A From Spitfire to Focke Wulf H. Leonard Thorne, Gill Griffin, Barry Griffin, 2013-09-02 'I hold the greatest respect for Len for what he achieved in the RAF'. – Gordon Mitchell, son of Spitfire designer R.J. Mitchell In May 1940, 20-year-old Len Thorne joined the RAF, as did many young men during the Second World War. After two hectic tours of operational duty as a fighter pilot, including some desperately dangerous low-level flying at Dunkirk, he was posted to AFDU (Air Fighting Development Unit) and remained there as a test pilot for the rest of the war. Fortunately for us, Len kept a detailed diary, which, set alongside his log book, tells the unique story of a test pilot tasked with developing operational tactics and testing captured enemy aircraft, such as the feared Fw 190. During Len's career, he worked alongside some of the most famous fighter aces and his records cast light on some of the most famous flyers of the RAF, including Wing Commander Al Deere and Spitfire aces Squadron Leader 'Paddy' Finucane, Ernie Ryder and many others. A unique record of military aviation history, *From Spitfire to Focke Wulf* offers a window to this era of rapid and high-stakes aircraft development.

How to Write History that People Want to Read A. Curthoys, A. McGrath, 2016-04-30 Drawn from decades of experience, this is a concise and highly practical guide to writing history. Aimed at all kinds of people who write history academic historians, public historians, professional historians, family historians and students of all levels the book includes a wide range of examples from many genres and styles.

Transport Revolutions Richard Gilbert, Anthony Perl, 2012 *Transport Revolutions: Moving People and Freight without Oil* sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. *Transport Revolutions* synthesizes engineering, economics, environment, organization, policy and technology, and draws extensively on current data to present important conclusions. The authors argue that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. They go on to discuss marine transport, whose future is less clear, and aviation, which could see the most dramatic breaks from

current practice. With its expert analysis of the politics and business of transport, *Transport Revolutions* is essential reading for professionals and students in transport, energy, town planning and public policy.

Airplane Aerodynamics and Performance Jan Roskam, Chuan-Tau Edward Lan, 1997

Who was David Weiser? Paweł Huelle, 1994 During the sweltering summer of 1957 in Gdansk, three boys and a girl fall under the spell of a mysterious classmate, David Weiser. A thin Jewish boy of few words, Weiser can hypnotize panthers, shoot a bullet through a Hitler stamp at a hundred meters, and even levitate. After staging a spectacular explosion with a hidden cache of old German munitions, Weiser and the girl, Elka, vanish without a trace, leaving the three other boys, including Paweł Heller - the novel's narrator - to explain his disappearance to the authorities. But the boys won't talk. What happened to David Weiser? And who was he - a demon, a prophet, or just a boy? Heller's quest for the answers to these questions makes for a beguiling and haunting tale.

The Knowledge Enterprise J Friso den Hertog, Edward Huizenga, 2000-01-22 Price and quality alone are no longer sufficient to gain competitive advantage. It is high quality knowledge which provides the opportunities for adding exclusive value to products and services. At the same time, the development of knowledge is gaining momentum. Knowledge is becoming obsolete more quickly and becomes more complex. The danger of this development is that organizations will continue to play the same competitive game and are often unaware that they are lagging behind. This book provides organizations with a way to shift the knowledge ambition and realize it in practice. For this purpose, an intelligent business strategy is offered based on the experiences of seven market leaders in The Netherlands, combined with modern insights from the organizational theory. The authors devote much attention to the tools available to the knowledge enterprise, such as lateral structures, personnel management and information technology. Contents: The Knowledge Theory: The Knowledge Enterprise The Knowledge Ambition Knowledge Development The Knowledge Practice: The Knowledge Enterprise in Actual Practice Regimes for the Knowledge Enterprise The Tools: Lateral Organization Steering on People Information Technology Renovation of the Knowledge Enterprise Readership: Academics, managers and advanced graduates.

Atlas of Sustainable Development Goals 2017, 2017 The World Bank's compilation of statistics from over 200 economies is built around World Development Indicators (WDI) - selected indicators have been identified and visualized to analyze trends and challenges, and to catalyze discussion on measurement issues. The Atlas of Sustainable Development Goals 2017 uses maps, charts and

analysis to illustrate, trends, challenges and measurement issues related to each of the 17 Sustainable Development Goals (SDGs). Given the breadth and scope of the SDGs, the editors have been selective, emphasizing issues considered important by experts in the World Bank's Global Practices and Cross Cutting Solution Areas. Nevertheless, The Atlas aims to reflect the breadth of the Goals themselves and presents national and regional trends and snapshots of progress towards the UN's seventeen Sustainable Development Goals: poverty, hunger, health, education, gender, water, energy, jobs, infrastructure, inequalities, cities, consumption, climate, oceans, the environment, peace, institutions, and partnerships. Between 1990 and 2013, nearly one billion people were raised out of extreme poverty. Its elimination is now a realistic prospect, although this will require both sustained growth and reduced inequality. Even then, gender inequalities continue to hold back human potential

Song Translation: Lyrics in Contexts Johan Franzon, Annjo K. Greenall, Sigmund Kvam, Anastasia Parianou, 2021-02-01 Song Translation: Lyrics in Contexts grew out of a project dedicated to the translation of song lyrics. The book aligns itself with the tradition of descriptive translation studies. Its authors, scholars from Finland, Great Britain, Greece, Italy, Norway and Sweden, all deal with the translation of song lyrics in a great variety of different contexts, including music and performance settings, (inter)cultural perspectives, and historical backgrounds. On the one hand, the analyses demonstrate the breadth and diversity of the concept of translation itself, on the other they show how different contexts set up conditions that shape translational practices and products in different ways. The book is intended for translation studies scholars as well as for musicologists, students of language and/or music and practicing translators; in short, anybody interested in this creative and fascinating field of translational practice.

The Politics of English Lionel Wee, Robbie B.H. Goh, Lisa Lim, 2013-03-28 This volume brings together contributions that explore the increasingly important roles that English plays in Asia, including its contribution to economic growth, national imaginaries and creative writing. These are issues that are political in a broad sense, but the diversity of Asian contexts also means that the social, political and cultural ramifications of the spread of English into Asia will have to be understood in relation to the challenges facing specific societies. The chapters in the book collectively illustrate this diversity by focusing on countries from South Asia, Southeast Asia and the Asia Pacific. Each country has two contributions devoted to it: one paper provides an overview of the country's language policy and its positioning of English, and another provides a critical discussion of creative expressions involving the use of English. Taken together, the papers in the volume detail the most recent developments

concerning the politics of English in Asia.

Translating for Children Ritta Oittinen, 2002-06 Translating for Children is not a book on translations of children's literature, but a book on translating for children. It concentrates on human action in translation and focuses on the translator, the translation process, and translating for children, in particular. Translators bring to the translation their cultural heritage, their reading experience, and in the case of children's books, their image of childhood and their own child image. In so doing, they enter into a dialogic relationship that ultimately involves readers, the author, the illustrator, the translator, and the publisher. What makes Translating for Children unique is the special attention it pays to issues like the illustrations of stories, the performance (like reading aloud) of the books in translation, and the problem of adaptation. It demonstrates how translation and its context takes precedence can take over efforts to discover and reproduce the original author's intentions. Rather than the authority of the author, the book concentrates on the intentions of the readers of a book in translation, both the translator and the target-language readers.

The Translational Design of Schools Kenn Fisher, 2016-10-13 This book summarises the deep level of research carried out since 2008 within the emerging, evidence-based, translational design (EBD) approach to learning environments research. This programme has been carried out by the Learning Environments Applied Research Network of the University of Melbourne, its partners and colleagues. The chapters are based on ten, 3–4 year full-time doctoral research dissertations with each chapter outlining the key findings from these studies. The book links the chapters through the lens of evidence-based design which originates from the health planning sector. The rigour of that sector is based on the well-accepted methodology of translational research used in clinical medicine for many years. In adapting that practice, translational medicine is akin to translational development. When applied to other sectors and disciplines this becomes EBD health planning, translational engineering or, in the case of evidence-based architecture, translational design. Thus educational planning becomes the translational design of learning environments. These doctoral dissertations are examples of this approach. The chapters are organised into a narrative that examines evidence-based design through three key themes. The first explores key issues in learning environments, with three chapters covering spatial literacy in pedagogical practice; engaging students in learning spaces; and re-placing classrooms through flexibility. The second theme focusses on the socio-cultural implications of learning environments exploring student identity formation; aligning learning environment

affordances for effective professional development in an innovative senior secondary school; and occupying curriculum as space in the arts. The third theme investigates the design implications for learning environments with four chapters covering corridors, nooks and crannies: making space for learning; the role of the primary school library in learning; plans and pedagogies: school design as socio-spatial assemblage; and evaluating the spatial changes in a technology enabled primary years setting.

Chutnefying English Rita Kothari, Rupert Snell, 2011 Contributed articles. Something has happened to English; and something has happened to Hindi. These two languages, widely spoken across India, need to be understood anew through their 'hybridization' into Hinglish -- a mixture of Hindi and English that has begun to make itself heard everywhere -- from daily conversation to news, films, advertisements and blogs. How did this popular form of urban communication evolve? Is this language the new and trendy idiom of a youthful population no longer competent in either English or Hindi? Or is it an Indianized version of a once-colonial language, claiming its legitimate place alongside India's many bhashas? *Chutnefying English: The Phenomenon of Hinglish*, the first book on the subject, takes a serious look at this widespread phenomenon of our times which has pervaded every aspect of our daily lives. It addresses the questions that many speakers of both languages ask time and again: should Hinglish be spurned as the bastard offspring of its two parent languages, or welcomed as the natural and legitimate result of their long-term cohabitation? Leading scholars from literature, cultural studies, translation, cinema and new media come together to offer a collection of essays that is refreshingly new in thought and content.--Page 2 of cover.

The Last Days of Europe Walter Laqueur, 2007-05-15 Sample Text

The Coverage of the Russian-Ukrainian Conflict by the Polish Media (2014-2015) Róża Norström, 2019-07-31 In this book, the author examines the media coverage of the Russian-Ukrainian conflict by six Polish media outlets in 2014 and 2015. Using content analysis and in-depth interviews, the author explores how cultural and historical factors, as well as the national security threat to Poland, affected the media image of the conflict. Despite differences in editorial line, level of political parallelism and type of medium, the Polish media largely spoke with one voice. Interviews with journalists uncover how they view their role in reporting on the conflict, and how national prejudices had an impact on their work. The military and economic threat to Poland, resulting from Russia's actions, was the dominant tool of domestication used by the media to bring the dispute closer to the public.

Defining the Indefinable: Delimiting Hindi Agnieszka Kuczkiewicz-Fra¹, 2014 The nine essays of this volume, devoted to the broadly understood problem of the definition and usage of Hindi, tackle the issue of what «Hindi» is, and analyse its various aspects as official language, link language, language of diasporas, language of cultural and religious tradition, language used in economy and business, etc.

Hitler's Shadow Richard Breitman, 2011-04 This report is based on findings from newly-declassified decades-old Army and CIA records released under the Nazi War Crimes Disclosure Act of 1998. These records were processed and reviewed by the National Archives-led Nazi War Crimes and Japanese Imperial Government Records Interagency Working Group. The report highlights materials opened under the Act, in addition to records that were previously opened but had not been mined by historians and researchers, including records from the Office of Strategic Services (a CIA predecessor), dossiers of the Army Staff's Intelligence Records of the Investigative Records Repository, State Dept. records, and files of the Navy Judge Advocate General. This is a print on demand report.

The Queen's Hinglish B. K. Mahal, 2006 Takes a light-hearted look at 'Hinglish', a variety of English combined with elements of Southern Asian languages. This book features the best-loved and familiar terms, such as pukka and chuddies. It includes intriguing facts and stories and is illustrated throughout.
