Category 5 Thomas Neil Knowles,2009-06-01 In the midst of the Great Depression, a furious storm struck the Florida Keys with devastating force. With winds estimated at over 225 miles per hour, it was the first recorded Category 5 hurricane to make landfall in the United States. Striking at a time before storms were named, the catastrophic tropical cyclone became known as the 1935 Labor Day Hurricane, and its aftermath was felt all the way to Washington, D.C. In the hardest hit area of the Florida Keys, three out of every five residents were killed, while hundreds of World War I veterans sent there by the federal government perished. By sifting through overlooked official records and interviewing survivors and the relatives of victims, Thomas Knowles pieces together this dramatic story, moment by horrifying moment. He explains what daily life was like on the Keys, why the veteran work force was there (and relatively unprotected), the state of weather forecasting at the time, the activities of the media covering the disaster, and the actions of government agencies in the face of severe criticism over their response to the disaster. The Labor Day Hurricane of 1935 remains one of the most intense to strike America's shores. Category 5 is a sobering reminder that even with modern meteorological tools and emergency management systems, a similar storm could cause even more death and destruction today.

What Stands in a Storm Kim Cross,2016-03 Enter the eye of the storm in this gripping real-life thriller—A Perfect Storm on land—that chronicles America's biggest tornado outbreak since the beginning of recorded weather: a horrific three-day superstorm with 358 separate tornadoes touching down in twenty-one states and destroying entire towns. April 27, 2011 was the climax of a three-day superstorm that unleashed terror from Arkansas to New York. Entire communities were flattened, whole neighborhoods erased. Tornadoes left scars across the land so wide they could be seen from space. But from terrible destruction emerged everyday heroes—neighbors and strangers who rescued each other from hell on earth. “Armchair storm chasers will find much to savor in this grippingly detailed, real-time chronicle of nature gone awry” (Kirkus Reviews) set in Alabama, the heart of Dixie Alley where there are more tornado fatalities than anywhere else in the US. With powerful emotion and captivating detail, journalist Kim Cross expertly weaves together science and heartrending human stories. For some, it's a story of survival; for others it's the story of their last hours. Cross's immersive reporting and dramatic storytelling catapult you to the center of the very worst hit areas, where thousands of ordinary people witnessed the sky falling around them. Yet from the disaster rises a redemptive message that's just as real: in times of trouble, the things that tear our world apart

reveal what holds us together.
