Ask a Science Teacher Larry Scheckel, 2013-12-17 Fun and fascinating Q&As on topics from astronomy to zoology: “A treasure.” —Library Journal We’ve all grown so used to living in a world filled with wonders that we sometimes forget to wonder about them: What creates the wind? Do fish sleep? Why do we blink? All too often, the explanations remain shrouded in mystery—or behind a haze of technical language. For kids of all ages—or those of us who should have raised our hands in science class but didn’t—Larry Scheckel comes to the rescue. An award-winning science teacher and longtime columnist for his local newspaper, Scheckel is a master explainer with a trove of knowledge. Just ask the students and devoted readers who’ve spent years trying to stump him! In *Ask a Science Teacher*, Scheckel collects 250 of his favorite Q&As and provides refreshingly uncomplicated explanations. You’ll learn how planes really fly, why the Earth is round, how microwaves heat food, and much more on topics including: The Human Body * Earth Science * Astronomy * Chemistry * Physics * Technology * Zoology * Music and conundrums that don’t fit into any category “For any curious minded reader—young or old.” —Publishers Weekly

Hands-On Science Mysteries for Grades 3 - 6 James Robert Taris, Louis James Taris, 2006-08-18 In *Hands-On Science Mysteries for Grades 3-6*, the authors connect science to real-world situations by investigating actual mysteries and phenomena, such as the strange heads on Easter Island, the ghost ship Mary Celeste, and the “Dancing Stones” of Death Valley. The labs are designed to encourage the development of science inquiry, in which students will observe, take notes, make diagrams, interpret data, and arrive at solutions, and include extensions for further investigation.

Sci-Book Aaron D. Isabelle,2017-12-06 A "Sci-Book" or "Science Notebook" serves as an

essential companion to the science curriculum supplement, STEPS to STEM. As students learn key concepts in the seven “big ideas” in this program (Electricity & Magnetism; Air & Flight; Water & Weather; Plants & Animals; Earth & Space; Matter & Motion; Light & Sound), they record their ideas, plans, and evidence. There is ample space for students to keep track of their observations and findings, as well as a section to reflect upon the use of “Science and Engineering Practices” as set forth in the Next Generation Science Standards (NGSS). Using a science notebook is reflective of the behavior of scientists. One of the pillars of the Nature of Science is that scientists must document their work to publish their research results; it is a necessary part of the scientific enterprise. This is important because STEPS to STEM is a program for young scientists who learn within a community of scientists. Helping students to think and act like scientists is a critical feature of this program. Students learn that they need to keep a written record if they are to successfully share their discoveries and curiosities with their classmates and with the teacher. Teachers should also model writing in science to help instill a sense of purpose and pride in using and maintaining a Sci-Book. Lastly, students’ documentation can serve as a valuable form of authentic assessment; teachers can utilize Sci-Books to monitor the learning process and the development of science skills.
