Story of Matchbox Kits 1973-2010 Jean-Christophe Carbonel, 2011-08-01 Who can ever forget the aircraft kits with the multicolored plastic parts? Unlike other makes, Matchbox just didn't suddenly appear one day on the plastic scale models scene. Matchbox came from the well-known range of die-cast vehicles of the same name. The Lesney company which used the brand name Matchbox was founded in 1953 by Mr Leslie Smith (who remained on the board of the company throughout his career - he died in 2005) and Mr Rodney Smith. It was this company that thought up these little pocket money vehicles and the ingenious packaging which gave them their name. The name came from the box which was the shape, size and color of a match box. The firm brought out scale models of planes, tanks, boats, motorbikes and cars but also little soldiers which all brightened the childhood days of today's forty-year olds... This book retraces the forty glorious years of a firm, of a brand of kits intended for beginners just as much as it was for the most demanding buffs. More than just a kit, a state of mind. Jean-Christophe Carbonel is a world renowned specialist of French model kits. His 20-years of experience with the European and Japanese model kit markets has enabled him to deal in depth with the French model craze.

The Aviation History Rely Victoria Petrescu, Florian Ion Petrescu, 2013-02 According to Aulus Gellius, Archytas, the Ancient Greek philosopher, mathematician, astronomer, statesman, and strategist, was reputed to have designed and built, around 400 BC, the first artificial, self-propelled flying device, a bird-shaped model propelled by a jet of what was probably steam, said to have actually flown some 200 metres. This machine, which its inventor called The Pigeon, may have been suspended on a wire or pivot for its flight. The 9th century Muslim Berber inventor, Abbas Ibn Firnas's glider is considered by John Harding to be the first attempt at heavier-than-air flight in aviation history. In 1010 AD an English monk, Eilmer of Malmesbury purportedly piloted a primitive gliding craft from the tower of Malmesbury

Abbey. Eilmer was said to have flown over 200 yards (180 m) before landing, breaking both his legs. He later remarked that the only reason he did not fly further was because he forgot to give it a tail, and he was about to add one when his concerned Abbot forbade him any further experiments. Bartolomeu de Gusmão, Brazil and Portugal, an experimenter with early airship designs. In 1709 demonstrated a small airship model before the Portuguese court, but never succeeded with a full-scale model. Pilâtre de Rozier, Paris, France, first trip by a human in a free-flying balloon (the Montgolfière), built by Joseph-Michel and Jacques-Étienne Montgolfier, . 9 km covered in 25 minutes on October 15, 1783. (see Le Globe below for first unmanned flight, 2 months earlier) Professor Jacques Charles and Les Frères Robert, two French brothers, Anne-Jean and Nicolas-Louis, variously shared three milestones of pioneering flight: Le Globe, the first unmanned hydrogen gas balloon flew on 26 August 1783. On 1 December 1783 La Charlière piloted by Jacques Charles and Nicolas-Louis Robert made the first manned hydrogen balloon flight. In 1951, the Lockheed XFV-1 and the Convair XFY tailsitters were both designed around the Allison YT40 turboprop engine drivin
