**Fun Science** Charlie McDonnell, 2016-10-06 Welcome, fellow humans (and others), to the the world of FUN SCIENCE! I'm Charlie, also known across the internet as charlieissocoolllike. In my book, I take you on an awesome journey through the cosmos, beginning with the Big Bang through to the Solar System and the origins of life on Earth, all the way down to the particles that make up everything around us (including you and me!). So, get ready for a faster-than-the-speed of-light (OK, not quite) tour of all of the best and most interesting things that science has to offer us... and most importantly: WELCOME TO THE UNIVERSE! (Written by a science fan NOT a scientist!)

Make Science Fun: Experiments Jacob Strickling, 2017-11-06 Make Science Fun 2, intended for an older more 'serious' age group of 8-15, is designed for children to do actual science experiments (not just science 'activities') at home. Most science experiment books aren't experiment books at all. They mostly contain fun science activities, which are fun to do & help learn science - but a fun science 'activity' isn't always an experiment. A science experiment sets out to answer a question or solve a problem using a fair and controlled test. To count as a science experiment you need to take measurements, make observations and control variables. With space to write hypotheses, record results, make observations and draw graphs required, Make Science Experiments is a strong foundation on which to build student awareness of the importance of science in everyday lives. SELLING POINTS - Science experiments for the kitchen, garage or workshop, bathroom and garden. - Bonus projects perfect for a science fair or school project. - Projects using only basic products that can be found in every home kitchen or bathroom. - Make Science Fun banishes the 'science is boring' stereotype through fun experiments that children can do alone or with friends or parents. - The author's YouTube channel.

*Bathroom Science* Christine Taylor-Butler, 2016-10-01 Create exploding toilet volcanoes, oozing sink slime, and bubbling bathtub cauldrons...all in the name of science! Each step-by-step experiment uses household and other easy-to-find materials so the young scientist's lab can be equipped quickly, inexpensively, and—for those who might

worry—safely. Bathroom Science highlights the materials, the method, and the scientific why behind every experiment. Best of all, Bathroom Science makes science as simple (and occasionally explosive) as going to the bathroom. We've packed in 101 kid-challenging experiments, including... \*Turn Your Toilet into a Volcano \*Steam Up a Secret Message \*Fill the Sink with Booger Slime \*Give Bathwater an Eerie Glow \*The Cackling Chicken of Death, and \*Make Your Own Stink Bomb (Eew!) The folks who brought you Uncle John's Bathroom Reader...creating the next generation of mad (and amazing) scientists, one kid at a time! (Bwa-ha-ha!)
