A Gutmann

Bright Star of Heaven Marie Leonard,2010-10 Qualifications--I do not have a degree in English, nor have I free-lanced except for a few church bulletins throughout the years. However, I have written short stories since I was a teenager, and have practiced writing novels as well. The novel I will be sending in is the first that actually wrote itself--I struggled with the others. This novel has something to say, and the prose is clear and readable, so I decided it was time to test it out. Something more personal--Christianity has been my life since I was twenty years of age, and the Lord's guidance in my life and actions holds an important place in my accomplishments. The novel should reflect this, although it is fiction. Where I live/personal life--I live in Rowlett, Tx, just outside of Dallas city limits. I am married and have three children, two dogs, and a son-in-law. I worked retail for over 20 years. I belong to the Lutheran--Missouri Synod Church, taking part in choir and other activities. My other hobbies are weather, especially storm watch, and I have studied sciences such as physics and chemistry, and math (higher calculus). I enjoy studying history, Bible history included.

Treasures from a Kindergarten Room Dana Rowlett,2012-04-19 As a kindergarten teacher for 26 years, I have often heard some very interesting and funny things that my students have said while in my classroom. After my first year of teaching, I decided to begin writing down all of the humorous quotes that I overheard and funny things that students would say to my colleagues. This book is a culmination of 25 years of heartfelt sentiment and logic from the perspective of children, ages 4-6 years of age. I hope you enjoy reading it as much as I enjoyed reliving the experiences

Brionne Louis L'Amour,2004-11-23 Major James Brionne brought Dave Allard to trial for murder. Just before the hanging, Dave swore his brothers would take vengeance. Four years later the Allard boys returned to settle the score. Only Brionne's son escaped. They murdered his wife, destroyed his home, and left Brionne nothing but the charred ruins of his past to haunt him. Seeking peace and a new life, Brionne and the boy headed west. But the Allards hadn't finished with him. He knew they'd call him for a showdown—and this time he'd be ready.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Privilege and Prejudice Clifton R. Wharton,2015-09-01 Privilege and Prejudice is a stereotype-defying autobiography. It reveals a Black man whose good fortune in birth and heritage and opportunity of time and place helped him to forge breakthroughs in four separate careers. Clifton R. Wharton Jr. entered Harvard at age 16. The first Black student accepted to the School of Advanced International Studies at Johns Hopkins, he went on to receive a doctorate in economics from the University of Chicago—another first. For twenty-two years he promoted agricultural development in Latin America and Southeast Asia, earning a post as chairman of the Rockefeller Foundation. He again pioneered higher education firsts as president of Michigan State University and chancellor of the sixty-four-campus State University of New York system. As chairman and CEO of TIAA-CREF, he was the first Black CEO of a Fortune 500 company. His commitment to excellence culminated in his appointment as deputy secretary of state during the Clinton administration. A remarkable story of persistence and courage, Privilege and Prejudice also documents the challenges of competing in a society where obstacles, negative expectations, and stereotypical thinking remained stubbornly in place. An absorbing and candid narrative, it describes a most unusual childhood, a remarkable family, and a historic career.

AN/FSQ-7: the computer that shaped the Cold War Bernd Ulmann,2014-08-19 One of the most impressive computer systems ever was the vacuum tube based behemoth AN/FSQ-7, which was the heart of the "Semi Automatic Ground Environment". Machines of this type were children of the Cold War and had a tremendous effect in politics. They also generated a vast amount of spin-offs which still shape our world. This book focuses on the technological achievements and details of this marvelous machine and of its predecessor Whirlwind. The various developments, ranging from magnetic core memory to data transmission via telephone lines, are covered in detail with schematics, circuit descriptions and small programming examples. This book is a treasure trove for those interested in the technology of early digital computers and those interested in the impact these machines had and still have on our current computer systems.

Note-by-Note Cooking Hervé This,2014-10-21 A renowned chemist and cooking pioneer breaks down the properties and benefits of cooking with

molecular gastronomy. 1-Octen-3-ol, which has a scent of wild mushrooms; limonene, a colorless liquid hydrocarbon that has the smell of citrus; sotolon, whose fragrance at high concentrations resembles curry and at low concentrations, maple syrup or sugar; tyrosine, an odorless but flavorful amino acid present in cheese—these and many other substances, some occurring in nature, some synthesized in the laboratory, make it possible to create novel tastes and flavors in the same way that elementary sound waves can be combined to create new sounds. Note-by-note cooking promises to add unadulterated nutritional value to dishes of all kinds, actually improving upon the health benefits of so-called natural foods. Cooking with molecular compounds will be far more energy efficient and environmentally sustainable than traditional techniques of cooking. This new way of thinking about food heralds a phase of culinary evolution on which the long-term survival of a growing human population depends. Hervé This clearly explains the properties of naturally occurring and synthesized compounds, dispels a host of misconceptions about the place of chemistry in cooking, and shows why note-by-note cooking is an obvious—and inevitable—extension of his earlier pioneering work in molecular gastronomy. Includes an appendix with representative selection of recipes, vividly illustrated in color. “Taking kitchen science to a whole new (molecular) level, Hervé This is changing the way France—and the world—cooks.”—Gourmet “[This] explores the science behind shape, consistency, odor, and color, giving readers the knowledge to create their own magnum opus in the kitchen.”—Discover
