Grief David Shneer,2020-07-01 In January 1942, Soviet press photographers came upon a scene like none they had ever documented. That day, they took pictures of the first liberation of a German mass atrocity, where an estimated 7,000 Jews and others were executed at an anti-tank trench near Kerch on the Crimean peninsula. Dmitri Baltermants, a photojournalist working for the Soviet newspaper Izvestiia, took photos that day that would have a long life in shaping the image of Nazi genocide in and against the Soviet Union. Presenting never before seen photographs, *Grief: The Biography of a Holocaust Photograph* shows how Baltermants used the image of a grieving woman to render this gruesome mass atrocity into a transcendently human tragedy. David Shneer tells the story of how that one photograph from the series Baltermants took that day in 1942 near Kerch became much more widely known than the others, eventually being titled *Grief*. Baltermants turned this shocking wartime atrocity photograph into a Cold War era artistic meditation on the profundity and horror of war that today can be found in Holocaust photo archives as well as in art museums and at art auctions. Although the journalist documented murdered Jews in other pictures he took at Kerch, in *Grief* there are likely no Jews among the dead or the living, save for the possible NKVD soldier securing the site. Nonetheless, Shneer shows that this photograph must be seen as an iconic Holocaust photograph. Unlike images of emaciated camp survivors or barbed wire fences, Shneer argues, the Holocaust by bullets in the Soviet Union make *Grief* a quintessential Soviet image of Nazi genocide.

Half the Day is Night Maureen F. McHugh,1994 In a twenty-first-century undersea city, terrorists threaten old-money banker Mayla Ling, potentially plunging her and her bodyguard, war veteran David Dai, back into the nightmare of David's violent past. By the author of *China Mountain Zhang*.

After Tragedy Strikes Thomas D. Beamish,2024 While trauma and loss can occur anywhere, most suffering is experienced as personal tragedy. Yet some tragedies transcend everyday life's sad but inevitable traumas to become notorious public events: de facto public tragedies. In these crises, suffering is made publicly visible and lamentable. Such tragedies are defined by public accusations, social blame, outpourings of grief and anger, spontaneous memorialization, and collective action. These, in turn, generate a comparable set of political reactions, including denial, denunciation, counterclaims, blame avoidance, and a competition to control memories of the event. Disasters and crises are no more or less common today than in the past, but public tragedies now seem ubiquitous. *After Tragedy Strikes* argues that they are now epochal--public tragedies have become the day's definitive social and political events. Thomas D. Beamish deftly explores this phenomenon by developing the historical context within which these events occur and the role that political elites, the media, and an emergent

ideology of victimhood have played in cultivating their ascendance.

Rainbows After the Storm Diane Santos, 2017-05-26 Diane stood at a crossroads. Would she dwell on what was lost following her soulmate's sudden passing, or build on the foundation of love inspired by their ongoing connection? *Rainbows After the Storm* details her escape from the clutches of despair through the healing properties of maintaining an attitude of gratitude. This shift in focus reveals a reserve of strength, infusing her will to reach higher and dream bigger than she's ever imagined. In this candid account of the methods used to rebuild her life, Diane includes insights on the liberating effects of tuning into our inner guidance systems. She shares how the consistent application of basic principles determines the quality of our experiences. A true story of the transformative power of self-love; this is a must-read for anyone in need of hope.

Waves, Particles, and Storms in Geospace Georgios Balasis, Ioannis A. Daglis, Ian R. Mann, 2016-11-03 Geospace features highly dynamic populations of charged particles with a wide range of energies from thermal to ultra-relativistic. Influenced by magnetic and electric fields in the terrestrial magnetosphere driven by solar wind forcing, changes in the numbers and energies of these particles lead to a variety of space weather phenomena, some of which are detrimental to space infrastructure. This book presents an overview of the latest discoveries and current scientific understanding of the coupling of electromagnetic waves and charged particles during magnetic storms, and explains the observed dynamics of these particle populations. The book furthermore includes investigations relevant to understanding and forecasting this space environment and the adverse impacts of space weather. High-energy electrons and ions in the Van Allen radiation belts and the ring current are of particular interest and importance with regard to the operation of space-based technological infrastructure upon which 21st century civilisation increasingly relies. This book presents the latest research on the sources, transport, acceleration and loss of these energetic particle populations, as well as their coupling during geospace magnetic storms.

Hilda Hurricane Roberto Drummond, Peter Vaudry-Brown, 2010-09-01 Eighteen-year-old Hilda, known as “the girl in the gold bikini” when she swam at her country club in Belo Horizonte, Brazil, abruptly leaves the gilded life to take up residence in room 304 of the Hotel Marvelous—as a prostitute. There she becomes Hilda Hurricane, an erotic

force of nature no man can resist. The exception is reporter-narrator Roberto Drummond, who attempts to unravel the mystery of why the girl in the gold bikini would forego a comfortable life to join the world's oldest profession. While some in Belo Horizonte cheer Hilda's liberated lifestyle, others seek to have her moved outside the city limits, and a would-be saint cannot seem to finish the exorcism he began outside the Hotel Marvelous. Set against the social and political upheaval of the 1960s, Hilda's story seduces even as Drummond becomes aware of more ominous forces approaching Belo Horizonte. Hilda Hurricane was both a critical and a commercial success in Brazil, with more than 200,000 copies sold. (The DVD of the television adaptation has sold more than a million copies.) Admirers of Kurt Vonnegut will revel in Drummond's similarly sharp satire and playful digressions, particularly about left-wing politics, which blur the boundary between fiction and autobiography. Yet the real genius of the author's interventions may be that they never slow the story long enough to lose sight of this mysterious beauty swept up in the turmoil of the times.

Coastal and Marine Hazards, Risks, and Disasters Jean Ellis, Douglas J. Sherman, 2014-11-11 Sea and Ocean Hazards, Risks and Disasters provides a scientific approach to those hazards and disasters related to the Earth's coasts and oceans. This is the first book to integrate scientific, social, and economic issues related to disasters such as hazard identification, risk analysis, and planning, relevant hazard process mechanics, discussions of preparedness, response, and recovery, and the economics of loss and remediation. Throughout the book cases studies are presented of historically relevant hazards and disasters as well as the many recent catastrophes. Contains contributions from experts in the field selected by a world-renowned editorial board Cutting-edge discussion of natural hazard topics that affect the lives and livelihoods of millions of humans worldwide Numerous full-color tables, GIS maps, diagrams, illustrations, and photographs of hazardous processes in action will be included

Tracking the Literature of Tropical Weather Anne Collett, Russell McDougall, Sue Thomas, 2017-01-09 This book tracks across history and cultures the ways in which writers have imagined cyclones, hurricanes, and typhoons, collectively understood as "tropical weather." Historically, literature has drawn upon the natural world for its store of symbolic language and technical device, making use of violent storms in the form of plot, drama, trope, and image in order to highlight their relationship to the political, social, and psychological realms of human affairs. Charting this relationship through writers such as Joseph Conrad, Herman Melville, Gisèle Pineau, and other writers from places like Australia, Japan, Mauritius, the Caribbean, and the Philippines, this ground-breaking collection of essays illuminates the specificities of the ways local, national, and regional communities have made sense and even relied upon the literary to endure the devastation caused by deadly tropical weather.
