School Trip Estimation Clare O'Brien,2006 In this book, learn to estimate in different ways for different purposes by following students on a school field trip.

Pencils Down! Paula Greene,2012-09 Pencils Down! has been forty-five years in the making. It is hoped that by sharing classroom experiences, the reader will be entertained, enlightened, and educated. The ideas presented are written for all educators: veteran, novice, substitute and student teachers, parents who homeschool, college and university professors, as well as for anyone who has a child in his or her care. The guide offers the fruit of my experiences, gleaned from a lifetime in the classroom. Writing this book has been a labor of love, and it is my sincere hope that all educators reading this book will find some fresh insight into the wonderful profession of teaching. Pencils Down! will take you on a journey whose itinerary begins in elementary school and spans more than four decades. I have taken that journey at the head of the class.Many an author has written a book on education without ever having stepped into a real classroom. I have stepped into many classrooms, many times, over many years, and now feel qualified to write my first book.Having successfully survived as a teacher forty-five years in the public and private sectors of both the New York and Nevada school systems prompted me to write this book, a book packed with lessons that work, school humor, enrichment activities, and sage advice ready to be used by anyone who desires to instill a love of learning in a child. You may wish to do many of the lessons with your students. Most of the text deals with activities based on beloved children's books. I have selected more than fifty children's books I most enjoyed reading and teaching my students. Although some of these books never achieved Newbery Medal award status, each book teaches something of life's lessons, and each is a gem. My first priority was selecting excellent children's books. I have selected a broad and diverse collection of children's books with the hope that by using these books daily with all elementary school children, each child can learn to love books and appreciate the extended benefits of lifelong literacy.To give you a true flavor of what is covered, a summary of each part follows. Welcome to Pencils Down!Part One: School HumorYou are reading this either because you are contemplating a career in teaching or are curious to find out whether a veteran teacher can still be sane after spending forty-five years in the classroom. Part One presents the humorous side to an otherwise serious profession. You will get a glimpse of nineteenth and early twentieth century rules for teachers and peruse a copy

of the contract teachers were made to sign. Both will make you wonder why anyone would consider a career in education. You will find out what teachers make and be privy to the public's low opinion of teachers' salaries. If you survive the reality show for educators, you may continue reading the book. School anecdotal incidents, accrued from many years in the classroom, will be shared. You will learn why God created the teacher and will be introduced to the new school policy. A test designed for preschoolers will challenge you. Answers from kindergartners and first graders as to why we read and write will be sure to surprise and amuse you. Actual student test answers and parental notes are included, both good for a chuckle. The difference between an educator and a teacher will be clarified. Today's schools, vs. schools in the 50's and 60's, will make you wish you were teaching in a simpler era and make you wonder if schools are still teaching math. An Australian school's answering machine will make you smile, as will the eleven things you did not and will not learn in school. Part Two: Getting to Know You Getting to know you, Getting to know all about you.

101 Ways to Make Studying Easier and Faster for High School Students Janet Engle, 2008 With many students today participating in extracurricular activities, jobs, clubs, and responsibilities at home, it is common to find an area that is lacking studying. Teachers have identified that poor study skills are often to blame. On the other hand, students have found that many of the textbooks and worksheets forced upon them are either boring or difficult to understand. Whether it is bad habits or complicated materials that prevent you from studying well, this book can help you to improve the effectiveness of your studying. After all, effectiveness is not measured by the length of time spent studying, but by the level of comprehension. In this new book, you will learn how to make a study schedule, how to design an effective study space, how to read for comprehension, how to get organised, how to find your learning style, how to listen better in class, how to use reference sources, how to boost your concentration, and how to stay motivated. You will learn effective note taking strategies, where to study, when to study, time management skills, strategies for reading novels and text books, memorisation techniques, and organisational skills. Additionally, you will find out how to stay awake while studying, how to change your current habits, and how to make studying more enjoyable. We will provide you with various studying methods, including flashcards, quizzes, summarising, outlining, answering study guide questions, and the proven SQ3R method, as well as exercises to help improve your skills. Furthermore, the book is full of tips from students just like you, as well as teachers. No two people learn the same way, and no one study method will work for everyone. While this book introduces you to different study methods, the aim is to improve your learning, your understanding, and, ultimately, your grades.

Staying After School Robert Eidelberg, 2017-08-30 Remarkable teachers. Challenging classes. What if! Like his So You Think You Might Like to Teach, educator Robert Eidelberg's latest next word book, Staying After School, is about what goes into good instruction and true learning (and that odd couple relationship of teacher and student). Schools out, but then it's back in. And through a unique form and structure, Staying After School showcases more than a dozen school-set novels and films and the imaginative writing about them by nineteen of Eidelberg's student collaborators. Here is a class-act assortment of what-ifs by college students who figuratively stayed after school in their special course, The Teacher and Student in Literature, to creatively extrapolate from the literary works of such school book authors as Bel Kaufman, Evan Hunter, E. R. Braithwaite, Frances Gray Patton, and Leo Rosten, along with major film director Richard Brooks
