a clean-living mindset to craft mixology. Their recipes use nothing but naturally low-calorie spirits; fresh juices loaded with vitamins; gentle sweeteners like honey and maple syrup; and anti-inflammatory spices like cinnamon, cayenne, and turmeric—the perfect alternative to drinks that are typically loaded with refined sugars, artificial flavors, and dyes. Much more than a compendium of cocktails, this book provides recipes for “clean” syrups and bitters so readers can easily build their own delicious drinks. Nydick and Roscioli also highlight ingredients with health benefits, such as ginger (better digestion), cilantro (good for detox), and even vodka (metabolism booster, thanks very much). Many of the recipes offer pitcher-sized variations and feature innovative mixers like kombucha and iced tea.

Advances in Spectroscopic Monitoring of the Atmosphere Weidong Chen, Dean S. Venables, Markus W. Sigrist, 2021-06-09 *Advances in Spectroscopic Monitoring of the Atmosphere* provides a comprehensive overview of cutting-edge technologies and monitoring applications. Concepts are illustrated by numerous examples with information on spectroscopic techniques and applications widely distributed throughout the text. This information is important for researchers to gain an overview of recent developments in the field and make informed selections among the most suitable techniques. This volume also provides information that will allow researchers to explore implementing and developing new diagnostic tools or new approaches for trace gas and aerosol sensing themselves. *Advances in Spectroscopic Monitoring of the Atmosphere* covers advanced and newly emerging spectroscopic techniques for optical metrology of gases and particles in the atmosphere. This book will be a valuable reference for atmospheric scientists, including those whose focus is applying the methods to atmospheric studies, and those who develop instrumentation. It will also serve as a useful introduction to researchers entering the field and provide relevant examples

to researchers and students developing and applying optical sensors for a variety of other scientific, technical, and industrial uses. Overview of new applications including remote sensing by UAV, laser heterodyne radiometry, dual comb spectroscopy, and more Features in-situ observations and measurements for real-world data Includes content on leading edge optical sensors

Titian to Tiepolo Gilberto Algranti, 2002 This book is a panoramic view of the richest 300 years of Italian art: the fifteenth, sixteenth and seventeenth centuries, which saw the creation of a constellation of masterpieces of painting and sculpture that has influenced art history for generations. The 1500s saw the era of the great Renaissance masters da Vinci, Raphael, and Michelangelo, as well as the innovators of the mannerist style, del Sarto and Pontormo, and brilliant painters from the Venetian school including Giorgione, Titian, and Lotto. The northern artistic schools arose in the 1600s, led by Carracci, Reni, Guercino, and Domenichino. Included here are works by the revolutionary Caravaggio. Papal Rome is well represented by Bernini and Pietro da Cortona. The 1700s feature landscape artists including Canaletto, Bellotto, and Guardi, and from the Rococo period, Tiepolo and Gandolfi with sculptures by Canova and Giani.

The Molecular Basis of Genetic Disorders
Associated with Essential Elements Metabolism
Rajendra Prasad, 2024-02-26 This pioneering book offers a distinctive exploration of a previously uncharted realm; the book effectively amalgamates the fields of biochemistry, molecular biology, and molecular genetics concerning essential element-

related genetic disorders, employing a coherent and logical approach. The result is a comprehensive guide to essential metals metabolism, covering their regulation, functions, and corresponding genetic disorders. It serves as an authoritative guide for a diverse audience, including medical students, medical nutritionists, medical geneticists, and basic medical scientists. This innovative perspective is particularly pertinent in an age where interdisciplinary collaboration is essential for comprehensive patient care and medical practice. By fostering a practice-centred approach in clinical medicine, the book will inspire clinicians to embrace a holistic viewpoint. Simultaneously, it beckons basic medical scientists to delve into the enigmatic domain of genetic disorders associated with essential elements.

Re-Reading Leonardo Claire Farago, 2017-07-05 For nearly three centuries Leonardo da Vinci's work was known primarily through the abridged version of his Treatise on Painting, first published in Paris in 1651 and soon translated into all the major European languages. Here for the first time is a study that examines the historical reception of this vastly influential text. This collection charts the varied interpretations of Leonardo's ideas in French, Italian, Spanish, English, German, Dutch, Flemish, Greek, and Polish speaking environments where the Trattato was an important resource for the academic instruction of artists, one of the key sources drawn upon by art theorists, and widely read by a diverse network of artists, architects, biographers, natural

philosophers, translators, astronomers, publishers, engineers, theologians, aristocrats, lawyers, politicians, entrepreneurs, and collectors. The cross-cultural approach employed here demonstrates that Leonardo's Treatise on Painting is an ideal case study through which to chart the institutionalization of art in Europe and beyond for 400 years. The volume includes original essays by scholars studying a wide variety of national and institutional settings. The coherence of the volume is established by the shared subject matter and interpretative aim: to understand how Leonardo's ideas were used. With its focus on the active reception of an important text overlooked in studies of the artist's solitary genius, the collection takes Leonardo studies to a new level of historical inquiry. Leonardo da Vinci's most significant contribution to Western art was his interpretation of painting as a science grounded in geometry and direct observation of nature. One of the most important questions to emerge from this study is, what enabled the same text to produce so many different styles of painting?

The End of the Road Alasdair

Fotheringham, 2016-05-05 The first detailed account of the Festina affair, which ripped apart the 1998 Tour de France and irrevocably changed cycling. The Tour de France is always one of the sporting calendar's most spectacular and dramatic events. But the 1998 Tour provided drama like no other. As the opening stages in Ireland unfolded, the Festina team's soigneur Willy Voet was arrested on the French-Belgian border with a car-load of

drugs. Raid after police raid followed, with arrest after arrest hammering the Tour. In protest, there were riders' strikes and go-slows, with several squads withdrawing en masse and one expelled. By the time the Tour reached Paris, just 96 of the 189 starters remained. And of those 189 starters, more than a quarter were later reported to have doped. The 1998 'Tour de Farce's' status as one of the most scandal-struck sporting events in history was confirmed. Voet's arrest was just the beginning of sport's biggest mass doping controversy – what became known as the Festina affair. It all but destroyed professional cycling as the credibility of the entire sport was called into question and the cycling family began to split apart. And yet, ironically, the 1998 Tour was also one of the best races in years. The End of the Road is the first English-language book to provide in-depth analysis and a colourful evocation of the tumultuous events during the 1998 Tour. Alasdair Fotheringham uncovers, step by step, how the world's biggest bike race sank into a nightmarish series of scandals that left the sport on its knees. He explores its long-term consequences – and what lessons, if any, were learned.

Poussin and Nature Metropolitan Museum of Art (New York, N.Y.), 2008 The work of the great French painter Nicolas Poussin (1594-1665) is most often associated with classically inspired settings and figures depicting solemn scenes from mythology or the Bible. Yet he also created some of the most influential landscapes in Western art, endowing them with a poetic quality that has been admired by artists as different as Constable, Turner, and

Ce;zanne. As the British critic William Hazlitt noted in 1844, 'This great and learned man might be said to see nature through the glass of time'. This beautiful catalogue presents the first in-depth examination of Poussin's landscapes. Featured here are more than 40 paintings, ranging from the artist's early Venetian-inspired pastorals to his grandly structured and austere works, designed as metaphors or allegories for the processes of nature. Also included are approximately 60 drawings and essays by internationally renowned scholars who examine the painter's visual, literary, and philosophical influences as well as his relationships with his patrons and his place in the art-historical canon.--Publisher description.

Herbivorous Michael Natkin, 2012-05-08

Vegetarian recipes from a food blogger with “a talent for enticing and boldly flavored creations, in recipes that are colorful, thoughtful, and fresh” (Heidi Swanson, New York Times–bestselling author of *Super Natural Cooking*). In *Herbivorous: A Vegetarian Cookbook for People Who Love to Eat*, food blogger Michael Natkin offers up 150 exciting recipes (most of which have not appeared on his blog) notable both for their big, bold, bright flavors and for their beautiful looks on the plate, the latter apparent in more than 80 four-color photos that grace the book. An indefatigable explorer of global cuisines, with particular interests in the Mediterranean and the Middle East and in East and Southeast Asia, Natkin has crafted, through years of experimenting in his kitchen and in loads of intensive give-and-take

with his blog readers, dishes that truly are revelations in taste, texture, aroma, and presentation. You'll find hearty main courses, ranging from a robust Caribbean Lentil-Stuffed Flatbread across the Atlantic to a comforting Sicilian Spaghetti with Pan-Roasted Cauliflower and around the Cape of Good Hope to a delectable Sichuan Dry-Fried Green Beans and Tofu. An abundance of soups, salads, sauces and condiments, sides, appetizers and small plates, desserts, and breakfasts round out the recipes. Natkin, a vegetarian himself, provides advice on how to craft vegetarian meals that amply deliver protein and other nutrients, and the imaginative menus he presents deliver balanced and complementary flavors, in surprising and utterly pleasing ways. The many dozens of vegan and gluten-free recipes are clearly noted, too, and an introductory chapter lays out the simple steps readers can take to outfit a globally inspired pantry of seasonings and sauces that make meatless food come alive.
